2024 Summer Settlements Release

• 2 Project scope with direct settlement impact

  – Transmission Exchange Agreement Renegotiation (TEA) from Western:
    • *The Transmission Exchange Agreement ("TEA") with WAPA-SNR, PG&E and ISO is scheduled to expire 9/30/2024.* A term of the original agreement executed in 2004, was that the ISO would develop a system that allowed WAPA to sell their unused capacity on their line. This project provides solution to the scheduling issue which needs to be in place by June 2024 to ensure that the ISO has solved the problem and support filing an amendment and extension of the TEA at FERC.

  – Transmission Service and Market Scheduling Priorities Phase 2 (TS+MSP)
    • *This project introduces a design to identify Available Transfer Capability (ATC) that can be allocated to Priority-Wheeling-Through (PWT) across the ISO system.* This project also provides opportunity for external entities to drive transmission upgrades across the ISO system to support a wheeling-through priority.
Non-project scope: tentative

- AS SOC Retro Enhancement
  - Retro-active corrections from TD 07/01/2023 onwards will require corrected AS SOC flags and Settlement to re-process them

- Resolve WEIM Pump Storage issue
  - Resolve issue in which pumped storage resources in the WEIM BAA were being incorrectly designated as generating resources during intervals in which those resources were pumping as loads.

- Assistance Energy Transfer (AET)
  - BASE ETSR resources should be excluded from the AET calculation due to the fact that BASE ETSR transfer is not optimized by the market. Only Dynamic ETSR need to be considered for the AET calculations.

- Change to RT Congestion Pre-Calculation guide
  - This fix is to calculate congestion at nodal level before aggregating the congestion to a BAA level for RT Energy Congestion Offset.
• Non-project scope: *tentative*

  – Exclude NGR-REM from RAAIM PC
    *Formula 3.6.12.4 from RAAIM PC BPM needs to exclude Non-Generator Resource-Regulation Energy Management (NGR_REM) to match system implementation with BPM intent.*

  – Stack error on bill determinant name
    *This issue is related to stack error on the bill determinant name: RSRC_DAILY_ACQUIRED_RIGHTS_FLAG that is creating a duplicate record.*
