APPENDIX ............................................................................................................................... 20
Purpose

This operating procedure describes roles, responsibilities, and actions for conducting performance audits and unannounced compliance testing as defined in Sections 8.9 and 34.18.1 of the CAISO Tariff:

Section 8.9:

“Availability of contracted and Self-Provided Ancillary Services shall be verified by the ISO by unannounced testing of resources, by auditing of response to ISO Dispatch Instructions, and by analysis of appropriate Meter Data, or Interchange Schedules.”

Notes:

If a resource that offers Spin, Non-Spin, or Regulation fails a performance audit or an unannounced compliance test:

- The ISO will issue a warning notice to the Scheduling Coordinator for the resource and the resource owner (see Tariff Section 8.9.16.1).
- On receipt of a warning notice, the resource owner, through its Scheduling Coordinator, may request the ISO to test the capability of the resource (see Tariff Section 8.9.16.2).
- A warning shall remain in effect until the resource 1) passes a capacity test requested by the respective Scheduling Coordinator, 2) passes an unannounced compliance test administered by the ISO, or 3) six months have elapsed since the notification was issued. Note that a subsequent, fully compliant response to an ISO dispatch instruction will not be considered a successful capacity or compliance test, and any warning(s) will remain in effect until resolved as described above (see Tariff Section 8.9.16.3).
- A resource that fails a second performance audit or unannounced compliance test during the period in which a warning is in effect will be disqualified immediately from providing Ancillary Services until the resource successfully completes the approval and certification process (see Tariff Section 8.9.16.4).
- The ISO may suspend the technical eligibility certificate of a Scheduling Coordinator for a resource that repeatedly fails to perform (see Tariff Section 8.9).

A resource that fails an availability (unannounced compliance) test will be considered unavailable to provide the Ancillary Service concerned for the entire period the resource was committed to provide the service. The Scheduling Coordinator for a resource that fails an availability test shall not be entitled to a payment for the Ancillary Service concerned for the committed period and adjustments to reflect this shall be made in the calculation of payments to the Scheduling Coordinator (see Tariff Section 8.10.7).
Section 34.22

“The CAISO may issue one (1) unannounced Exceptional Dispatch Instruction per year to each Reliability Demand Response Resource pursuant to Section 34.11.2 in order to test the availability and performance of the Reliability Demand Response Resource.”

Notes:
- The Demand Response Provider (DRP) representing the Reliability Demand Response Resource may also test its Reliability Demand Response Resources in coordination with the ISO.
- Any Demand Response Provider initiated testing will not trigger any ISO settlement.
- When testing is initiated by the Demand Response Provider, the DRP shall submit their self-test results to the ISO as well as the LRA.
- When testing is initiated by the ISO, the ISO will share the results of those tests of the Reliability Demand Response Resource with the applicable Local Regulatory Authority.
- All tests of the Reliability Demand Response Resource shall count toward its RDRR Availability Limit.
- If, prior to the performance of an ISO unannounced yearly test, the Reliability Demand Response Resource provides Demand Response Services in that year, its provision of Demand Response Services will eliminate the need for that year’s test.

1. Responsibilities

<table>
<thead>
<tr>
<th>ISO Resource Test Administrator</th>
<th>Conduct performance audits of resources’ response during contingency dispatches for ancillary services.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Monitor unannounced performance and compliance testing.</td>
</tr>
<tr>
<td></td>
<td>Evaluate performance and compliance test results and send results to the respective SC and resource owner.</td>
</tr>
<tr>
<td></td>
<td>As needed, send warning and de-certification notices to the respective SC and resource owner.</td>
</tr>
<tr>
<td></td>
<td>Initiate decertification process for non-compliant resources.</td>
</tr>
</tbody>
</table>

| ISO Generation Desk            | Conduct compliance testing for a Generator, Dynamic, Load, or performance testing of a Reliability Demand Response Resource. |
| ISO General Counsel            | Advise regulatory agencies of any RA Resources that fail performance audits or unannounced compliance testing. |
2. Scope/Applicability

2.1. Background

The CAISO Tariff gives the ISO the authority to audit and test resources that Bid or Self-Provide Ancillary Services (AS) or Reliability Demand Response Resources that provide Demand Response Services.

