CALIFORNIA INDEPENDENT SYSTEM OPERATOR CORPORATION	
FERC ELECTRIC TARIFF ORIGINAL VOLUME NO. I	Original Sheet No. 289
ONIGINAL VOLUME INC. I	Original Officet No. 209
ISO TARIFF APPENDIX A	
Master Definitions Supplement	

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

### **Master Definitions Supplement**

Access Charge A charge paid by all Market Participants withdrawing Energy

from the ISO Controlled Grid, as set forth in Section 7.1. The

Access Charge will recover that portion of the Participating TO's

Transmission Revenue Requirement not recovered through

Transmission Revenue Credits.

Active Zone The Zones so identified in Appendix I to the ISO Tariff.

Actual Imbalance A deviation between scheduled Generation and metered

Generation at each UDC/ISO Controlled Grid boundary or at

each Participating Generator's delivery point or a deviation

between scheduled Load and metered Load at each UDC/ISO

Controlled Grid boundary or ISO Control Area boundary.

Adjustment Bid A bid in the form of a curve defined by (i) the minimum MW

output to which a Scheduling Coordinator will permit a

resource (Generating Unit or Dispatchable Load) to be

redispatched by the ISO; (ii) the maximum

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: September 27, 1999 Effective: Upon notice after November 26, 1999

MW output to which a Scheduling Coordinator will permit the resource to be redispatched by the ISO; (iii) up to a specified number of MW values in between; (iv) a preferred MW operating point; and (v) for the ranges between each of the MW values greater than the preferred operating point, corresponding prices (in \$/MWh) for which the Scheduling Coordinator is willing to increase the output of the resource and sell Energy from that resource to the ISO (or, in the case of a Dispatchable Load, decrease the Demand); and (vi) for the ranges between each of the MW values less than the preferred operating point, corresponding prices (in \$/MWh) for which the Scheduling Coordinator is willing to decrease the output of the resource and purchase Energy from the ISO at the resource's location (or, in the case of a Dispatchable Load, increase the Demand). This data for an Adjustment Bid must result in a monotonically increasing curve.

**Administrative Price** 

The price set by the ISO in place of a Market Clearing Price when, by reason of a System Emergency, the ISO determines that it no longer has the ability to maintain reliable operation of the ISO Controlled Grid relying

Issued by: N. Beth Emery, General Counsel and Vice President
Issued on: June 1, 1998 Effective: March 31,1998

solely on the economic Dispatch of Generation. This price will remain in effect until the ISO considers that the System Emergency has been contained and corrected.

An entity, company or person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with the subject entity, company, or person.

Generation equipment that automatically responds to signals from the ISO's EMS control in real time to control the power output of electric generators within a prescribed area in response to a change in system frequency, tieline loading, or the relation of these to each other, so as to maintain the

target system frequency and/or the established interchange

with other areas within the predetermined limits.

Aggregate Final Accepted Schedules

**AGC (Automatic Generation** 

<u>Affiliate</u>

Control)

ISO approved aggregated Final Schedules.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: September 27, 1999 Effective: November 26, 1999

First Revised Sheet No. 292-A Replacing Original Sheet No. 292-A

### **Alert Notice**

A Notice issued by the ISO when the operating requirements of the ISO Controlled Grid are marginal because of Demand exceeding forecast, loss of major Generation, or loss of transmission capacity that has curtailed imports into the ISO Control Area, or if the Hour-Ahead Market is short on scheduled Energy and Ancillary Services for the ISO Control Area.

#### **Ancillary Services**

Regulation, Spinning Reserve, Non-Spinning Reserve,
Replacement Reserve, Voltage Support and Black Start
together with such other interconnected operation services
as the ISO may develop in cooperation with Market
Participants to support the transmission of Energy from
Generation resources to Loads while maintaining reliable
operation of the ISO Controlled Grid in accordance with
Good Utility Practice.

#### **Ancillary Service Provider**

A Participating Generator or an owner of Load who is

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

eligible to provide an Ancillary Serviced.

Local Reliability Criteria as amended from time to time,

including any requirements of the NRC.

Applicants Pacific Gas and Electric Company, San Diego Gas &

Electric Company, and Southern California Edison Company

and any others as applicable.

Approved Credit Rating (a) A short-term taxable commercial paper debt rating of

not less than any one of the following: (i) A1 by Standard

and Poor's Corporation; (ii) D1 by Duff & Phelps Credit

Rating Agency; (iii) F1 by Fitch IBCA Incorporated; or (iv)

P1 by Moody's Investors Service.

(b) A short-term tax exempt commercial paper debt rating

of not less than any one of the following: (I) A1 by Standard

and Poor's Corporation; (ii) V1 by Fitch IBCA Incorporated;

or (iii) VMIG1 by Moody's Investors Service.

(c) A federal agency shall be deemed to have an Approved

Credit Rating if its financial obligations under

the ISO Tariff are backed by the full faith and credit of the United States.

- (d) A California state agency shall be deemed to have an Approved Credit Rating if its financial obligations under the ISO Tariff are backed by the full faith and credit of the State of California.
- (e) Another credit rating approved by the ISO Board of Governors.

### **Approved Load Profile**

Local Regulatory Authority approved Load profiles applied to cumulative End-Use Meter Data in order to allocate consumption of Energy to Settlement Periods.

# Approved Maintenance Outage

A Maintenance Outage which has been approved by the ISO through the ISO Outage Coordination Office.

### **Availability Measure**

An indication for measuring the performance of

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: July 15, 1998 Effective: March 31, 1998

Transmission Owners in maintaining the reliability and availability

of the Transmission Owner's transmission system.

<u>Available Transfer Capacity</u> For a given transmission path, the capacity rating in MW of the

path established consistent with ISO and WSCC transmission

capacity rating guidelines, less any reserved uses applicable to

the path.

Balanced Schedule A Schedule shall be deemed balanced when Generation,

adjusted for Transmission Losses equals forecast Demand with

respect to all entities for which a Scheduling Coordinator

schedules.

Balancing Account An account set up to allow periodic balancing of financial

transactions that, in the normal course of business, do not result

in a zero balance of cash inflows and outflows.

Base Transmission Revenue

**Requirements** 

The Transmission Revenue Requirement adjusted to reflect the

Transmission Revenue Balancing Account Adjustment (TRBAA).

**BEEP Interval** The time period, which may range between five (5) and thirty (30)

minutes, over which the ISO's BEEP Software measures

deviations in Generation and Demand, and selects Ancillary

Service and Supplemental Energy resources to

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

provide balancing Energy in response to such deviations. As of the ISO Operations Date, the BEEP Interval shall be ten (10) minutes. Following a decision, by the ISO Governing Board, the ISO may, by seven (7) days' notice published on the ISO's Home Page, at http://www.caiso.com (or such other internet address as the ISO may publish from time to time), increase or decrease the BEEP Interval within the range of five (5) to thirty (30) minutes.

#### **BEEP Interval Ex Post Prices**

The prices charged to or paid by Scheduling Coordinators for Instructed Imbalance Energy in each Zone in each BEEP Interval. The prices will vary between Zones if Congestion is present. The BEEP Interval Ex Post Price is equal to the bid price of the marginal resource accepted by the ISO for Dispatch and deemed eligible by the ISO to set the price during the BEEP Interval. For each BEEP Interval: the BEEP Interval Ex Post Price for incremental Energy will equal the highest price bid selected by the BEEP software; and the BEEP Interval Ex Post Price for decremental Energy will equal the lowest price bid selected by the BEEP software.

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

Original Sheet No. 294-B

<u>BEEP Software</u> The balancing energy and ex post pricing software which is used

by the ISO to determine which Ancillary Service and

Supplemental Energy resources to Dispatch and to calculate the

Ex Post Prices.

Black Start The procedure by which a Generating Unit self-starts without an

external source of electricity thereby restoring power to the ISO

Controlled Grid following system or local area blackouts.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

Black Start Generator A Participating Generator in its capacity as party to an Interim

Black Start Agreement with the ISO for the provision of Black

Start services, but shall exclude Participating Generators in their

capacity as providers of Black Start services under their

Reliability Must-Run Contracts

Bulk Supply Point A UDC metering point.

Business Day

A day on which banks are open to conduct general banking

business in California.

<u>C.F.R.</u> Code of Federal Regulations.

**Conditional Energy Bids** A Bid for Energy to serve Demand at or below a specified price.

<u>Congestion</u> A condition that occurs when there is insufficient Available

Transfer Capacity to implement all Preferred Schedules

simultaneously or, in real time, to serve all Generation and

Demand. "Congested" shall be construed accordingly.

**Congestion Management** The alleviation of Congestion in accordance with

Applicable ISO Protocols and Good Utility Practice.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

<u>Connected Entity</u> A Participating TO or any party that owns or operates

facilities that are electrically interconnected with the ISO

Controlled Grid.

<u>Constraints</u> Physical and operational limitations on the transfer of

electrical power through transmission facilities.

**Contingency** Disconnection or separation, planned or forced, of one or

more components from an electrical system.

Control Area An electric power system (or combination of electric power

systems) to which a common AGC scheme is applied in

order to: i) match, at all times, the power output of the

Generating Units within the electric power system(s), plus

the Energy purchased from entities outside the electric

power system(s), minus Energy sold to entities outside the

electric power system, with the Demand within the electric

power system(s); ii) maintain scheduled interchange with

other Control Areas, within the limits of Good Utility

Practice; iii) maintain the frequency of the electric power

system(s) within reasonable limits in accordance with Good

Utility Practice; and iv) provide sufficient generating capacity

to maintain operating reserves in accordance with Good

Utility Practice.

<u>Converted Rights</u> Those transmission service rights as defined in Section

2.4.4.2.1 of the ISO Tariff.

Cost Shifting A transfer of costs from one group of customers to another

or from one utility to another.

<u>CPUC</u> The California Public Utilities Commission, or its successor.

<u>Critical Protective System</u> Facilities and sites with protective relay systems and

Remedial Action Schemes that the ISO determines may

have a direct impact on the ability of the ISO to maintain

system security and over which the ISO exercises

Operational Control.

**CTC (Competition Transition** 

Charge)

A non-bypassable charge that is the mechanism that the

California Legislature and the CPUC mandated to permit

recovery of costs stranded as a result of the shift to the new

market structure.

<u>Curtailable Demand</u> Demand from a Participating Load that can be curtailed at

the direction of the ISO in the real time dispatch of the ISO

Controlled Grid. Scheduling Coordinators with Curtailable

Demand may offer it to the ISO to meet Non-spinning or

Replacement Reserve requirements.

<u>Day-Ahead</u> Relating to a Day-Ahead Market or Day-Ahead Schedule.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 17, 1999 Effective: August 16, 1999

Day-Ahead Market	The forward mar	ket for Energy and	Ancillary Services to be
------------------	-----------------	--------------------	--------------------------

supplied during the Settlement Periods of a particular

Trading Day that is conducted by the ISO, the PX and other

Scheduling Coordinators and which closes with the ISO's

acceptance of the Final Day-Ahead Schedule.

Day-Ahead Schedule A Schedule prepared by a Scheduling Coordinator or the ISO

before the beginning of a Trading Day indicating the levels of

Generation and Demand scheduled for each Settlement

Period of that Trading Day.

