

Maximum Import Capability (MIC) Enhancements Pre-Market Sim Training

Monica Mouanetry, Sr. Customer Readiness Trainer – Presenter
Cynthia Hinman, Lead Customer Readiness Trainer - Producer
August 7, 2023

Revised: 04/29/24

- Step 13 details updates (revised location and name change)

Who does this impact?

Scheduling Coordinators that are participating in the Resource Adequacy program, more specifically California ISO Load Serving Entities (LSEs).

Housekeeping

Keep yourself muted to minimize background noise

Unmute to ask verbal questions or write questions in the chat pod

Raise your hand using WebEx interactivity tools

Agenda

This training will cover the following topics:

- High-level review of changes
- Application-specific details
- Market simulation activities

Maximum Import Capability (MIC) Enhancements scope

1. Additional transparency with making data publicly available
2. Inclusion of contractual data from non-CPUC jurisdictional LSEs into the main portfolio
3. Request for MIC expansion
4. Give “same day priority” to the step 13 unallocated Remaining Import Capability for LSEs with existing RA Contracts
5. Update Tariff and Reliability Requirements BPM language to be consistent with current approved practice

MAXIMUM IMPORT CAPABILITY (MIC) ENHANCEMENTS TIMELINE

Implementation timeline

Update: The prod activation date was moved from 10/1/23 to 11/1/23.

Maximum Import Capability (MIC) Enhancements

BACKGROUND: HIGH-LEVEL REVIEW OF CHANGES

What is Maximum Import Capability?

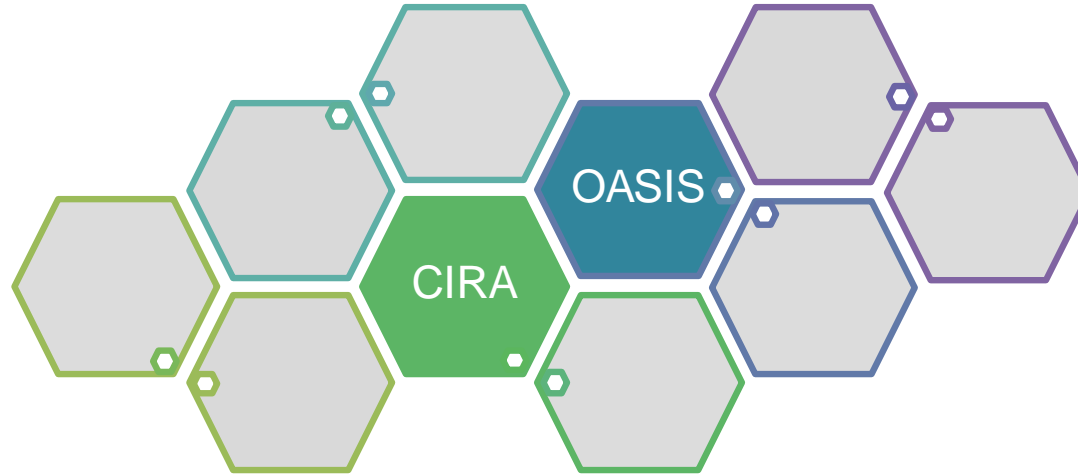

Represents a quantity in MWs determined by the CAISO to be simultaneously deliverable to the aggregate of load in the CAISO Balancing Authority Area (BAA).

- ISO tests both the deliverability of internal resources and the deliverability of imports, to ensure all RA resources are simultaneously deliverable
- LSEs RA import showings are limited for each intertie to its share of MIC
- Calculated yearly by the CAISO
- Allocated yearly by the CAISO to LSEs

Reason for this enhancement

1. Give “same day priority” to the step 13 unallocated Remaining Import Capability for LSEs with existing RA Contracts
2. Additional transparency with making data publicly available

Questions

REVIEW APPLICATION - SPECIFIC DETAILS

Customer Interface for Resource Adequacy (CIRA)

Step 13 Notification of Unassigned Import Capability

Required CIRA application access role

Must be provisioned to CIRA for the **EXTERNAL RA READ-WRITE** role. Coordinate with your User Access Administrator (UAA) if you do not have access.

CIRA Access and Permissions	
CIRA Access Levels	Access Level Description
EXTERNAL RA READ-WRITE (app_cira_sc)	Permission to read, upload, and maintain data in the RA Plans, Supply Plans, NQC, Import Allocations, and Forced Substitution. Permission to read Validation Results, RA Reports, Obligation Reports, and historic Replacements

[Links to CIRA Map Stage | CIRA Production](#)

Step: 13 2023 Notification of Unassigned Import Capability

Current process

LSEs/SCs review Unassigned Available Import Capability

Requests are sent to ReliabilityRequirements@caiso.com

Step 12	
This posting contains information regarding unassigned available import capability pursuant to Tariff section 40.4.6.2.1 Step 12	
Scheduling Point	Unassigned Available Import Capability
CASCADE_BG	60
CTW230_BG	74
NWEST_ITC	5
PARKER_BG	25
SYLMAR-AC_ITC	195.42
WSTWGMEAD_ITC	28.51

Note: Pursuant to Step 13 of the above referenced CAISO Tariff, Scheduling Coordinators for Load Serving Entities or Market Participants should notify the ISO of their request to assign any remaining Unassigned Import Capability as indicated in the table above, no later than **08/15/2022**.