The ISO must assure that resources providing services to the ISO meet the ISO’s technical requirements and that Market Participants are fairly compensated for services provided.

2.2 Scope/ Applicability

This procedure applies to Reliability Demand Response Resources and all resources that Bid or Self-Provide Ancillary Services (AS). For the purposes of this procedure, the term “Test Resource” will refer to any Generating Unit, Participating Load, or System Resource that is subject to performance audits or unannounced compliance testing.

3. Procedure Detail

3.1 Ancillary Service Resources

3.1.1 Testing Criteria

Generating Unit

The performance audit for generation resources verifies a resource’s ability to deliver its Ancillary Service Capacity in 10 minutes. For Generating Units providing Spinning or Non-Spinning Reserve, the ISO will use the resource’s telemetry data to measure performance. Ten minutes after the start of the contingency dispatch, the resource must respond and deliver, at least 90% of the amount of Energy requested in the dispatch.
For Generating Units providing Regulation Up and Regulation Down, the resource must reach a point of at least 90% of the highest or lowest set point sent to the resource during the period of an unannounced compliance test. For performance audits, evaluate the unit’s performance monthly. The unit must have at least five (5) qualifying tests in the month for the service where a qualifying test meets these criteria: on AGC continuously during the test period, the unit MW output is < the 10% threshold of the unit’s Regulation Range for Regulation Up or > the 90% threshold for Regulation Down, and the MW set point ramps from <=7% of the unit’s Regulation Range to at least 93% for Regulation Up or from 93% down to at least 7% for Regulation Down. The test ends and the unit passes the qualifying test if its MW output reaches at least 90% of the Regulation Range for Regulation Up or exceeds the set point threshold of 93% or 7% respectively. The fails the performance audit if it cannot reach the 90% or 10% MW output threshold during the qualifying test period. A resource must pass at least 90% of the qualifying tests in a month for the service to be considered as having passed the performance audit.

**Participating Load**

For Participating Loads, telemetry data will be used to audit the performance metric. Participating Loads must show a Load reduction of at least 90% of the amount requested in the contingency dispatch within 10 minutes.

**System Resource**

A system Resource, upon receipt of a contingency dispatch, is audited on its ability to deliver at least 90% of the amount requested within 10 minutes.

### 3.1.1.1 Conduct Performance Audits

Complete the following actions to conduct a performance audit:

<table>
<thead>
<tr>
<th>ISO Resource Test Administrator</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. <strong>Review</strong> the performance results of resources dispatched for Ancillary Services during the past week.</td>
</tr>
<tr>
<td>2. <strong>Evaluate</strong> the performance results according to the performance metrics below for the respective resource type and</td>
</tr>
<tr>
<td>3. <strong>Determine</strong> whether each resource achieved the stated performance metric in 3.1.1 above.</td>
</tr>
<tr>
<td>4. <strong>Document</strong> the performance audit results, including the following information:</td>
</tr>
<tr>
<td>- Trade date, operating hour, and time of Dispatch Instruction.</td>
</tr>
<tr>
<td>- MW or MWh Amount of Dispatch Instruction.</td>
</tr>
<tr>
<td>- Resource output based on telemetry, meter data, or Balancing Authority check-out values.</td>
</tr>
</tbody>
</table>
### ISO Resource Test Administrator

- Performance metric calculation.
- Audit pass or fail.

5. **Email** the performance audit results to the SC and resource owner.
   - For Regulation Performance Audits, only email results of audit passes to entities that are in a Warning Notice period.

6. If the resource failed the performance audit,
   - **Send** a warning notice (See Section 3.1.2.2).

7. If a RA resource failed the performance audit test,
   - **Notify** ISO General Counsel.

8. If the resource failed the performance audit during a period when a warning notice is in effect,
   - Immediately **decertify** the resource (See Section 3.1.2.3).