**Default GMM** Pre calculated GMM based on historical Load and

interchange levels.

<u>Delivery Point</u> The point where a transaction between Scheduling

Coordinators is deemed to take place. It can be either the

Generation input point, a Demand Take-Out Point, or a

transmission bus at some intermediate location.

**Demand** The rate at which Energy is delivered to Loads and

Scheduling Points by Generation, transmission or

distribution facilities. It is the product of voltage and the in-

phase component of alternating current measured in units of

watts or standard multiples thereof, e.g., 1,000W=1kW,

1,000kW=1MW, etc.

# CALIFORNIA INDEPENDENT SYSTEM OPERATOR CORPORATION FERC ELECTRIC TARIFF ORIGINAL VOLUME NO. I

**Demand Bid** A bid into the PX indicating a quantity of Energy that an Eligible Customer wishes to purchase and, if relevant,

Original Sheet No. 298-A

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: September 27, 1999 Effective: Upon notice after November 26, 1999

the maximum price that the customer is prepared to pay for that Energy. This bid will only be accepted in the PX auction process if the Market Clearing Price is at or below the price of the Demand Bid. A Buyer may state, for each hour, a different price preference for each demand quantity in each location, i.e., the maximum price in each hour at which it is prepared to take a specified amount of Energy in the Day-Ahead Schedule. If a bid is submitted without a price, it is assumed that the bidder is prepared to pay the Market-Clearing Price.

#### **Demand Forecast**

### **Demand Market Participant**

## **Dependable Generation**

An estimate of Demand over a designated period of time.

Any Eligible Customer on behalf of whom Demand and

Ancillary Services are scheduled pursuant to the ISO Tariff.

The sum of the maximum amount of generating capacity, in

MW, from Generating Units interconnected with the

Participating TO's transmission or distribution system, that a

Participating TO reasonably believes could be delivered to

serve Load, regardless of ownership of the Generation

capacity or whether a contract exists for the purchase of the

output from the

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

Generator.

**Dependent Participating TO** A Participating TO that is not Self-Sufficient.

**Direct Access Demand** The Demand of Direct Access End-Users.

<u>Direct Access End-User</u>

An Eligible Customer located within the Service Area of a

UDC who purchases Energy and Ancillary Services through

a Scheduling Coordinator.

<u>Direct Access Generation</u>
An Eligible Customer who is selling Energy or Ancillary

Services through a Scheduling Coordinator.

<u>Dispatch</u> The operating control of an integrated electric system to:

i) assign specific Generating Units and other sources of

supply to effect the supply to meet the relevant area Demand

taken as Load rises or falls; ii) control operations and

maintenance of high voltage lines, substations, and

equipment, including administration of safety procedures;

iii) operate interconnections; iv) manage Energy transactions

with other interconnected Control Areas; and v) curtail

Demand.

<u>Dispatchable Loads</u>
Load from a Participating Load which is the subject of an

Adjustment Bid.

<u>Distribution System</u> The distribution assets of a TO or UDC.

EEP (Electrical Emergency

Plan)

A plan to be developed by the ISO in consultation with UDCs

to address situations when Energy reserve.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 17, 1999 Effective: August 16, 1999

# **Effective Price**

The price, applied to undelivered Instructed Imbalance
Energy, calculated by dividing the absolute value of the total
payment or charge for Instructed Imbalance Energy by the
absolute value of the total Instructed Imbalance Energy, for
the Settlement Period; provided that, if both the total
payment or charge and quantity of Instructed Imbalance
Energy for the Settlement Period are negative, the Effective
Price shall be multiplied by -1.0 (minus one).

margins are forecast to be below established levels.

# **Electric Capacity**

The continuous demand-carrying ability for which a

Generating Unit, or other electrical apparatus is rated, either by the user or by the manufacturer.

#### **Eligible Customer**

(i) any utility (including Participating TOs, Market
Participants and any power marketer), Federal power
marketing agency, or any person generating Energy for sale
or resale; Energy sold or produced by such entity may be
Energy produced in the United States, Canada or Mexico;
however, such entity is not eligible for transmission service
that would be prohibited by Section 212(h)(2) of the Federal
Power Act; and (ii) any

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: March 1, 1999 Effective: Upon notice after May 1, 1999

# CALIFORNIA INDEPENDENT SYSTEM OPERATOR CORPORATION FERC ELECTRIC TARIFF ORIGINAL VOLUME NO. I

Original Sheet No. 301-A

retail customer taking unbundled transmission service pursuant to a state retail access program or pursuant to a voluntary offer of unbundled retail transmission service by the Participating TO.

# Eligible Regulatory Must-Take Generation

Regulatory Must-Take Generation which (i) has been approved as Regulatory Must-Take Generation by a Local Regulatory Authority within California, and (ii) is owned or produced by a Participating TO or UDC which has provided direct access to its End-Use Customers and serves load in the ISO Control Area.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: March 1, 1999 Effective: Upon notice after May 1, 1999

Eligible Regulatory Must-Run Generation

n Regulatory Must-Run Generation which (i) has been

approved as Regulatory Must-Run Generation by a Local

Regulatory Authority within California, and (ii) is owned or

produced by a Participating TO or UDC which has provided

direct access to its End-Use Customers and serves load in

the ISO Control Area.

response to a System Emergency.

**EMS (Energy Management** 

System)

A computer control system used by electric utility

dispatchers to monitor the real time performance of the

various elements of an electric system and to control

Generation and transmission facilities.

**Encumbrance** A legal restriction or covenant binding on a Participating TO

that affects the operation of any transmission lines or associated facilities and which the ISO needs to take

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

into account in exercising Operational Control over such transmission lines or associated facilities if the Participating TO is not to risk incurring significant liability. Encumbrances shall include Existing Contracts and may include: (1) other legal restrictions or covenants meeting the definition of Encumbrance and arising under other arrangements entered into before the ISO Operations Date, if any; and (2) legal restrictions or covenants meeting the definition of Encumbrance and arising under a contract or other arrangement entered into after the ISO Operations Date.

## End-Use Customer or End-User

A purchaser of electric power who purchases such power to satisfy a Load directly connected to the ISO Controlled Grid or to a Distribution System and who does not resell the power.

# **End-Use Meter Data**

Meter Data that measures the Energy consumption in respect of End-Users gathered, edited and validated by Scheduling Coordinators and submitted to the ISO in Settlement quality form.

#### **End-Use Meter**

A metering device collecting Meter Data with respect to the Energy consumption of an End-User.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

d l	b	y
	ed	ed by

generation, transmission or distribution facilities, being the

integral with respect to time of the instantaneous power,

measured in units of watt-hours or standard multiples thereof,

e.g., 1,000 Wh=1kWh, 1,000 kWh=1MWh, etc.

**Energy Bid** The price at or above which a Generator has agreed to

produce the next increment of Energy.

Energy Efficiency Services Services that are intended to assist End-Users in achieving

savings in their use of Energy or increased efficiency in their

use of Energy.

**Entitlements** The right of a Participating TO obtained through contract or

other means to use another entity's transmission facilities for

the transmission of Energy.

**Environmental Dispatch** Dispatch designed to meet the requirements of air quality and

other environmental legislation and environmental agencies

having authority or jurisdiction over the ISO.

**Environmental Quality** In relation to Energy, means Energy which involves production

sources that reduce harm to the environment.

**Equipment Clearances** The process by which the ISO grants authorization to

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

anot	her party to	connect or di	isconnect ele	ectric equipment

interconnected to the ISO Controlled Grid.

**Ex Post GMM** GMM that is calculated utilizing the real time Power Flow

Model in accordance with Section 7.4.2.1.2.

**Ex Post Price** The Hourly Ex Post Price or the BEEP Interval Ex Post

Prices.

**Ex Post Transmission Loss** Transmission Loss that is calculated based on Ex Post

GMM.

**Existing Contracts** The contracts which grant transmission service rights in

existence on the ISO Operations Date (including any

contracts entered into pursuant to such contracts) as may be

amended in accordance with their terms or by agreement

between the parties thereto from time to time.

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

**Existing Operating Entity** The entity which owns and operates a MSS (Metered

Subsystem).

**Existing Rights** Those transmission service rights defined in Section 2.4.4.1.1

of the ISO Tariff.

Facilities Study Agreement An agreement between a Participating TO and either a Market

Participant, Project Sponsor, or identified principal

beneficiaries pursuant to which the Market

Participants, Project Sponsor, and identified principal

beneficiaries agree to reimburse the Participating TO for the

cost of a Facility Study.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: September 27, 1999 Effective: Upon notice after November 26, 1999

Facility Owner An entity owning transmission, Generation, or distribution

facilities connected to the ISO Controlled Grid.

An engineering study conducted by a Participating TO to Facility Study

determine required modifications to the Participating TO's

transmission system, including the cost and scheduled

completion date for such modifications that will be required to

provide needed services.

**Facility Thermal Ratings** For all electric current carrying facilities, all applicable

capacity or electric limits to be observed during normal, short-

term emergencies, and long-term emergency operating

conditions.

**FERC** The Federal Energy Regulatory Commission or its successor.

FIITC (Firm Import Interconnection Transmission Capacity)

The amount of firm transmission capacity in MW associated with transmission facilities owned by a Participating TO or contracted to the Participating TO under an Existing Contract, which allows Generating Units that are not directly interconnected with that Participating TO's transmission or distribution system to deliver Energy to that Participating TO. For each month of the Self-Sufficiency Test Period, FIITC

shall include

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

the maximum amount of requirements and bundled power
sale capacity purchased by the participating TO from the
transmission owner to which it is physically interconnected
during the hour in which the Monthly Peak Load of the
Participating TO occurs.

Final Day-Ahead Schedule The Day-Ahead Schedule which has been approved as

feasible and consistent with all other Schedules by the ISO

based upon the ISO's Day-Ahead Congestion Management

procedures.

Final Hour-Ahead Schedule The Hour-Ahead Schedule of Generation and Demand that

has been approved by the ISO as feasible and consistent with

all other Schedules based on the ISO's Hour-Ahead

Congestion Management procedures.

Final Schedule A Schedule developed by the ISO following receipt of a

Revised Schedule from a Scheduling Coordinator.

<u>Final Settlement Statement</u> The restatement or recalculation of the Preliminary

Settlement Statement by the ISO following the issue of that

Preliminary Settlement Statement.

<u>Flexible Generation</u> Generation that is capable of, and for which the Generator

has agreed to, adjust operating levels in response to real

Third Revised Sheet No. 308

time market price or ISO control signals.

Forced Outage An Outage for which sufficient notice cannot be given to

allow the Outage to be factored into the Day-Ahead Market

or Hour-Ahead Market scheduling processes.

FPA Parts II and III of the Federal Power Act, 16 U.S.C. § 824 et

seq., as they may be amended from time to time.

FTR (Firm Transmission A

Right)

A contractual right, subject to the terms and conditions of the ISO Tariff, that entitles the FTR Holder to receive, for

each hour of the term of the FTR, a portion of the Usage

Charges received by the ISO for transportation of energy

from a specific originating

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

Zone to a specific receiving Zone and, in the event of an uneconomic curtailment to manage Day-Ahead congestion, to a Day-Ahead scheduling priority higher than that of a schedule using Converted Rights capacity that does not

have an FTR.

