**Date Submitted: March 2nd, 2010**

Starwood appreciates the opportunity to provide our brief comments in response to the 2010 Transmission Plan and the stakeholder presentations from February 16, 2010 regarding the 2010 Transmission Plan provided by the Staff of the California Independent System Operator (“CAISO”). Starwood took notice of the CAISO Staff’s stakeholder presentation of the 2010 Plan and its reference to reliability projects submitted in the 2009 Request Window. From this, we understand that the CAISO has taken initial steps to evaluate some of the project submissions in the recent Request Window (RW). To date, the CAISO has not posted the validated or accepted list of projects from the 2009 RW nor indicated what projects will move forward through the 2011 Transmission Planning process. Starwood realizes that it may be premature to reveal these projects, however, we would very much like to know the status and/or the CAISO’S plans and schedules for notifying the stakeholder community of the 2009 RW results and identifying projects that are to be considered for the 2011 TPP.

Starwood appreciates opportunities to communicate our thoughts to CAISO and very much look forward to seeing the CAISO’s plans and working with the CAISO in moving quality and beneficial projects forward.
