NOTICE OF FILING SUITABLE FOR PUBLICATION IN THE FEDERAL REGISTER

UNITED STATES OF AMERICA BEFORE THE FEDERAL ENERGY REGULATORY COMMISSION

| California Independent System Operator Corporation |) | Docket No. ER00 | |
|--|---------|-----------------|--|
| Notic | e of Ta | riff Change | |
| ı | | 1 | |

Take notice that on January 28, 2000, the California Independent System Operator Corporation (ISO) tendered for filing a proposed amendment (Amendment No. 26) to the ISO Tariff. Amendment No. 26 modifies procedures governing the notice provided by the ISO to Scheduling Coordinators that a specific Reliability Must-Run ("RMR") Unit will be required to provide Energy for reliability purposes during the next day. The ISO states that the amendment is intended to eliminate market distortions and operational problems that are caused by the current timing of notices. The amendment also includes modifications of the requirements for scheduling RMR units and of the procedures for the selection of payment options for the Energy provided that the ISO states are necessary to achieve the intended purpose of the modification in timing.

The ISO states that this filing has been served upon the Public Utilities Commission of California, the California Energy Commission, the California Electricity Oversight Board, the owners of RMR Units, and all parties with effective Scheduling Coordinator Service Agreements under the ISO Tariff. The ISO also states that the tariff amendments were presented to the owners of RMR Units more than 10 business days before the filing of Amendment No. 26.