FTR Bidder An entity that submits a bid in an FTR auction conducted by

the ISO in accordance with Section 9.4 of the ISO Tariff.

**FTR Holder** The owner of an FTR, as registered with the ISO.

FTR Market A transmission path from an originating Zone to a contiguous

receiving Zone for which FTRs are auctioned by the ISO in

accordance with Section 9.4 of the ISO Tariff.

Full Marginal Loss Rate A rate calculated by the ISO for each Generation and

Scheduling Point location to determine the effect on total system Transmission Losses of injecting an increment of Generation at each such location to serve an equivalent

incremental MW of Demand distributed

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 4, 1998 Effective: February 3, 1999

# **Generating Unit**

proportionately throughout the ISO Control Area.

An individual electric generator and its associated plant and apparatus whose electrical output is capable of being separately identified and metered or a Physical Scheduling Plant that, in either case, is:

- (a) located within the ISO Control Area;
- (b) connected to the ISO Controlled Grid, either directly or via interconnected transmission, or distribution facilities; and
- that is capable of producing and delivering net
   Energy (Energy in excess of a generating station's internal power requirements).

#### Generation

Energy delivered from a Generating Unit.

# Generation Dispatch Constraints

Details of any mandatory Generating Unit commitment requirements (e.g., Must-Run Generation) or dispatch limits (minimum output or maximum output) that must be observed due to system operating constraints (e.g., thermal, voltage, or stability limits). These limits are in addition to limits that may be specified by Generators in their Energy or Ancillary Service bids to the ISO or PX.

### **Generation Scheduling**

The ISO's planned hourly pattern of Generation.

**Generator** 

The seller of Energy or Ancillary Services produced by a

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

Generating Unit.

**GMM (Generation Meter Multiplier)** 

A number which when multiplied by a Generating Unit's Metered Quantity will give the total Demand to be served from that Generating Unit.

**Good Utility Practice** 

Any of the practices, methods, and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods, and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety, and expedition. Good Utility Practice is not intended to be any one of a number of the optimum practices, methods, or acts to the exclusion of all others, but rather to be acceptable practices, methods, or acts generally accepted in the region.

**Grid Management Charge** 

The ISO monthly charge on all Scheduling Coordinators that is intended to recover the ISO's startup and development costs and the costs associated with the ongoing operation and maintenance, including financing costs, of the ISO Controlled Grid which shall be

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

calculated as set o	ut in Section	8 of the	ISO Tariff.
---------------------	---------------	----------	-------------

Grid Operations Charge An ISO charge that recovers redispatch costs incurred due to Intra-

Zonal Congestion in each Zone. These charges will be paid to the ISO

by the Scheduling Coordinators, in proportion to their metered Demand

within, and metered exports from, the Zone to a neighboring Control

Area.

Hour-Ahead Market or an Hour-Ahead Schedule.

Hour-Ahead Market The forward market for Energy and Ancillary Services to be supplied

during a particular Settlement Period that is conducted by the ISO, the

PX and other Scheduling Coordinators which opens after the ISO's

acceptance of the Final Day-Ahead Schedule for the Trading Day in

which the Settlement Period falls and closes with the ISO's

acceptance of the Final Hour-Ahead Schedule.

Hour-Ahead Schedule A Schedule prepared by a Scheduling Coordinator or the ISO before

the beginning of a Settlement Period indicating the changes to the

levels of Generation and Demand scheduled for that Settlement Period

from that shown in the Final Day-Ahead Schedule.

Hourly Ex Post Price The price charged or paid to Scheduling Coordinators

Responsible for Participating Generators and

Participating Buyers for Imbalance Energy in each Zone. The price will vary between Zones if Congestion is present. The Hourly Ex Post Price is the Energy weighted average of the BEEP Interval Ex Post Prices in each Zone during each Settlement Period.

#### **Hydro Spill Generation**

Hydro-electric Generation in existence prior to the ISO

Operations Date that: i) has no storage capacity and that, if
backed down, would spill; ii) has exceeded its storage
capacity and is spilling even though the generators are at full
output, or iii) has inadequate storage capacity to prevent loss
of hydro-electric Energy either immediately or during the
forecast period, if hydro-electric Generation is reduced; iv) has
increased regulated water output to avoid an impending spill.
An identification number assigned to each Scheduling

#### **Identification Code**

Coordinator by the ISO.

#### Imbalance Energy

Imbalance Energy is Energy from Regulation, Spinning and Non-spinning Reserves, or Replacement Reserve, or Energy from other Generating Units, System Units, System Resources, or Loads that are able to respond to the ISO's request for more or less Energy.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

In-Kind Self Provision:

A Scheduling Coordinator's provision of any portion of its

Ancillary Services allocation to the ISO from specified

individual resources.

Inactive Zone All Zones which the ISO Governing Board has determined do

not have a workably competitive Generation market and as

set out in Appendix I to the ISO Tariff.

Incremental Change The change in dollar value of a specific charge type from the

Preliminary Settlement Statement to the Final Settlement

Statement including any new charge types or Trading Day

charges appearing for the first time on the Final Settlement

Statement.

<u>Instructed Imbalance Energy</u> The real time change in Generation output or Demand (from

dispatchable Generating Units, System Units, System

Resources or Loads) which is instructed by the ISO to ensure

that reliability of the ISO Control Area is maintained in

accordance with Applicable Reliability Criteria. Sources of

Imbalance Energy include Spinning and Non-Spinning

Reserves, Replacement Reserve, and Energy from other

dispatchable Generating Units, System Units, System

Resources or Loads that are able

Coordinator Trades

Energy transactions between Scheduling Coordinators.

<u>Inter-Zonal Congestion</u> Congestion across an Inter-Zonal Interface.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: September 27, 1999 Effective: Upon notice after November 26, 1999

CALIFORNIA INDEPENDENT SYSTEM OPERATOR CORPORATION FERC ELECTRIC TARIFF ORIGINAL VOLUME NO. I

First Revised Sheet No. 314 Replacing Original Sheet No. 314

### **Inter-Zonal Interface**

The (i) group of transmission paths between two adjacent Zones of the ISO Controlled Grid, for which a physical, non-simultaneous transmission capacity rating (the rating of the interface) has been established or will be established prior to the use of the interface for Congestion Management; (ii) the group of transmission paths between an ISO Zone and an adjacent Scheduling Point, for which a physical, non-simultaneous transmission capacity rating (the rating of the interface) has been established or will be established prior to the use of the interface for Congestion Management; or (iii) the group of transmission paths between two adjacent Scheduling Points, where the group of paths has an established transfer capability and established transmission rights.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

### Interconnection

Transmission facilities, other than additions or replacements to existing facilities that: i) connect one system to another system where the facilities emerge from one and only one substation of the two systems and are functionally separate from the ISO Controlled Grid facilities such that the facilities are, or can be, operated and planned as a single facility; or ii) are identified as radial transmission lines pursuant to contract; or iii) produce Generation at a single point on the ISO Controlled Grid; provided that such interconnection does not include facilities that, if not owned by the Participating TO, would result in a reduction in the ISO's Operational Control of the Participating TO's portion of the ISO Controlled Grid.

### **Interconnection Agreement**

A contract between a party requesting interconnection and the Participating TO that owns the transmission facility with which the requesting party wishes to

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

interconnect.

Interest shall be calculated in accordance with the

methodology specified for interest on refunds in the

regulations of FERC at 18 C.F.R. §35.19(a)(2)(iii) (1996).

Interest on delinquent amounts shall be calculated from the

due date of the bill to the date of payment. When payments

are made by mail, bills shall be considered as having been

paid on the date of receipt.

Interruptible Imports Energy sold by a Generator or resource located outside the

ISO Controlled Grid which by contract can be interrupted or

reduced at the discretion of the seller.

<u>Intra-Zonal Congestion</u> Congestion within a Zone.

**IOU** An investor owned electric utility.

ISO (Independent System

Operator)

The California Independent System Operator Corporation, a

state chartered, nonprofit corporation that controls the

transmission facilities of all Participating TOs and dispatches

certain Generating Units and Loads.

ISO Account The ISO Clearing Account, the ISO Reserve Account or such

other trust accounts as the ISO deems necessary or

convenient for the purpose of efficiently implementing

Issued by: N. Beth Emery, General Counsel and Vice President

	the funds transfer system under the ISO Tariff.
ISO ADR Committee	The Committee appointed by the ISO ADR Committee pursuant to
	Article IV, Section 3 of the ISO bylaws to perform functions assigned
	to the ISO ADR Committee in the ADR process in Section 13 of the
	ISO Tariff.
ISO ADR Procedures	The procedures for resolution of disputes or differences set out in
	Section 13 of the ISO Tariff, as amended from time to time.
ISO Audit Committee	A Committee of the ISO Governing Board appointed pursuant to
	Article IV, Section 5 of the ISO bylaws to (I) review the ISO's annual
	independent audit (2) report to the ISO Governing Board on such
	audit, and (3) to monitor compliance with the ISO Code of Conduct.
ISO Authorized Inspector	A person authorized by the ISO to certify, test, inspect and audit
	meters and metering facilities in accordance with the procedures
	established by the ISO pursuant to the ISO Protocols on metering.
ISO Bank	The bank appointed by the ISO from time to time for the purposes of
	operating the Settlement process.
ISO Clearing Account	The account in the name of the ISO with the ISO Bank to which
	payments are required to be transferred for allocation to ISO Creditors
	in accordance with their

Issued by: N. Beth Emery, General Counsel and Vice President

respective	entitlements.
1 CODCCIIVE	CHUICHEILS.

### ISO Code of Conduct

For employees, the code of conduct for officers, employees and substantially full-time consultants and contractors of the ISO as set out in exhibit A to the ISO bylaws; for Governors, the code of conduct for governors of the ISO as set out in exhibit B to the ISO bylaws.

### **ISO Control Area Balancing**

**Function** 

The real time Dispatch of Generation (and Curtailable Demand

), directed by the ISO, to balance with actual Demand during the current operating hour to meet operating reliability criteria.

### **ISO Control Center**

The Control Center established, pursuant to Section 2.3.1.1 of

the ISO Tariff.

### **ISO Controlled Grid**

The system of transmission lines and associated facilities of the Participating TOs that have been placed under the ISO's Operational Control.

### **ISO Creditor**

(i) A Scheduling Coordinator to which amounts are payable pursuant to the terms of the ISO Tariff with respect to the amounts standing to the credit of its account; or amounts owing to it by another Scheduling Coordinator; or (ii) A Participating TO to which amounts are payable

Issued by: N. Beth Emery, General Counsel and Vice President

ORIGINAL VOLUME NO. I

**ISO Governing Board** 

Second Revised Sheet No. 318 Replacing First Revised Sheet No. 318

	Access Charges.
ISO Debtor	A Scheduling Coordinator or a Participating TO that is required to
	make a payment to the ISO under the ISO Tariff.
ISO Default Interest Rate	The rate which is equal to 2% above the average rate of interest
	which the ISO Bank charges to the ISO in respect of its
	borrowings.
ISO Documents	The ISO Tariff, the ISO Protocols, ISO bylaws, and any
	agreement entered into between the ISO and a Scheduling
	Coordinator, a Participating TO or any other Market Participant
	pursuant to the ISO Tariff.