### 3.1.1.2 Plan and Execute Unannounced Compliance Testing

The ISO periodically verifies the availability and performance of Awarded and Self-Provided Ancillary Services through unannounced compliance testing of resources.

### 3.1.1.2.1 Select and Schedule Resources for Testing

Complete the following actions to select a test resource for unannounced compliance testing:

<table>
<thead>
<tr>
<th>ISO Shift Manager Desk</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.</strong> At any time when system conditions permit:</td>
</tr>
<tr>
<td>- <strong>Refer</strong> to the Unannounced Testing reports sent from ASNotifications.</td>
</tr>
<tr>
<td>- <strong>Select</strong> one or more resources with Day-Ahead AS Capacity Schedules.</td>
</tr>
<tr>
<td>- <strong>Note</strong>: Give priority to those resources with the longest interval between the current date and the date logged as shown in the weekly Performance Verification report sent from ASNotifications.</td>
</tr>
<tr>
<td>- <strong>Schedule</strong> unannounced compliance testing.</td>
</tr>
<tr>
<td><strong>2.</strong> Do one of the following:</td>
</tr>
<tr>
<td>- For non-dynamic intertie resources,</td>
</tr>
<tr>
<td>- <strong>Notify</strong> the ISO Transmission Desk of the planned date and time for unannounced compliance testing.</td>
</tr>
</tbody>
</table>
ISO Shift Manager Desk

- For all other resource types,
  - Notify the ISO Generation Desk of the planned date and time for unannounced compliance testing.

3.1.1.2.2 Conduct Compliance Tests

Complete the following actions to conduct an unannounced compliance test:

ISO Generation Desk, ISO Transmission Desk

1. Verify the test resource meets system conditions.
2. Verify the test resource is not affected by any outages/flow limits that prevent any resource from delivering AS services.
3. Verify the test resource has a Real-Time Ancillary Service Schedule.
4. Verify the telemetry of the test resource is complying with current Dispatch Instructions.
5. Verify that the unit is not on AGC if testing Spin.
   
   **Note:** Resources are not to be removed from regulation control to run an unannounced test.

6. Verify the following if testing Non-Spin.
   - Unit is shut down, Resource Terminal Voltage = 0
   - Main breaker status is OPEN
7. If the conditions specified in Steps 1 - 4 are satisfied:
   - Approve the test resource for dispatch if system condition allows, or
   - Cancel the planned unannounced testing and notify the ISO Shift Manager Desk.
## ISO Generation Desk

1. If the test resource approved for Dispatch, **is a Generator, Dynamic or Load and is for a test of Spin or Non-Spin reserve capability**:

   - **Call** the SC for the resource and inform them that the ISO is initiating an Unannounced AS Compliance Test.
   - **Issue** a verbal AS Test Dispatch to a MW value equal to their bid-in 10-minute ramping capability or the amount of the current AS award.
     
     "This is (state your name) from the California ISO. This is an Unannounced AS Compliance Test and I am initiating a verbal AS Test Dispatch on (Resource ID) for the (SPIN/NSPN) award in the amount of (MW). The test will begin at the conclusion of this phone call. We will contact you by phone to end the test. Please repeat back these instructions".

   - **Record** the Verbal Dispatch Instruction in the market ED tool
     - Using Instruction Type: ASTEST.
   - If the Market Software is unavailable,
     - **Log** the Dispatch Instruction as
       - A Log Type: Generation Desk,
       - Title: EDE Instructions for Generators/Correction-96 Hour and Exceptional Dispatch
       - Using Instruction Type: ASTEST.

   **Note:** Ensure resources are appropriately accounted for in the EMS Reserve Monitor. A manual entry of negative offset may be necessary. The resource will be dispatched for Energy from the Spin or Non-Spin Capacity according to the Ramp Rate and Start-Up time specified in the Energy Bid submitted for that hour.

2. If the test resource approved for Dispatch, **is a Generator, and is a test for AGC (Regulation) reserve capacity**: (The Generator must have been awarded sufficient regulation (by amount and duration) in order to be tested.

