
Eduardo Prieto Garcia

**Director of Network Studies
Department,
RED Electrica de Espana**

Eduardo Prieto García is since 2007 the head of the Network Studies Department in Red Eléctrica de España (Spanish TSO). His activities are related to grid access, network planning, renewable penetration and system transient stability studies. Previously, he has occupied different positions in the National Electrical Control Center (CECOEL) where he was actively involved in the development and commissioning of the Control Center for Renewable Energies (CECRE). Before joining Red Eléctrica in 2002, he worked for different utilities in the engineering and maintenance areas.

He received a Master's degree in Industrial Engineering by the Universidad Politécnica de Madrid (Spain) in 1999.