ISO Home Page The ISO internet home page at http://www.caiso.com/iso or such

other internet address as the ISO shall publish from time to time.

The Board of Governors established to govern the affairs of the

pursuant to the terms of the ISO Tariff with respect to Wheeling

ISO Market Any of the markets administered by the ISO under the ISO Tariff,

including, without limitation, Imbalance Energy, Ancillary

Services, and FTRs.

ISO.

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

# CALIFORNIA INDEPENDENT SYSTEM OPERATOR CORPORATION FERC ELECTRIC TARIFF ORIGINAL VOLUME NO. I

**ISO Memorandum Account** The memorandum account established by each California IOU pursuant to California Public Utility Commission Order D. 96-08-038 date August 2, 1996 which records all ISO startup and development costs incurred by that California IOU.

Original Sheet No. 318-A

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

### ISO Metered Entity

- a) any one of the following entities that is directly connected to the ISO Controlled Grid:
- a Generator other than a Generator that sells all of its
   Energy (excluding any Energy consumed by auxiliary load equipment electrically connected to that Generator at the same point) and Ancillary Services to the UDC in whose Service Area it is located;
- ii. an Eligible Customer; or
- iii. an End-User other than an End-User that purchases all of its Energy from the UDC in whose Service Area it is located: and
- (b) any one of the following entities:
- i. a Participating Generator;
- ii. a Participating TO in relation to its Tie Point Meters with other TOs or Control Areas; or
- iii. a Participating Load.

#### **ISO Operations Date**

The date on which the ISO first assumes Operational Control of the ISO Controlled Grid.

## ISO Outage Coordination Office

The office established by the ISO to coordinate Maintenance Outages in accordance with Section 2.3.3 of the ISO Tariff.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 17, 1999 Effective: August 16, 1999

ISO Payments Calendar	A calendar published by the ISO showing the dates on which
	Settlement Statements will be published by the ISO and the
	Payment Dates by which invoices issued under the ISO
	Tariff must be paid.
ISO Protocols	The rules, protocols, procedures and standards attached to
	the ISO Tariff as Appendix L, promulgated by the ISO (as
	amended from time to time) to be complied with by the ISO
	Scheduling Coordinators, Participating TOs and all other
	Market Participants in relation to the operation of the ISO
	Controlled Grid and the participation in the markets for
	Energy and Ancillary Services in accordance with the ISO
	Tariff.
ISO Register	The register of all the transmission lines, associated
	facilities and other necessary components that are at the
	relevant time being subject to the ISO's Operational Control.
ISO Reserve Account	The account established for the purpose of holding cash
	deposits which may be used in or towards clearing the ISO
	Clearing Account.
ISO Security Amount	The level of security provided in accordance with Section
	2.2.3.2 of the ISO Tariff by an SC Applicant who does not

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 1, 1998 Effective: March 31, 1998

have an Approved Credit Rating.

ISO Tariff	The California Independent System Operator Corpo	ora- tion
------------	--	-----------

Operating Agreement and Tariff, dated March 31, 1997, as it

may be modified from time to time.

ISO Grid Operations
Committee

A committee appointed by the ISO Governing Board

pursuant to Article IV, Section 4 of the ISO bylaws to advise

on additions and revisions to its rules and protocols, tariffs,

reliability and operating standards and other technical

matters.

**ISP (Internet Service** 

Provider)

An independent network service organization engaged by the

ISO to establish, implement and operate Wenet.

<u>Literal Self Provision</u> A Scheduling Coordinator's provision of any portion of its

Ancillary Services allocation from a System Unit via a

Metered Subsystem.

Load An end-use device of an End-Use Customer that consumes

power. Load should not be confused with Demand, which is

the measure of power that a Load receives or requires.

**Load Shedding**The systematic reduction of system Demand by temporarily

decreasing the supply of Energy to Loads in response to

transmission system or area capacity shortages, system

instability, or voltage control considerations.

Issued by: N. Beth Emery, General Counsel and Vice President

<u>Local Furnishing Bond</u> Tax-exempt bonds utilized to finance facilities for the local

furnishing of electric energy, as described in section 142(f) of

the Internal Revenue Code, 26 U.S.C. § 142(f).

<u>Local Furnishing</u> Any Tax-Exempt Participating TO that owns facilities

<u>Participating TO</u> financed by Local Furnishing Bonds.

<u>Local Publicly Owned</u> A municipality or municipal corporation operating as a public

**Electric Utilities** utility furnishing electric service, a municipal utility district

furnishing electric service, a public utility district furnishing electric services, an irrigation district furnishing electric

services, or a joint powers authority that includes one or more of these agencies and that owns Generation or

transmission facilities, or furnishes electric services over its

own or its members' electric Distribution System.

<u>Local Regulatory Authority</u> The state or local governmental authority responsible for the

regulation or oversight of a utility.

<u>Local Reliability Criteria</u> Reliability criteria established at the ISO Operations Date,

unique to the transmission systems of each of the

Participating TOs.

<u>Location Code</u>

The code assigned by the ISO to Generation input points,

and Demand Take-Out Points from the ISO Controlled Grid,

and transaction points from trades between Scheduling

Coordinators. This will be the information used by the ISO

Loop Flow

Controlled Grid, and transaction points for trades between Scheduling Coordinators. This will be the information used by the ISO to determine the location of the input, output, and trade points of Energy Schedules. Each Generation input and Demand Take-Out Point will have a designated Location Code identification for use in submitting Energy and Ancillary

Service bids and Schedules.

Energy flow over a transmission system caused by parties

external to that system.

Loss Scale Factor The ratio of expected Transmission Losses to the total

Transmission Losses which would be collected if Full

Marginal Loss Rates were utilized.

Maintenance Outage A period of time during which an Operator takes its facilities

out of service for the purposes of carrying out routine planned

maintenance, or for the purposes of new construction work

or for work on de-energized and live transmission facilities

(e.g., relay maintenance or insulator washing) and

associated equipment.

<u>Marginal Generators</u> Those Generating Units which, in an hour, are the sources of

the last increments of Generation in the Preferred Schedule,

excluding: (i) Must-Run Generation,

(ii) Must-Take Generation, (iii) units scheduled to ramp at
their maximum ramp rate throughout the hour, or (iv) units
operating at minimum operating levels (when less costly
Generation must be backed down).

<u>Marginal Loss Factor</u> The marginal impact of a given Generating Unit's output on

total system Transmission Losses.

<u>Market Clearing Price</u> The price in a market at which supply equals Demand. All

Demand prepared to pay at least this price has been

satisfied and all supply prepared to operate at or below this

price has been purchased.

Market Participant An entity, including a Scheduling Coordinator, who

participates in the Energy marketplace through the buying,

selling, transmission, or distribution of Energy or Ancillary

Services into, out of, or through the ISO Controlled Grid.

Master File A file containing information regarding Generating Units,

Loads and other resources.

Meter Data Energy usage data collected by a metering device or as

Issued by: N. Beth Emery, General Counsel and Vice President

may be otherwise	derived by	v the use	of Approved Load
may be calcimice	4011104 N	,	0. / (pp.0104 =044

Profiles.

Meter Points Locations on the ISO Controlled Grid at which the ISO

requires the collection of Meter Data by a metering device.

Metered Quantities For each Direct Access End-User, the actual metered

amount of MWh and MW; for each Participating Generator the actual metered amounts of MWh, MW, MVAr and

MVArh.

Monthly Peak Load The maximum hourly Demand on a Participating TO's

transmission system for a calendar month, multiplied by the

Operating Reserve Multiplier.

MSS (Metered Subsystem) A system of an Existing Operating Entity as at the ISO

Operations Date which has been operating for a number of

years subsumed within the ISO Controlled Grid and

encompassed by revenue quality meters at each interface

point with the ISO Controlled Grid which is operated in

accordance with Existing Contracts.

Municipal Tax Exempt Debt

An obligation the interest on which is excluded from gross

income for federal tax purposes pursuant to Section 103(a)

of the Internal Revenue Code of 1986 or

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

The corresponding provisions of prior la	aw without regard to
the identity of the holder thereof. Mun	icipal Tax Exempt

Debt does not include Local Furnishing Bonds.

Municipal Tax Exempt TO A Transmission Owner that has issued Municipal Tax

Exempt Debt with respect to any transmission facilities, or rights associated therewith, that it would be required to place

under the ISO's Operational Control pursuant to the

Transmission Control Agreement if it were a Participating

TO.

NERC The North American Electric Reliability Council or its

successor.

Nomogram A set of operating or scheduling rules which are used to

ensure that simultaneous operating limits are respected, in

order to meet NERC and WSCC operating criteria.

Non-Converted Rights Those transmission service rights as defined in Section

2.4.4.2.1 of the ISO Tariff.

**Non-ISO Transmission** 

**Facilities** 

Transmission facilities, either inside or outside the State of

California, over which the ISO does not exert Operational

Control.

**Non-Participating Generator** A Generator that is not a Participating Generator.

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

Non-Participating TO A TO that is not a party to the TCA or for the purposes of

Sections 2.4.3 and 2.4.4 of the ISO Tariff the holder of

transmission service rights under an Existing Contract that

is not a Participating TO.

Non-PX Generation Generation that is scheduled by a Scheduling Coordinator,

other than the PX, and that supplies Loads through the use

of transmission or distribution facilities owned by

Participating TOs.

Non-PX Load Load that is scheduled by a Scheduling Coordinator, other

than the PX, and which is supplied through the use of

transmission or distribution facilities owned by Participating

TOs.

Non-Self-Sufficient Contract

Demand

The sum of the amounts in MW for each month of the Self-

Sufficiency Test Period by which that Dependent

Participating TO's Dependable Generation plus its FIITC is

less than its monthly peak hourly Demand divided by 12.

The MW amounts for those months in which that Dependent

Participating TO's Dependable Generation plus its FIITC

exceeds its monthly peak Demand shall not be considered

in the calculation of Non-Self Sufficient Contract Demand.

Non-Spinning Reserve

The portion of off-line generating capacity that is

Issued by: N. Beth Emery, General Counsel and Vice President

capable of being synchronized and ramping to a specified load in ten minutes (or load that is capable of being interrupted in ten minutes) and that is capable of running (or

being interrupted) for at least two hours.

NRC The Nuclear Regulatory Commission or its successor.

Operating Procedures Procedures governing the operation of the ISO Controlled

Grid as the ISO may from time to time develop, and/or

procedures that Participating TOs currently employ which

the ISO adopts for use.

Operating Reserve The combination of Spinning and Non-Spinning Reserve

required to meet WSCC and NERC requirements for reliable

operation of the ISO Control Area.

Operating Reserve Multiplier The Operating Reserve Multiplier is initially 1.07 times the

amount of Dependable Generation and FIITC that is not

associated with hydro-electric Generation, plus 1.05 times

the amount of Dependable Generation and FIITC that is

associated with the hydro-electric Generation, divided by

Dependable Generation and FIITC, based on the current

WSCC operating reserve criteria of 7% for thermal generation

and 5% for hydro-electric Generation. If the WSCC changes

the operating reserve criteria or the ISO Governing Board

establishes

Issued by: N. Beth Emery, General Counsel and Vice President

a higher reserve margin for purposes of system reliability and integrity, the Operating Reserve Multiplier shall be changed accordingly.