   - **Make** a note of the ISO Reg High and ISO Reg Low parameters indicated on the AS Test display.
   - **Determine** whether the Unit has sufficient room to move up or down by comparing the current MW value against the limits:
     - On an EMS Workstation,
       - **Call up** the AGC Generation Summary
   - **Search** for the Generating Unit to be tested in the upper-left part of the Generation Summary display.
   - You can quickly find the Unit by:
     - Using the in-line filter on the Generation Summary display
## ISO Generation Desk

- **Verify** the current AGC status of the Unit as follows:
  - Unit Ctrl Mode Column = AUTO
  - Operating Mode Column = AUTO
- **Click** on the pencil to edit
- Under the User Ctrl Mode column,
  - **Select** “MBP” from the pull-down list.
  - **Enter** desired value in the MBP column, to reflect the target MW value to ramp the Unit either up or down.
    - The MBP target value must be within the boundaries of the Reg Hi and Reg Low limits.
  - After updating User Ctrl Mode and MBP Columns,
    - **Click** the Update button.
  - **Make** a note of the start time of the ramp.
- When the Unit finishes ramping,
  - **Enter** the target MW value in the MBP column to ramp the Unit in the other direction.
    - **Make** a note of the start time of the ramp.
- When the ramping test is completed,
  - **Place** the User Ctrl Mode back to the original setting (i.e. AUTO).
  - **Set** the manually replaced value in the MBP column back to “0”.

## ISO Transmission Desk

1. If the test resource approved for Dispatch, **is a Static Intertie Resource, and is for test of Spin or Non-Spin reserve capability**:
   - **Coordinate** with the ISO Generation Desk to **determine** acceptable time to initiate AS Compliance Test.
   - **Determine** current NSI. This value will change when new test scheduled is implemented.
   - **Call** the SC for the resource **and**
     - **Inform** them that the ISO is initiating an Unannounced AS Compliance Test.

   "This is *(state your name)* from the California ISO. This is an Unannounced AS Compliance Test and I am initiating a verbal AS Test Dispatch on *(Resource ID)* for the *(SPIN/NSPN)* award in the amount of *(MW)* on the *(Tie Point Name)* and for Hour Ending *(HE)*. The test will begin at the conclusion of this phone call. We
ISO Transmission Desk

will contact you by phone if necessary to end the test. Please repeat back these instructions.”

- **Issue** a verbal AS Test Dispatch to a MW value equal to their current AS Award indicated on the E-Tag.
- **Remind** the Scheduling Coordinator that the ISO is expecting the capacity E-Tag to be updated with the corresponding energy MW amount required by the test as soon as possible but no later than ten minutes after the conclusion of the call.
- **Confirm** implementation of E-Tag and verify Interchange transaction scheduler and WIT match and
- **Verify** new NSI to EMS and **only** push to EMS when necessary or after abnormal delay.
- **Record** the verbal Dispatch Instruction in the Market ED tool using Instruction Type: ASTEST.
- If the Market Software is unavailable,
  - **Log** the Dispatch Instruction as
    - A Log Type: Generation Desk,
    - Title: EDE Instructions for Generators/Correction-96 Hour and Exceptional Dispatch
    - Using Instruction Type: ASTEST.

*Note: The resource will be dispatched for Energy from the Spin or Non-Spin Capacity according to the Ramp Rate and Start-Up time specified in the E-Tag.*

Resource Operator

1. **Upon receiving a verbal AS Test Dispatch from an ISO Generation Desk or Transmission Desk,**
   - **Perform** the actions below for the respective resource type (Generating Unit, Participating Load, or System Resource):

   *Note: As per Tariff Section 11.5.6.4, the resource owner will be compensated at the maximum of the applicable FMM or RTD LMP, or the Default Energy Bid Price, whichever is higher. However, the test resource will not set the LMP for any of the time intervals for which the unannounced AS compliance test is in effect.*
Resource Operator

Generating Units (includes Dynamic System Resources)

Generating Unit Dispatched from Spinning Reserve:

1. **Ramp up** to the MW amount of the Dispatch Instruction in accordance with the resource’s Bid for Energy within 10 minutes.
2. **Deliver** Energy, in MWh, in accordance with the start-up time and Ramp Rate in the resource’s Bid for Energy.

