Re: AD19-16 Request for Information on Performance Metrics for ISO, RTOs and Utilities in Regions outside ISOs and RTOs - 2019 – 2022

Dear Secretary Bose:

Enclosed please find the supplemental submission of data for years 2019 through 2022 from the California Independent System Operator Corporation (CAISO) in response to the notice dated January 18, 2023 issued by the Federal Energy Regulatory Commission for independent system operators (ISOs), regional transmission operators (RTOs), and regions outside ISOs and RTOs to report data on certain performance metrics.

As explained in its April 24, 2023 initial submission of data, there are some metrics for which the CAISO either does not have responsive information or collects information in a manner that is not consistent with the metrics. In some cases, the information provided varies from that requested in the metrics. The CAISO has identified these variances in its explanatory text included with the data submission.

This submission includes update total anticipated installed capacity and total available installed capacity, which informs data provided in response to metric 1. This submission also includes the CAISO's net energy for load for 2022, which informs data provided in metrics 12, 13, 16, and 17. In addition, the CAISO has updated its Ancillary Service Component of Total Wholesale Power Cost for record years 2019-2022, which affects information provided in metric 12.

The CAISO strongly supports measures to increase the transparency of its markets and operations. The CAISO provides significant amounts of information regarding its markets and operations through multiple mechanisms, including reports published on its website (www.aiso.com)

Hon. Kimberly D. Bose