<u>Operational Control</u> The rights of the ISO under the Transmission Control

Agreement and the ISO Tariff to direct Participating TOs how to operate their transmission lines and facilities and other electric plant affecting the reliability of those lines and facilities for the purpose of affording comparable non-discriminatory transmission access and meeting Applicable Reliability Criteria.

<u>Operator</u> The operator of facilities comprised in the ISO Controlled

Grid or Reliability Must-Run Units.

**OPF (Optimal Power Flow)** A computer optimization program which uses a set of control

variables (which may include active power and/or reactive

power controls) to determine a steady-state operating

condition for the transmission grid for which a set of system

operating constraints (which may include active power and/or

reactive power constraints) are satisfied and an objective

function (e.g. total cost or shift of schedules) is minimized.

Order No. 888 The final rule issued by FERC entitled "Promoting Wholesale

Competition through Open Access Non-

Issued by: N. Beth Emery, General Counsel and Vice President

ORIGINAL VOLUME NO. I	
	discriminatory Transmission Services by Public Utilities; Recovery of Stranded Costs by Public Utilities and Transmitting Utilities," 61 Fed. Reg. 21,540 (May 10, 1996), FERC Stats. & Regs., Regulations Preambles [1991-1996] ¶ 31,036 (1996), Order on Rehearing, Order No. 888-A, 78 FERC ¶ 61,220 (1997), as it may be amended from time to time.
Order No. 889	The final rule issued by FERC entitled "Open Access Same-Time Information System (formerly Real Time Information Networks) and Standards of Conduct," 61 Fed. Reg. 21,737 (May 10, 1996), FERC Stats. & Regs., Regulations Preambles [1991-1996] ¶ 31,035 (1996), Order on Rehearing, Order No. 889-A, 78 FERC ¶ 61,221 (1997), as it may be amended from time to time.
<u>Outage</u>	Disconnection or separation, planned or forced, of one or more elements of an electric system.
<u>Overgeneration</u>	A condition that occurs when total Generation exceeds total Demand in the ISO Control Area.
Participating Buyer	A Direct Access End-User or a wholesale buyer of Energy or Ancillary Services through Scheduling Coordinators.
Participating Load	An entity providing Curtailable Demand, Dispatchable Load, or both, which has undertaken in writing to comply with all applicable provisions of the ISO Tariff, as they may be amended from time to time.
Participating Seller or Participating Generator	A Generator or other seller of Energy or Ancillary

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 17, 1999 Effective: August 16, 1999

**Payment Date** 

Services through a Scheduling Coordinator over the ISO
Controlled Grid, which has undertaken to be bound by the
terms of the ISO Tariff, in the case of a Generator through a
Participating Generator Agreement.

Participating TO A party to the TCA whose application under Section 2.2 of

the TCA has been accepted and who has placed its transmission assets and Entitlements under the ISO's

The date by which invoiced amounts are to be paid under the

Operational Control in accordance with the TCA.

terms of the ISO Tariff.

PBR (Performance-Based Regulated rates based in whole or in part on the

**Ratemaking)** achievement of specified performance objectives.

Physical Scheduling Plant A group of two or more related Generating Units, each of

which is individually capable of producing Energy, but which either by physical necessity or operational design must be operated as if they were a single Generating Unit and any Generating Unit or Units containing related multiple generating components which meet one or more of the following criteria: i) multiple generating components are

related by a common flow of fuel which cannot be interrupted without a substantial loss of efficiency of the combined

output of all components; ii) the Energy production from one

component

necessarily causes Energy production from other components; iii) the operational arrangement of related multiple generating components determines the overall physical efficiency of the combined output of all components; iv) the level of coordination required to schedule individual generating components would cause the ISO to incur scheduling costs far in excess of the benefits of having scheduled such individual components separately; or v) metered output is available only for the combined output of related multiple generating components and separate generating component metering is either impractical or economically inefficient.

## PMS (Power Management System)

The ISO computer control system used to monitor the real time performance of the various elements of the ISO Controlled Grid, control Generation, and perform operational power flow studies.

### Power Flow Model

The computer software used by the ISO to model the voltages, power injections and power flows on the ISO Controlled Grid and determine the expected Transmission Losses and Generation Meter Multipliers.

## Preferred Day-Ahead Schedule

A Scheduling Coordinator's Preferred Schedule for the

Issued by: N. Beth Emery, General Counsel and Vice President

ISO Day-Ahead scheduling process.

Preferred Hour-Ahead Schedule

A Scheduling Coordinator's Preferred Schedule for the ISO

Hour-Ahead scheduling process.

**Preferred Schedule** 

The initial Schedule produced by a Scheduling Coordinator that represents its preferred mix of Generation to meet its Demand. For each Generator, the Schedule will include the quantity of output, details of any Adjustment Bids, and the location of the Generator. For each Load, the Schedule will include the quantity of consumption, details of any Adjustment Bids, and the location of the Load. The Schedule will also specify quantities and location of trades between the Scheduling Coordinator and all other Scheduling Coordinators. The Preferred Schedule will be balanced with respect to Generation, Transmission Losses, Load and trades between Scheduling Coordinators.

<u>Preliminary Settlement</u> Statement The initial statement issued by the ISO of the calculation of the Settlements and allocation of the charges in respect of all Settlement Periods covered by the period to which it relates.

Issued by: N. Beth Emery, General Counsel and Vice President

processors, and telecommunications to accomplish rapid, automated response to unplanned power system events.

Also, details of RAS logic and any special requirements for arming of RAS schemes, or changes in RAS programming, that may be required.

Reactive Power Control Generation or other equipment needed to maintain

acceptable voltage levels on the ISO Controlled Grid and to

meet reactive capacity requirements at points of

interconnection on the ISO Controlled Grid.

Real Time Market The competitive generation market controlled and

coordinated by the ISO for arranging real time Imbalance

Energy.

**Redispatch** The readjustment of scheduled Generation or Demand side

management measures, to relieve Congestion or manage

Energy imbalances.

Registered Data Those items of technical data and operating characteristics

relating to Generation, transmission or distribution facilities

which are identified to the owners of such facilities as being

information, supplied in accordance with ISO Protocols, to

assist the ISO to maintain reliability of the ISO Controlled

Grid and to carry out its functions.

Issued by: N. Beth Emery, General Counsel and Vice President

### Regulation

The service provided either by Generating Units certified by the ISO as equipped and capable of responding to the ISO's direct digital control signals, or by System Resources that have been certified by the ISO as capable of delivering such service to the ISO Control Area, in an upward and downward direction to match, on a real time basis, Demand and resources, consistent with established NERC and WSCC operating criteria. Regulation is used to control the power output of electric generators within a prescribed area in response to a change in system frequency, tieline loading, or the relation of these to each other so as to maintain the target system frequency and/or the established interchange with other areas within the predetermined limits. Regulation includes both the increase of output by a Generating Unit or System Resource ("Regulation Up") and the decrease in output by a Generating Unit or System Resource ("Regulation Down"). Regulation Up and Regulation Down are distinct capacity products, with separately stated requirements and Market Clearing Prices in each Settlement Period.

**Regulation Energy Payment** 

Adjustment

Regulatory Must-Run

Generation

The additional value of regulating Energy.

Hydro Spill Generation and Generation which is required to run by applicable Federal or California laws, regulations, or other governing jurisdictional authority. Such requirements include but are not limited to

## Regulatory Must-Take Generation

authority as it existed on December 20, 1995, or as revised by Federal or California law or Local Regulatory Authority. Those Generation resources identified by CPUC, or a Local Regulatory Authority, the operation of which is not subject to competition. These resources will be scheduled by the relevant Scheduling Coordinator directly with the ISO on a must-take basis. Regulatory Must-Take Generation includes qualifying facility Generating Units as defined by federal law, nuclear units and pre-existing power purchase contracts with minimum energy take requirements.

specified or designated by the jurisdictional regulatory

### Reliability Criteria

Pre-established criteria that are to be followed in order to maintain desired performance of the ISO Controlled Grid under contingency or steady state conditions.

### **Reliability Must-Run Charge**

The sum payable each month by a Responsible Utility to the ISO for the cost of Reliability Must-Run Generation.

### Reliability Must-Run Contract (RMR Contract)

A rate schedule on file at FERC and in effect, or a contract between the ISO and a Generator, giving the ISO the right to call on the Generator to generate Energy or provide Ancillary Services from the Generating Unit as

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: April 7, 1999 Effective: Upon approval of settlement

Reliability Must-Run Generation and when required to ensure the reliability of the ISO Controlled Grid, in return for certain payments.

Generation that the ISO determines is required to be on line to meet Applicable Reliability Criteria requirements. This includes i) Generation constrained on line to meet NERC and WSCC reliability criteria for interconnected systems operation; ii) Generation needed to meet Load demand in constrained areas; and iii) Generation needed to be operated to provide voltage or security support of the ISO or a local

Reliability Must-Run Unit

A Generating Unit which is the subject of a Reliability Must-

Run Contract

area.

**REMnet** 

The Wide Area Network through which the ISO acquires

meter data.

Replacement Reserve

Generating capacity that is dedicated to the ISO, capable of starting up if not already operating, being synchronized to the ISO Controlled Grid, and ramping to a specified Load point within a sixty (60) minute period, the output of which can be continuously maintained for a two hour period. Also, Curtailable Demand that is capable of being curtailed within

sixty minutes and that can remain curtailed for two hours.

Responsible Utility	The utility which is a party to the	TCA in whose Service Area
---------------------	-------------------------------------	---------------------------

the Reliability Must-Run Unit is located or whose Service

Area is contiguous to the Service Area in which a Reliability

Must-Run Unit owned by an entity outside of the ISO

Controlled Grid is located.

**Revenue Requirement** The revenue level required by a utility to cover expenses made

on an investment, while earning a specified rate of return on

the investment.

Revised Schedule A Schedule submitted by a Scheduling Coordinator to the

ISO following receipt of the ISO's Suggested Adjusted

Schedule.

**RMR Owner** The provider of services under a Reliability Must-Run

Contract.

**RTG (Regional Transmission** 

Group)

A voluntary organization approved by FERC and composed of

transmission owners, transmission users, and other entities,

organized to efficiently coordinate the planning, expansion

and use of transmission on a regional and inter-regional

basis.