Generating Unit Dispatched from Non-Spinning Reserve:

1. **Connect** to the grid and
2. **Ramp** up to the MW amount of the Dispatch Instruction in accordance with the resource’s Bid for Energy within 10-minutes.
3. **Deliver** Energy, in MWh, in accordance with the start-up time and Ramp Rate in the resource’s Bid for Energy.

Participating Load Dispatched from Non-Spinning Reserve

1. **Reduce** Demand to the MW amount of the Dispatch Instruction in accordance with the resource’s Bid for Energy within 10-minutes.
2. **Deliver** reduction in Energy, in MWh, in accordance with the Ramp Rate in the resource’s Bid for Energy.

System Resource Dispatched from Spinning or Non-Spinning Reserve

1. **Affirmatively respond** to the MW amount of the Dispatch Instructions.
2. **Update** the capacity E-Tag (if any) to include energy profile MW amount as soon as possible, but no later than 10-minutes after the end of the call with the ISO System Operator.
3. **Deliver** Energy, in MWh, in accordance with the Ramp Rate in the resource’s Bid for Energy.
ISO Generation Desk, ISO Transmission Desk

1. **Determine** acceptable time to terminate AS Compliance Test. (Transmission Desk to coordinate with Generation Desk)

   The unannounced compliance testing ends by a Verbal Instruction to the Test Resource or continues until the end of the trade hour if Test Resource is on a tie.

   **Note:** Tariff Appendix K requires AS resources to be deliverable for a minimum of 30 minutes from the time the resource reaches its award capacity.

2. **Send** an email to the ISO Shift Manager Desk, the ISO Resource Test Administrator ([ASNotifications@caiso.com](mailto:ASNotifications@caiso.com)) and [isopostprocessgroup@caiso.com](mailto:isopostprocessgroup@caiso.com)
   - **Stating** that compliance testing for each test resource has been completed.
   - Be sure to **include** detailed notes regarding Start Time hh:mm:ss, End Time hh:mm:ss, Ancillary Service Type, Award MW and Go to MW (Target MW).

### 3.1.2 Results Evaluation

#### 3.1.2.1 Evaluate Test Results

The ISO Resource Test Administrator evaluates and documents the results of the compliance testing, and sends the tests results to the SC and test resource owner.

**ISO Resource Test Administrator**

1. **Evaluate** the test results according to the performance metrics, outlined in Section 3.1.1 for the respective resource type and service, and
2. **Determine** whether the resource passed or failed the compliance test.
3. **Document** the test results, including the following information:
   - Trade date, operating hour, and time of unannounced AS test Dispatch Instruction.
   - MW or MWh Amount of Dispatch Instruction.
   - Resource output based on telemetry, meter data, or Balancing Authority check-out values.
   - Performance metric calculation.
   - Compliance testing passed or failed
4. **Email** the compliance test results to the SC and resource owner.
5. **Update** the Resource Performance Verification Database.
6. If the resource failed the compliance test,
   - **Send** a warning notice (see Section 3.1.2.2).
7. If an RA resource failed the compliance test,
   - **Notify** ISO General Counsel.
8. If the resource failed the compliance test during a period when a warning notice is in effect,
   • **Immediately decertify** the resource (see Section 3.1.2.3).

### 3.1.2.2 Send Warning Notice

Take the following actions if a Spin, Non-Spin or Regulation capacity resource fails a performance audit or an unannounced compliance test.

**ISO Resource Test Administrator**

**Warning Notice:**

1. Upon failing a performance audit or unannounced compliance test,
   • **Send** a warning notice to the resource owner/operator, the Scheduling Coordinator for the resource, and the Scheduling Coordinator’s ISO Client Representative, along with the performance audit or compliance test results.

