 California ISO	Operating Procedure	Procedure No. 5330D
		Version No. 6.1
		Effective Date 12/11/23
Request for Testing Spinning and Non-Spinning Reserve Imports		Distribution Restriction: None

1. Procedure Detail

1.1. Request for Testing Spinning and Non-Spinning Reserve Imports

In accordance with the CAISO Tariff, Protocols and Operating Procedures, _____, as Scheduling Coordinator, and _____, as Host Balancing Authority Operator (as such term is referred to in the CAISO Dynamic Scheduling Protocol), collectively referred to as “Parties,” or individually as “Party,” hereby request the testing of the Parties and the System Resource(s) identified in the table below as a provider of Ancillary Services and associated Energy to the CAISO Balancing Authority subject to the Dynamic Scheduling Protocol. Further, the Parties acknowledge that their ability to import Ancillary Services and associated Energy will be tested in accordance with CAISO Operating Procedure 5330.

With this request for testing, the Parties recognize that the CAISO Tariff, Protocols, and applicable agreements require the Host Balancing Authority Operator to issue dynamic Energy schedules to the CAISO based on the Scheduling Coordinator's self-provided or bid external imports of non-Regulation Ancillary Services from the System Resource(s) at any time during the operating hour.

With this request for testing, the Host Balancing Authority Operator represents and warrants that it has in place the required communication links with the CAISO Balancing Authority, in order to facilitate the delivery of Ancillary Services and associated Energy from the System Resource.

With this request for testing, the Scheduling Coordinator represents and warrants that it has made the appropriate arrangements for, and has put in place, the equipment and services necessary for the delivery of Ancillary Services and associated Energy from the System Resource to the point of Interchange ("Scheduling Point") with the CAISO Balancing Authority in accordance with the Dynamic Scheduling Protocol.

The Scheduling Coordinator further certifies that any and all dynamic imports of Energy associated with self-provided or bid imports of non-Regulation Ancillary Services will be deliverable over non-interruptible, non-recallable transmission rights, from the source of the associated Energy to the Scheduling Point with the CAISO Balancing Authority.

5				

Subsequent to the initial filing of this request for testing with the CAISO, any prospective changes jointly made by the Parties may be filed with the Scheduling Coordinator's CAISO Client Relations representative, who will acknowledge the receipt of such requested changes and indicate the date on which such changes may be tested and become effective if CAISO testing proves successful. Such changes will be made by the CAISO as soon as practicable, with reasonable efforts made to implement them within sixty (60) days of receipt of the requested changes.

This document ____ (does) ____ (does not) contain requested changes to previously effective certification(s).