**SCADA (Supervisory Control** 

and Data Acquisition)

A computer system that allows an electric system operator to

remotely monitor and control elements of an electric system.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: September 27, 1999 Effective: November 26, 1999

# CALIFORNIA INDEPENDENT SYSTEM OPERATOR CORPORATION FERC ELECTRIC TARIFF ORIGINAL VOLUME NO. I

Original Sheet No. 344-A

SC Agreement	An agreement between a Scheduling Coordinator and the ISO
	whereby the Scheduling Coordinator agrees to comply with all
	ISO rules, protocols and instructions, as those rules,
	protocols and instructions may be amended

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: April 7,1999 Effective: Upon approval of settlement

	from time to time.
SC Applicant	An applicant for certification by the ISO as a Scheduling
	Coordinator.
SC Application Form	The form specified by the ISO from time to time in which an
	SC Applicant must apply to the ISO for certification as a
	Scheduling Coordinator.
Scaled Marginal Loss Rate	A factor calculated by the ISO for a given Generator location
	for each hour by multiplying the Full Marginal Loss Rate for
	such Generator location by the Loss Scale Factor for the
	relevant hour.
Schedule	A statement of (i) Demand, including quantity, duration and
	Take-Out Points and (ii) Generation, including quantity,
	duration, location of Generating Unit, and Transmission
	Losses; and (iii) Ancillary Services which will be self provided,
	(if any) submitted by a Scheduling Coordinator to the ISO.
	"Schedule" includes Preferred Schedules, Suggested
	Adjusted Schedules, Final Schedules and Revised
	Schedules.

Issued by: N. Beth Emery, General Counsel and Vice President

**Scheduled Maintenance** 

**Scheduling Coordinator** 

Issued on: June 1, 1998 Effective: March 31, 1998

Maintenance on Participating Generators, TOs and UDC

An entity certified by the ISO for the purposes of

facilities scheduled more than twenty-four hours in advance.

undertaking the functions specified in Section 2.2.6 of the ISO

Tariff.

Scheduling Coordinator
Metered Entity or SC Metered
Entity

means a Generator, Eligible Customer or End-User that is not

an ISO Metered Entity.

Scheduling Point A location at which the ISO Controlled Grid is connected, by

a group of transmission paths for which a physical, non-

simultaneous transmission capacity rating has been

established for Congestion Management, to transmission

facilities that are outside the ISO's Operational Control. A

Scheduling Point typically is physically located at an

"outside" boundary of the ISO Controlled Grid (e.g., at the

point of interconnection between a Control Area utility and the

ISO Controlled Grid). For most practical purposes, a

Scheduling Point can be considered to be a Zone that is

outside the ISO's Controlled Grid.

Security Monitoring The real time assessment of the ISO Controlled Grid that is

conducted to ensure that the system is operating in a secure

state, and in compliance with all Applicable Reliability

Criteria.

Self-Sufficiency or Self-

Sufficient

A Participating TO for which the sum of its Dependable

Generation and its FIITC is greater than or equal to its

Issued by: N. Beth Emery, General Counsel and Vice President

FERC ELECTRIC TARIFF First Revised Sheet No. 347
ORIGINAL VOLUME NO. I Replacing Original Sheet No. 347

Monthly Peak Load.

**Self-Sufficiency Test Period** For the initial Self-Sufficiency determination for a Participating

TO, the Self-Sufficiency Test Period shall be the twelve-month

period ending December 31, 1996. The Self-Sufficiency Test

Period for a Participating TO undergoing a new Self-

Sufficiency determination as a result of the termination or

modification of an Existing Contract as referred in Section

7.1.3.2 of the ISO Tariff shall be the twelve-month period

ending in the month prior to the month that the Existing

Contract was terminated or modified.

Service Area An area in which, as of December 20, 1995, an IOU or a

Local Publicly Owned Electric Utility was obligated to provide

electric service to End-Use Customers.

<u>Set Point</u> Scheduled operating level for each Generating Unit or other

resource scheduled to run in the Hour-Ahead Schedule.

Settlement Process of financial settlement for products and services

purchased and sold undertaken by the ISO under Section 11

of the ISO Tariff. Each Settlement will involve a price and a

quantity.

Issued by: N. Beth Emery, General Counsel and Vice President

FERC ELECTRIC TARIFF First Revised Sheet No. 348
ORIGINAL VOLUME NO. I Replacing Original Sheet No. 348

Settlement Account An Account held at a bank situated in California, designated

by a Scheduling Coordinator or a Participating TO pursuant to

the Scheduling Coordinator's SC Agreement or in the case of

a Participating TO, Section 2.2.1 of the TCA, to which the

ISO shall pay amounts owing to the Scheduling Coordinator

or the Participating TO under the ISO Tariff.

<u>Settlement Period</u> For all ISO transactions the period beginning at the start of

the hour, and ending at the end of the hour. There are twenty-

four Settlement Periods in each Trading Day, with the

exception of a Trading Day in which there is a change to or

from daylight savings time.

**Settlement Quality Meter** 

Data

Meter Data gathered, edited, validated, and stored in a

settlement-ready format, for Settlement and auditing

purposes.

<u>Settlement Statement</u> Either or both of a Preliminary Settlement Statement or Final

Settlement Statement.

Settlement Statement Re-run The re-calculation of a Settlement Statement in accordance

with the provisions of the ISO Tariff including any protocol of

the ISO.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

First Revised Sheet No. 349 Replacing Original Sheet No. 349

#### Severance Fee

The charge or periodic charge assessed to customers to recover the reasonable uneconomic portion of costs associated with Generation-related assets and obligations, nuclear decommissioning, and capitalized Energy efficiency investment programs approved prior to August 15, 1996 and as defined in the California Assembly Bill No. 1890 approved by the Governor on September 23, 1996.

#### **Spinning Reserve**

The portion of unloaded synchronized generating capacity that is immediately responsive to system frequency and that is capable of being loaded in ten minutes, and that is capable of running for at least two hours.

## Suggested Adjusted Schedule

The output of the ISO's initial Congestion Management for each Scheduling Coordinator for the Day-Ahead Market ("Suggested Adjusted Day-Ahead Schedule") or for the Hour-Ahead Market ("Suggested Adjusted Hour-Ahead Schedule"). These Schedules will reflect ISO suggested adjustments to each Scheduling Coordinator's Preferred Schedule to resolve Inter-Zonal Congestion on the ISO Controlled Grid, based on the Adjustment Bids submitted. These schedules will be balanced with respect to Generation, Transmission

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

FERC ELECTRIC TARIFF First Revised Sheet No. 350
ORIGINAL VOLUME NO. I Replacing Original Sheet No. 350

Losses, Load, and trades between Scheduling Coordinators

to resolve Inter-Zonal Congestion.

<u>Supplemental Energy</u> Energy from Generating Units and other resources which have

uncommitted capacity following finalization of the Hour-Ahead

Schedules and for which Scheduling Coordinators have

submitted bids to the ISO at least half an hour before the

commencement of the Settlement Period.

<u>Supply</u> The rate at which Energy is delivered to the ISO Controlled

Grid measured in units of watts or standard multiples thereof,

e.g., 1,000W=1 KW; 1,000 KW = 1MW, etc.

**Supply Market Participant** Any Generator on behalf of whom Generation and Ancillary

Services are scheduled pursuant to the ISO Tariff.

<u>System Emergency</u> Conditions beyond the normal control of the ISO that affect

the ability of the ISO Control Area to function normally

including any abnormal system condition which requires

immediate manual or automatic action to prevent loss of

Load, equipment damage, or tripping of

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: December 11, 1998 Effective: February 9, 1999

Original Sheet No. 351

system elements which might result in cascading outages or to restore system operation to meet the minimum operating reliability criteria.

**System Planning Studies** Reports summarizing studies performed to assess the

adequacy of the ISO Controlled Grid as regards conformance

to Reliability Criteria.

**System Reliability** A measure of an electric system's ability to deliver

uninterrupted service at the proper voltage and frequency.

System Resource A group of resources located outside of the ISO Control Area

capable of providing Energy and/or Ancillary Services to the

ISO Controlled Grid.

<u>System Unit</u> One or more resources within a Metered Subsystem

controlled so as to simulate a single resource with specified

performance characteristics.

<u>Take-Out Point</u> The metering points at which a Scheduling Coordinator

Metered Entity or ISO Metered Entity takes delivery of

Energy.

<u>Tax Exempt Debt</u> Municipal Tax Exempt Debt or Local Furnishing Bonds.

**Tax Exempt Participating TO** A Participating TO that is the beneficiary of outstanding Tax-

Exempt Debt issued to finance any electric facilities, or rights

associated therewith, which are part

Issued by: N. Beth Emery, General Counsel and Vice President

of an integrated system including transmission facilities the
Operational Control of which is transferred to the ISO
pursuant to the TCA.

**TCA (Transmission Control** 

Agreement)

The agreement between the ISO and Participating TOs establishing the terms and conditions under which TOs will become Participating TOs and how the ISO and each Participating TO will discharge their respective duties and responsibilities, as may be modified from time to time.

**Tie Point Meter** A revenue meter, which is capable of providing Settlement

Quality Meter Data, at a Scheduling Point or at a boundary

between UDCs within the ISO Controlled Grid.

**TO (Transmission Owner)** An entity owning transmission facilities or having firm

contractual rights to use transmission facilities.

**TO Tariff** A tariff setting out a Participating TO's rates and charges for

> transmission access to the ISO Controlled Grid and whose other terms and conditions are the same as those contained in the document referred to as the Transmission Owners Tariff approved by FERC as it may be amended from time to time.

**Trading Day** 

The twenty-four hour period beginning at the start of the

Issued by: N. Beth Emery, General Counsel and Vice President

hour ending 0100 and ending at the end of the hour ending 2400 daily, except where there is a change to and from daylight savings time.

**Transfer Schedule** A Schedule for Energy that is delivered from one Scheduling

Coordinator to another. Each Transfer Schedule must originate and terminate completely within the ISO Control Area and may not involve more than two (one sending and

one receiving) Scheduling Coordinators.

**Transition Charge** The charge or periodic charge assessed to customers to

recover the reasonable uneconomic portion of costs

associated with Generation-related assets and obligations, nuclear decommissioning, and capitalized Energy efficiency

investment programs approved prior to August 15, 1996 and

as defined in the California Assembly Bill No. 1890 approved

by the Governor on September 23, 1996.

<u>Transition Period</u> The period of time established by the California Legislature

and CPUC to allow IOUs and Local Publicly Owned Electric

Utilities an opportunity to recover Transition Costs or

Severance Fees.

<u>Transmission Losses</u> Energy that is lost as a natural part of the process of

transmitting Energy from Generation to Load delivered

Issued by: Roger Smith, Senior Regulatory Counsel

Issued on: April 20, 2000 Effective: March 25, 2000

Replacing First Revised Sheet No. 354

at the ISO/UDC boundary or Control Area boundary.

the ISO's rules and protocols.

**Transmission Revenue Credit** 

ORIGINAL VOLUME NO. I

The proceeds received by the Participating TO from the ISO for Wheeling service and Usage Charges, plus the shortfall or surplus resulting from any cost differences between Transmission Losses and Ancillary Service requirements associated with Existing Rights or Non-Converted Rights and

TRBA (Transmission Revenue Balancing Account)

A mechanism to be established by each Participating TO that has transmission customers which will ensure that all Transmission Revenue Credits flow through to its transmission customers.

TRR (Transmission Revenue Requirement)

The TRR is the total annual authorized revenues associated with transmission facilities turned over to the Operational Control of the ISO by a Participating TO that has transmission customers, and for which FERC jurisdictional entities are permitted to include in their Access Charges for recovery from customers, or in the case of non-FERC jurisdiction entities, the equivalent revenue amount authorized by the appropriate jurisdictional regulatory authority.