   **Note:** The warning notice will remain in effect until: 1) the resource is re-tested for the Ancillary Service by request from the SC or by the ISO as part of unannounced compliance testing or 2) six calendar months have elapsed since the notification was issued. In the Resource Performance Verification Database, enter the date on which the resource was issued a warning notice (this is the date on which a warning is in effect for the resource).

   **Note:** For resources failing a monthly performance audit of either Regulation Up or Regulation Down services, the start of the six month warning period will be the first full month that starts at least 30 days after receipt of the Warning Notice.

### 3.1.2.3 Decertify a Resource

If a Spin, Non-Spin or Regulation capacity resource fails a performance audit or unannounced compliance test during the period when a warning notice for that resource is in effect, the ISO will immediately begin the decertification process.

**ISO Resource Test Administrator**

1. **Send** email to ISO Management stating the resource is subject to immediate decertification (attach relevant resource information from the Resource Performance Verification Database).
2. Upon receiving approval from ISO Management,
   - **Decertify** the resource (**Complete** the remaining actions below).
   - **Send** a letter to the Scheduling Coordinator for the resource, the resource owner/operator, and the Scheduling Coordinator’s ISO Client Representative
     - **Stating** that the ISO has initiated the decertification process for the resource for the affected service, along with the performance audit or compliance test results.
3. In the Resource Performance Verification Database,
   - **Enter** the date on which the resource was issued the letter.
4. **Open** a Change Request,
   - **Requesting** that the AS Service Flag for the resource in Master File be set to “No”.
5. Once Master File has been updated (AS Service Flag = No),
   - **Update** the Resource Performance Verification Database with the date on which the resource was decertified.

### 3.2 Reliability Demand Response Resource (RDRR)

#### 3.2.1 Plan and Execute Unannounced Testing

The ISO periodically verifies the availability and performance of Reliability Demand Response Resources through unannounced testing of resources.

#### 3.2.2 Select and Schedule Resources for Testing

Complete the following actions to select a test resource for unannounced availability and performance testing:

<table>
<thead>
<tr>
<th>ISO Generation Desk</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. At any time when system conditions permit:</td>
</tr>
<tr>
<td>- <strong>Refer</strong> to the Unannounced Testing reports sent from AS Notifications.</td>
</tr>
<tr>
<td>- <strong>Select</strong> one or more resources.</td>
</tr>
<tr>
<td>- <strong>Schedule</strong> unannounced availability and performance testing.</td>
</tr>
</tbody>
</table>
3.2.3 Conduct availability and performance Tests

Complete the following actions to conduct an unannounced availability and performance test:

**ISO Generation Desk**

1. **Verify** the test resource meets system conditions.
2. **Verify** the test resource is not affected by any outages/flow limits that prevent the resource from delivering Demand Response services.
3. If the conditions specified in Steps 1 and 2 are satisfied:
   - **Approve** the test resource for dispatch if system condition allows, or
   - **Cancel** the planned unannounced testing and notify the ISO Shift Manager Desk.
4. If the test resource is approved for Dispatch,
   - **Enter** the RDRR Test Dispatch to their stated demand response MW value using the ED Tool with Instruction Type ‘Test’.
   - **Follow up** with a phone call to the SC for the resource and
     o **Inform** them that the ISO is initiating an Unannounced RDRR availability and performance Test.
     o **Inform** them that the availability and performance test will be for at least the resource minimum run time
       - Or less if system conditions dictate
       - If the SC requests a self-test beyond the minimum run time, instruct the SC to put the resource on an outage for the duration of the self-test.