Requests that are received prior to 9:00 a.m. PDT on 08/15/2022 will be denied. The CAISO will accept only two (2) requests per calendar week from any Scheduling Coordinator on behalf of a single Load Serving Entity, Participating Generator, or System Resource. If a request includes more than two intertie allocation requests the ISO will only process the first two interties in the request; the remaining intertie requests will be denied.

Requests should be sent to:
ReliabilityRequirements@caiso.com

Reliability requirements

The reliability requirements and resource adequacy programs provide deliverability criteria that each load serving entity must meet, and provide rules for counting resources that must be made available to the ISO. The ISO reliability requirements program is intended to complement the state's efforts to implement resource adequacy programs.

Assigned MWs based on Proration formula

Total Unassigned Available Import Capability at the Branch Group divided by the sum of from eligible portions of applicable Resource Adequacy contract with priority) multiplied by each LSE's eligible RA contract amount.

$$\frac{\text{Total Unassigned Available Import Capability at the Branch Group (BG)}}{\text{Sum value of eligible portions of the applicable RA contract}} \times \text{LSE's eligible RA Contract amount} = \text{Assigned MW}$$

Note: CIRA will apply the proration formula to calculate the assigned MW when the MW request exceeds the total unassigned available import capability.

[Link to Reliability Requirements BPM](#)

Scenario: Multiple LSEs/SCs request for an intertie branch group (BG)

Sample Data

Intertie (BG) = **PALOVRDE_ITC** Unassigned Import Capability = **2311.01**

Requestor ID	Requestor Priority based on submission	Requested MW	RA Contract	RA Contracted MW
LSE 1	1	2300	No	
LSE 2	2	1700	Yes	1700
LSE 3	3	1500	Yes	1500

$$\frac{\text{Total Unassigned Available Import Capability at the Branch Group (BG)}}{\text{Sum of eligible portions of the applicable RA contract}} \times \text{LSE's eligible RA Contract amount} = \text{Assigned MW}$$

$$\frac{2311.01}{(1700 + 1500)} \times 1700 = 1227.72$$

$$\frac{2311.01}{(1500 + 1700)} \times 1500 = 1083.29$$

Remember: If you have an RA Contract, CAISO will give you preference on priority.

Review Scenario: Multiple LSEs/SCs request for the same intertie branch group (BG).

Intertie (BG) = PALOVRDE_ITC

Unassigned Import Capability = 2311.01

Requestor ID	Requestor Priority based on submission	Requested MW	RA Contract	RA Contracted MW	Requestor priority considering RA Contract	Assigned MW	Status	Results
LSE 1	1	2300	No		3	0	Rejected	Submission was rejected as no Unassigned Import Capability is left.
LSE 2	2	1700	Yes	1700	1	1227.72	Partially Assigned	Assigned MWs based on LSE proportion formula as the total requested contracted MW exceeds Unassigned Import Capability.
LSE 3	3	1500	Yes	1500	2	1083.29	Partially Assigned	Assigned MWs based on LSE proportion formula as the total requested contracted MW exceeds Unassigned Import Capability.

Show 50 entries | Save | Download Screen Results | Download All Results

Users may submit values up to the **Total Import Capability**. If a bi-lateral trade reduces the Total Import Capability to be less than the Reserved Capability value, the system shall reduce the Reserved Capability to be equal to the Total Import Capability. After the RA showing is loaded, the system will update the Reserved Capability quantity to the greater of its current value or the Import capability used by RA.

Questions

Market Simulation

READINESS ACTIVITIES

Market Simulation Timeline

- Register for Market Sim by email MarketSim@caiso.com.
 - Registration started **July 31, 2023** (You can still register)
 - Run the scenarios
 - Validate expected market sim scenario outcomes
- Market Simulation Forums start on **August 10, 2023**
 - View the [CAISO public calendar](#) for full schedule
- MIC Market Sim starts on **August 17, 2023**

Market Sim Scenarios - Facilitate submission and retrieval of Import Capability reports

1. Submit request for unassigned import capability as part of step 13 of the import allocation process for 2023 & 2024 RA years
2. Upload trades and RA showing for 2023
3. Update contact information for 2023
4. Update the reserve versus tradeable capability for 2023
5. Validate two new OASIS reports for 2023
 - OASIS > Resource Adequacy > Available Import Capability
 - OASIS > Resource Adequacy > Import Capability used in RA Plan Data

MIC Enhancement [Fall 2023 Release Plans](#) and [Market Sim Scenarios](#)

Market Sim Scenario – Expected Outcome

Participants to verify:

1. Submission of Step 13 request for Unassigned import capability
2. Daily available import capability
3. Annual available import capability
4. Monthly import capability in RA plan
5. Annual import capability in RA plan
6. OASIS reports:
 - OASIS > Resource Adequacy > Available Import Capability
 - OASIS > Resource Adequacy > Import Capability Used in RA Plan Data (Monthly & Annually)

Market Simulation Questions?

