Draft 2010 ISO Transmission Plan

- Request ISO confirm the modeling of the Blythe I generator representation for 2010 (either connected as presently to WAPA system or a gen tie to SCE's J.Hinds bus). Then verify the proper representation in the contingency files and restudy the contingencies if misrepresented and provide results if any overloads.

General Comments for both Plans:

- MWD understands that economic planning studies may be removed from the reliability focused 2010 and 2011 ISO Transmission Plans and be part of the RETTP instead. MWD requests ISO provide more transparency on the economic planning studies and opportunities to provide input or comments to determine what impacts they may have on MWD's system.