**Example Communication with SC**

“This is (state your name) from the California ISO. I am informing you that I have initiated an Unannounced RDRR availability and performance Test and have issued an ED for RDRR Test Dispatch on (Resource ID) for the stated demand response value in the amount of (MW) for Hour Ending (HE). The planned duration of the test will be for at least the resource’s minimum run time. We will contact you by phone if necessary to end the test sooner due to system conditions. If you wish to perform a self-test beyond the minimum run time, please place the resource on outage for that self-test. Please repeat back these instructions.”
### Scheduling Coordinator

1. Upon receiving an ADS instruction, perform the actions below:
   - **Reduce** Demand to the MW amount of the Dispatch Instruction within the notification time for that resource.
   - **Sustain** for at least the minimum run time, unless notified verbally by the ISO Generation Desk to end the test sooner.
     - If running a self-test beyond the minimum run time, submit an outage card for the duration of the self-test.

### ISO Generation Desk

1. **Determine** acceptable time to terminate RDRR Performance Test after either the resource minimum run time has elapsed, or less as system conditions dictate.
   - If system conditions require ending the RDRR Performance Test prior to elapse of resource minimum run time, **notify** the Test Resource verbally and **end** the ED instruction in the ED Tool.
2. **Send** an email to the ISO Shift Manager Desk and the ISO Resource Test Administrator (ASNotifications@caiso.com).
   - **Stating** that testing for each test resource has been completed.
   - Be sure to **include** detailed notes regarding Resource ID, Start Time hh:mm:ss, End Time hh:mm:ss, MW value and Go to MW (Target MW).

### 3.2.4 Evaluate and Send Test Results

The ISO Resource Test Administrator evaluates and documents the results of the availability and performance testing upon availability of the information, and sends the tests results to the SC and test resource owner.

### ISO Resource Test Administrator

1. **Determine** the test results.
2. **Document** the test results, including the following information:
   - Trade date, operating hour, and time of unannounced test.
   - Dispatch Instruction.
   - MW or MWh Amount of Dispatch Instruction.
   - Resource output based on meter data.
3. **Email** the test results to the SC and LRA.
4. **Update** the Resource Performance Verification Database.

**Note:** If the DRP conducts their own test, the DRP shall submit their self-test results to the ISO at ASNotifications@caiso.com as well as their LRA.
4. Supporting Information

| 7.0     | Periodic Review:  
Purpose: Added Section 34.18.1 CAISO Tariff reference regarding RDRR.  
Responsibilities: Updated ISO Resource Test Administrator, ISO Generation Desk and ISO Shift Manager Desk to include "Performance" testing.  
Section 2: Updated to include RDRR.  
Added 3.1 Ancillary Service Resources section title and renumbered following subsections.  
Added main Section 3.1 for Ancillary Service Resources title.  
Created Section 3.1.1 Testing Criteria to include all criteria that was originally under Section 3.1 Conduct Performance Audits and Step 3 for ISO Resource Test Administrator.  
Section 3.1.1.2.2: Added Step 5.  
Added Section 3.1.2 Results Evaluation title.  
Section 3.1.2.2: Added second note.  
Added 3.2 Reliability Demand Response (RDRR) section and all sub-sections within, including verbiage for operator phone calls to SC.  
Changed ‘Compliance’ to ‘Availability and Performance’ in all RDRR references.  
Definitions: Added Unannounced Availability and Performance Test and Reliability Demand Response Resource.  
Minor grammar and format changes throughout. | 3/11/2020 |
| 7.1     | Removed instances of RUC and RUC Capacity throughout.  
Purpose Section: Removed RUC Availability Payment, updated Tariff Section references, and updated remaining CAISO to ISO except when relating directly to the CAISO Tariff.  
Section 3.2, changed the test duration to ‘resource minimum run time’. Any longer test requested by SC is considered a self-test, and instructs SC to put resource on outage for self-test duration.  
Section 3.2.3: Updated ISO Generation Desk and Scheduling Coordinator tasks.  
Section 3.2.4: Minor update.  
Section 5: Updated review frequency to every three years. | 5/07/2020 |
| 7.2     | Section 3.1.1.2.2: updated verify process for when units are on AGC. | 10/02/2020 |
5. Periodic Review Procedure

Review Criteria & Incorporation of Changes

There are no specific criteria for reviewing or changing this document, follow instructions in Procedure 5510.

Frequency

At least once every three years.