Market Participant Setup for Market Simulation Activities

Register for Market Simulation participation via the MarketSim@caiso.com mailbox starting today, 08/07/23

Confirm users are provisioned for access to participate

- Coordinate with your UAAs

Attend [Market Simulation Forum](#) to stay informed on timing of activities for this and other **Fall 2023** release initiatives

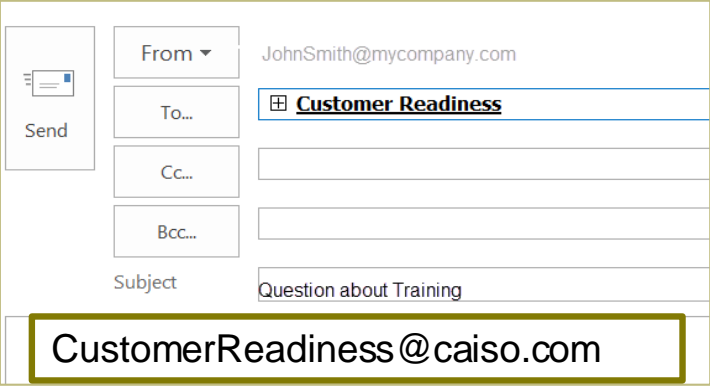

- Monday/Thursday 2pm PPT

Final Questions

Thank you for your participation!

For clarification on anything presented in this training, send an email to: CustomerReadiness@caiso.com

For any other questions or stakeholder specific questions or concerns, please [submit a ticket](#).

REFERENCE MATERIALS

Acronyms

Abbreviation	Terms
BAA	Balancing Authority Area
BG	Branch Group
CIRA	Customer Interface for Resource Adequacy
CV	Cross Validation
LRA	Local Regulatory Area
LSE	Load Serving Entity
MW	Megawatt
OASIS	Open Access Same-Time System
RA	Resource Adequacy
RIC	Remaining Import Capability
SC	Scheduling Coordinator
SCID	Scheduling Coordinator ID

Impacted Systems

Impacted Systems	Details
<p>Open Access Same-Time Interface System</p> <p>OASIS</p>	<p>Two new reports to the UI:</p> <ul style="list-style-type: none"> - Available Import Capability - Import Capability Used in RA Plan <p>New API reports:</p> <ul style="list-style-type: none"> - Available Import Capability Data (AVAIL_IMP_CAP_GRP) - Import Capability used in RA Plan Data (ANNUAL_IMP_CAP_USED_RA_PLAN_GRP and MONTHLY_IMP_CAP_USED_RA_PLAN_GRP)
<p>Customer Interface for Resource Adequacy</p> <p>CIRA</p>	<ul style="list-style-type: none"> • Automatically calculates MIC allocations each day and publishes the allocation data each day on CIRA and OASIS. • Creation of two new fields in relation to "Available MIC for trading" which are "Locked" (new field) or "Unlocked". • SCs can input the LSE contact info and availability for the trade. • Provides aggregate usage by branch group level after validation of each month ahead and year ahead RA showing. • Provides capability to grant "same day priority" to the step 13 unallocated Remaining Import Capability (RIC) for LSEs with existing RA Contracts.

Q1: Is the Contact information for the Import Allocation going to be made public?

Answer: Yes. The contact info is going to be made public OASIS. The information is voluntary but if you want to let other LSEs/SCs know that you are willing to trade some of your import amounts, please update the Contact Information screen so that you can submit the MWs you're willing to trade in the Reserve Import Capability screen.

Q2: Will LSEs and SCs with existing Resource Adequacy (RA) receive same-day priority for RA Year 2025 or 2024? Which RA year will this new process be applied to?

Answer: This new process will be applied to RA year 2025. For RA year 2024, please continue to use the existing submission request process via email.

Q3: Once this enhancement goes live on 11/01/23 , will the Reserved Import Capability screen be available for the 2024 MIC allocations for LSEs/SCs to use to trade their imports in CIRA?

Answer: Yes. Once this enhancement goes live, the ability to trade import capability will be available for RA year 2024. Also, this information will be publicly visible in the new 'Available Import Capability' report in OASIS under the Resource Adequacy tab.

Post Training Q&A (Continued)

New slide

Q4: What does the term 'NOT ASSOCIATED' or 'Other' mean under the Jurisdiction column in the 'Import Capability RA Report Details' screen in CIRA?

Answer: These new terms are used to break down the Resource Adequacy (RA) capacity on the enterprise by Local Regulatory Area (LRA) jurisdictions. They are brokered by two jurisdictions California Public Utility Commission (CPUC) and Non-CPUC. Providing this information allows us to be transparent. Interties that are not aggregated under the CPUC or Non-CPUC jurisdictions, are considered Scheduling Coordinators (SCs) acting on behalf of a supplier. Only LSEs are associated with the CPUC or Non-CPUC jurisdictions.