<u>Trustee</u>	The trustee of the California Independent System Operator
	trust established by order of the California Public Utilities
	Commission on August 2, 1996 Decision No. 96-08-038

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: August 13, 1999 Effective: November 15, 1999

First Revised Sheet No. 355 Replacing Original Sheet No. 355

UDC (Utility Distribution Company)

relating to the Ex Parte Interim Approval of a Loan Guarantee and Trust Mechanism to Fund the Development of an Independent System Operator (ISO) and a Power Exchange (PX) pursuant to Decision 95-12-063 as modified.

An entity that owns a Distribution System for the delivery of Energy to and from the ISO Controlled Grid, and that provides regulated retail electric service to Eligible Customers, as well as regulated procurement service to those End-Use Customers who are not yet eligible for direct access, or who choose not to arrange services through another retailer.

<u>Unaccounted for Energy</u> (UFE)

UFE is the difference in Energy, for each UDC Service Area and Settlement Period, between the net Energy delivered into the UDC Service Area, adjusted for UDC Service Area Transmission Losses (calculated in accordance with Section 7.4.2), and the total metered Demand within the UDC Service Area adjusted for distribution losses using Distribution System loss factors approved by the Local Regulatory Authority. This difference is attributable to meter measurement errors, power flow modeling errors, energy theft, statistical

ORIGINAL VOLUME NO. I Replacing First Revised Sheet No. 356

Load profile errors, and distribution loss deviations.

**Uncontrollable Force** Any act of God, labor disturbance, act of the public enemy,

war, insurrection, riot, fire, storm, flood, earthquake,

explosion, any curtailment, order, regulation or restriction

imposed by governmental, military or lawfully established

civilian authorities or any other cause beyond the reasonable

control of the ISO or Market Participant which could not be

avoided through the exercise of Good Utility Practice.

**Uninstructed Imbalance** The real time change in Generation or Demand other than that

instructed by the ISO or which the ISO Tariff provides will be

paid at the price for Uninstructed Imbalance Energy.

<u>Unit Commitment</u> The process of determining which Generating Units will be

committed (started) to meet Demand and provide Ancillary

Services in the near future (e.g., the next Trading Day).

<u>Usage Charge</u> The amount of money, per 1 kW of scheduled flow, that the

ISO charges a Scheduling Coordinator for use of a specific

congested Inter-Zonal Interface during a given hour.

Issued by: Roger Smith, Senior Regulatory Counsel

**Energy** 

Issued on: April 20, 2000 Effective: March 25, 2000

Original Sheet No. 356-A

<b>Voltage Limits</b>	For all substation busses, the normal and post-contingency
	Voltage Limits (kV). The bandwidth for normal Voltage Limits
	must fall within the bandwidth of the post-contingency Voltage
	Limits. Special voltage limitations for abnormal operating
	conditions such as

heavy or light Demand may be specified.

**Voltage Support** Services provided by Generating Units or other equipment

such as shunt capacitors, static var compensators, or

First Revised Sheet No. 357

synchronous condensers that are required to maintain

established grid voltage criteria. This service is required

under normal or system emergency conditions.

<u>Warning Notice</u> A Notice issued by the ISO when the operating requirements

for the ISO Controlled Grid are not met in the Hour-Ahead

Market, or the quantity of Regulation, Spinning Reserve, Non-

Spinning Reserve, Replacement Reserve and Supplemental

Energy available to the ISO does not satisfy the Applicable

Reliability Criteria.

WEnet (Western Energy

Network)

An electronic network that facilitates communications and

data exchange among the ISO, Market Participants and the

public in relation to the status and operation of the ISO

Controlled Grid.

Wheeling Out or Wheeling Through.

Wheeling Access Charge The charge assessed by the ISO that is paid by a Scheduling

Coordinator for Wheeling. Wheeling Access Charges shall

settlement, information reporting requirements and confidentiality restrictions;

- B. it will abide by, and will perform all of the obligations under the ISO Tariff placed on Scheduling Coordinators in respect of all matters set forth therein including, without limitation, all matters relating to the scheduling of Energy and Ancillary Services on the ISO Controlled Grid, ongoing obligations in respect of scheduling, Settlement, system security policy and procedures to be developed by the ISO from time to time, billing and payments, confidentiality and dispute resolution;
- C. it shall ensure that each UDC, over whose Distribution System Energy or Ancillary Services are to be transmitted in accordance with Schedules, Adjustment Bids or bids for Ancillary Services submitted to the ISO by the Scheduling Coordinator, enters into a UDC operating agreement in accordance with Section 4 of the ISO Tariff;
- D. it shall ensure that each Generator for which it schedules Energy or on whose behalf it submits to the ISO Adjustment Bids or bids for Ancillary Services enters into a Generator agreement in accordance with Section 5 of the ISO Tariff:
- E. it shall have the primary responsibility to the ISO, as principal, for all Scheduling Coordinator payment obligations under the ISO Tariff;
- F. its status as a Scheduling Coordinator is at all times subject to the ISO Tariff.

#### 3. Term and Termination

- This Agreement shall commence on the later of (a) \_\_\_\_\_ or (b) the date the Scheduling Coordinator is certified by the ISO as a Scheduling Coordinator.
- This Agreement shall terminate upon acceptance by FERC of a notice of termination. The ISO Shall timely file any notice of termination with FERC.

#### 4. Assignment

Either party may assign its obligations under this Agreement with the other party's consent, such consent shall not to be unreasonably withheld.

Issued by: N. Beth Emery, General Counsel and Vice President Effective: March 31, 1998

Issued on: June 1, 1998

Original Sheet No. 362

#### 5. **Partial Invalidity**

If any provision of this Agreement, or the application of such provision to any persons, circumstance or transaction, shall be held invalid, the remainder of this Agreement, or the application of such provision to other persons or circumstances or transactions, shall not be affected thereby.

#### 6. Settlement Account

The Scheduling Coordinator shall maintain at all times an account with a bank capable of Fed-Wire transfer to which credits or debits shall be made in accordance with the billing and Settlement provisions of Section 11 of the ISO Tariff. Such account shall be the account referred to in Clause 7 hereof or as notified by the Scheduling Coordinator to the ISO from time to time by giving at least 7 days written notice before the new account becomes operational.

#### 7. **Notices**

Any notice, demand or request made to or by either party regarding this Agreement shall be made in accordance with the ISO Tariff and unless otherwise stated or agreed shall be made to the representative of the other party indicated below.

# CALIFORNIA INDEPENDENT SYSTEM OPERATOR CORPORATION FERC ELECTRIC TARIFF ORIGINAL VOLUME NO. I Original Sheet No. 369 **ISO TARIFF APPENDIX D Black Start Units**

Issued by: N. Beth Emery, General Counsel and Vice President

#### **Black Start Units**

The following requirements must be met by Generating Units providing Black Start ("Black Start Units"):

- (a) Black Start Units must be capable of starting and paralleling with the ISO Controlled Grid without aid from the ISO Controlled Grid;
- (b) Black Start Units must be capable of making a minimum number of starts per event (to be without aid from the ISO Controlled Grid as determined by the ISO);
- (c) Black Start Units must be equipped with governors capable of operating in the stand alone (asynchronous) and parallel (synchronous) modes.
- (d) Black Start Units must have startup load pickup capabilities at a level to be determined by the ISO, including total startup load (MW) and largest startup load (MW) for such power output levels as the ISO may specify.
- (e) All Black Start Units must be capable of producing Reactive Power (boost) and absorbing Reactive Power (buck) as required by the ISO to control system voltages. This requirement may be met by the operation of more than one Black Start unit in parallel providing that:
  - (i) the Black Start generation supplier demonstrates that the proposed Generation resource shares reactive burden equitably;
  - (ii) all Participating Generators associated with the proposed Black Start source are located in the same general area.

Buck/boost capability requirement shall be dependent on the location of the proposed resource in relation to Black Start load.

- (f) All Black Start Units must have the following communication/control requirements:
  - (i) dial-up telephone;
  - (ii) backup radio;
  - (iii) manning levels which accord with Good Utility Practice.

ORIGINAL VOLUME NO. I	Original Sheet No. 371
ISO TARIFF APPENDIX E	
Verification of Submitted Data for Ancillary Services	
,	

Issued by: N. Beth Emery, General Counsel and Vice President

#### **Verification of Submitted Data for Ancillary Services**

The ISO shall use the following procedures for verifying the scheduling and bid information submitted by Scheduling Coordinators for Ancillary Services. In this Appendix, a "bid" is a bid submitted by a Scheduling Coordinator in the ISO's competitive Ancillary Services market. A "schedule" is a Schedule including Ancillary Services which the Scheduling Coordinator wishes to self-provide.

- 1. Bid File and Schedule Format. The ISO shall verify that the bid files and schedules conform to the format specified for the type of Ancillary Service bid or schedule submitted. If the bid file or schedule does not conform to specifications, it shall be annotated by the ISO to indicate the location of the errors, and returned to the Scheduling Coordinator for corrections. Any changes made by a Scheduling Coordinator shall require a new submittal of bid or schedule information, and all validity checks shall be performed on the re-submitted bid or schedule.
- 2. Generation Schedules and Bids.
- 2.1. Quantity Data. The ISO shall verify that no Scheduling Coordinator is submitting a scheduled or bid quantity for Regulation, Spinning Reserve, Non-Spinning or Replacement Reserve which exceeds available capacity for Regulation and Reserves on the Generating Units, Loads and resources scheduled for that Settlement Period.
- 2.2 Location Data. The ISO shall verify that the location data corresponds to the ISO Controlled Grid interconnection data.
- Operating Capability. The ISO shall verify that the operating capability data corresponds to the ISO Controlled Grid interconnection data for each Generating Unit, Load or other resource for which a Scheduling Coordinator is submitting an Ancillary Service bid or schedule.
- 3. Load Schedules and Bids.
- Quantity data. The ISO shall verify that the quantity of Non-Spinning and Replacement Reserve scheduled or bid from Dispatchable Load does not exceed scheduled consumption quantities for that Settlement Period.
- 3.2. Location data. The ISO shall verify that the location of the Dispatchable Load corresponds to the ISO Controlled Grid interconnection data for each supplier of Dispatchable Load.
- Notification of Validity or Invalidity of Ancillary Services Schedules and Competitive Bids. The ISO shall, as soon as reasonably practical following the receipt

Issued by: N. Beth Emery, General Counsel and Vice President Effective: March 31, 1998

Issued on: June 1, 1998

of competitive bids or self-provided Ancillary Service schedules, send to the Scheduling Coordinator who submitted the schedule or bid the following information:

- (a) acknowledgment of receipt of the competitive bid or self-provided Ancillary Service schedule;
- (b) notification that the bid or schedule has been accepted or reject for non-compliance with the rules specified in this Appendix. If a bid or schedule is rejected, such notification shall contain an explanation of why the bid or schedule was not accepted;
- (c) a copy of the bid or schedule as processed by the ISO.

In response to an invalid schedule or bid, the Scheduling Coordinator shall be given a period of time to respond to the notification. The Scheduling Coordinator shall respond by resubmitting a corrected schedule or bid. If the Scheduling Coordinator does not respond to the notification within the required time frame, the ISO shall proceed without that Scheduling Coordinator's bid or schedule.

- 5. Treatment of Missing Values.
- **5.1 Missing Location Values.** Any bid submitted without a Location Code shall be deemed to have a zero bid quantity for that Settlement Period.
- **5.2 Missing Quantity Values.** Any bid submitted without a quantity value shall be deemed to have a zero bid quantity for Ancillary Service capacity for that Settlement Period.
- **5.3 Missing Price Values.** Any bid submitted with non-zero quantity value, but with a missing price value, shall be rejected.
- 6. Treatment of Equal Price Bids. The ISO shall allow these Scheduling Coordinators to resubmit, at their own discretion, their bid no later than 2 hours the same day the original bid was submitted. In the event identical prices still exist following resubmission of bids, the ISO shall determine the merit order for each Ancillary Service by considering applicable constraint information for each Generating Unit, Load or other resource, and optimize overall costs for the Trading Day. If equal bids still remain, the ISO shall proportion participation in the Final Day Ahead or Hour Ahead Schedule (as the case may be) amongst the bidding Generating Units, Loads and resources with identical bids to the extent permitted by operating constraints and in a manner deemed appropriate by the ISO.
- **7. Receipt of Bids and Schedules.** The ISO shall maintain an audit trail relating to the receipt of bids and schedules and the processing of those bids and schedules.

FERC ELECTRIC TARIFF	
ORIGINAL VOLUME NO. I	Original Sheet No. 374
ISO TARIFF APPENDIX F	
Rate Schedules	

Issued by: N. Beth Emery, General Counsel and Vice President

#### Schedule 1

#### **Grid Management Charge**

#### Part A – Monthly Calculation of Grid Management Charge (GMC)

The Grid Management Charge (ISO Tariff Section 8.0) is a formula rate designed to recover the ISO's administrative and operating costs, including costs incurred in establishing the ISO before its operations began. The Grid Management Charge also includes costs associated with Scheduling, System Control and Dispatch Service as described in Order No. 888.

The Grid Management Charge will be levied monthly in arrears on all Scheduling Coordinators by charging each Scheduling Coordinator the product of the Grid Management Charge rate, as calculated under section 8.4 of the ISO Tariff, and the Monthly Metered Consumption, all as expressly set forth in the following formula; provided, however, that (i) Existing Contract Deliveries shall be multiplied by a factor of 0.5 before application of the GMC; (ii) loads in a given hour served by Other Volumes shall be exempt from the GMC; (iii) Qualified Loads shall be exempt from the GMC; and (iv) all New Uses, including those by Existing Contract Entities and QFs, are subject to the full GMC. The formula through December 31, 2000, is as follows:

Monthly  $Bill_{SCi} = [GMC \times (ECD_{SCi} \times 0.50)] + [GMC \times OMC_{SCi}]$ 

#### Where:

SCi = the applicable Scheduling Coordinator

**ECD** = Existing Contract Deliveries

#### OMC = Other Metered Consumption

For purposes of this Schedule 1, capitalized terms not included in the Master Definitions Supplement shall be defined as follows through December 31, 2000:

**Existing Contract Deliveries** shall mean scheduled deliveries or metered consumption under an Existing Contract to an Existing Contract Entity, calculated in MWh, in accordance with the method historically used by the parties to the Existing Contract.

**Existing Contract Entities** shall mean entities receiving energy under Existing Contract rights as defined in the ISO Tariff, as it exists on April 1, 1998.

**Monthly Metered Consumption** shall mean the aggregate of Other Metered Consumption and Existing Contract Deliveries.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 24, 1999 Effective: July 1, 1999

**New Uses** shall mean volumes transported over the ISO Controlled Grid pursuant to an agreement that is not an Existing Contract under the ISO Tariff, and shall not include Qualified Loads.

**Other Metered Consumption** shall mean the sum of (i) total load of the Scheduling Coordinator within the ISO Control Area and (ii) total export of the Scheduling Coordinator outside of the ISO Control Area (including Wheeling Out and Wheeling Through the ISO Control Area); and (iii) but excluding Existing Contract Deliveries, Other Volumes and Qualified Loads. Other Metered Consumption includes New Uses.

**Other Volumes** for a given hour shall mean (i) the energy produced in that hour from any generating unit located within an Existing Contract Entity's service area or directly connected to transmission owned by such Existing Contract Entity and/or (ii) any volumes transported through a path that does not include facilities in the ISO Controlled Grid. Other Volumes does not include New Uses.

Qualified Loads means load served by QF energy that is generated on or distributed by the QF generator through private property or over distribution facilities that are dedicated to the QF through either an arrangement with the UDC in whose service territory the QF is located, or another entity that provides distribution level service, solely for its own use or the use of its tenants or two other corporations located on the real property on which the electricity is generated or on immediately adjacent real property and not for sale or transmission to others.

#### Part B - Quarterly Adjustment, If Required

The Grid Management Charge may change quarterly if the volume estimates, on an annual basis, change by 5% or more during the year. Each year the Grid Management Charge will be recalculated to reflect the following year's budget estimates and to adjust for any difference between the previous year's cost estimates and actual costs incurred.

#### Part C - Components of the GMC

As provided in Section 8 of the ISO Tariff, the Grid Management Charge includes the following costs:

- Operating costs (as defined in Section 8.2.2)
- Financing costs (as defined in Section 8.2.3), including Start-Up and Development Costs (as defined in Section 8.2.1)
- Operating and Capital Reserve costs (as defined in Section 8.2.4)

adjusted annually for:

 any surplus revenues from the previous year in the Operating and Capital Reserve Account, as defined under

Issued by: N. Beth Emery, General Counsel and Vice President

Section 8.5, which incorporates the difference between projected and actual costs from the previous year (such costs and adjustments being more specifically defined below in the Grid Management Charge Revenue Requirement Formula);

#### divided by:

forecasted annual volume in MWh;

adjusted quarterly for:

 a change in the volume estimate used to calculate the Grid Management Charge if, on an annual basis, the change is 5% or more.

#### The Grid Management Charge Revenue Requirement Formula is as follows:

Grid Management Charge Revenue Requirement =
Operating Expenses + Debt Service + the greater of [(Coverage Requirement x Senior Lien Debt Service) or (Cash Funded Capital Expenditures)] - Interest Earnings - Other Revenues - Reserve Transfer

Where.

**Operating Expenses** = O&M Expenses plus Taxes Other Than Income Taxes (Account 408.1) and Penalties (Account 426.3)

**O&M Expenses** = Transmission O&M Expenses (Accounts 560-574) plus Customer Accounting Expenses (Accounts 901-905) plus Customer Service and Informational Expenses (Accounts 906-910) plus Sales Expenses (Accounts 911-917) plus Administrative & General Expenses (Accounts 920-935)

**Penalties =** payments by the ISO for penalties or fines incurred for violation of WSCC reliability criteria (Account 426.3)

**Debt Service** = for any fiscal year, scheduled principal and interest payments, sinking fund payments related to balloon maturities, repayment of commercial paper notes, net payments required pursuant to a payment obligation, or payments due on any ISO notes. This amount includes the current year accrued principal and interest payments due April 15 of the following year.

Coverage Requirement = 25% of the Senior Lien Debt Service.

**Senior Lien Debt Service** = all Debt Service that has a first lien on ISO Net Operating Revenues (Account 128 subaccounts).

**Cash Funded Capital Expenditures** = Post current fiscal year capital additions (Accounts 301-399) funded on a pay-as-you-go basis.

**Interest Earnings** = Interest earnings on Operating and Capital Reserve balances (Account 419). Interest on bond or note proceeds specifically designated for capital projects or capitalized interest is excluded.

Issued by: N. Beth Emery, General Counsel and Vice President

Issued on: June 17, 1999 Effective: August 16, 1999

**Other Revenues** = Amounts booked to Account 456 subaccounts. Such amounts will include connection fees associated with communications equipment and application fees.

Reserve Transfer = the projected reserve balance for December 31 of the prior year less the Reserve Requirement as adopted by the ISO Board and FERC. If such amount is negative, the amount may be divided by two, so that the reserve is replenished within a two-year period. (Account 128 subaccounts)

**Reserve Requirement =** 15% of Annual Operating Expenses.

#### Part D – Information Requirements

**Annual Filing** 

In accordance with the settlement reached in Docket No. ER98-211-000, beginning in 1999, the ISO will make an informational filing each year on December 15, or the first business day thereafter, which shall contain cost data on the ISO presented in conformance with the FERC Uniform System of Accounts (USA). This filing shall contain all information presented in the ISO's monthly financial report as provided in Paragraph 17 of the Offer of Settlement, and such additional information as is required to set the GMC unit rate for the following calendar year, including the criteria used to set the projected volumes. To the extent that any party objects to such unit rate to be established, such party must file a complaint with the FERC under Section 206 of the Federal Power Act. Except as provided in Paragraph 7 of the Offer of Settlement, the Settlement will not be construed as barring a party's rights to seek or obtain relief under Section 206 of the FPA.

Monthly Financial reports

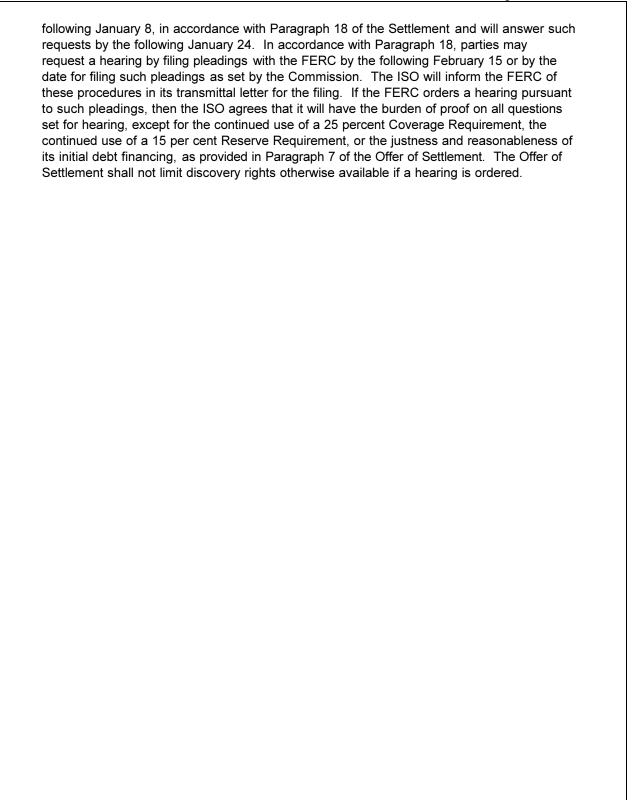

In accordance with the settlement reached in Docket No. ER98-211-000, the ISO will create monthly financial reports that present financial data both in the form created for the ISO Board of Governors and in a manner that conforms with the FERC USA, and shall include an explanation of how the data are converted from one format to the other. The monthly financial reports and the conversion explanation will be posted on the ISO's Website monthly.

Triennial Filing

Special procedures will be applicable to the informational filing used to establish the GMC unit rate for the year 2002, (*i.e.*, the informational filing to be submitted December 15, 2001) and each third year thereafter (triennial filings). The ISO will submit all the information required under 18 C.F.R. § 35.13, with the exception of pre-filed testimony, with such triennial filings. The ISO further will provide discovery on the triennial filings limited to requests for existing documents related to these filings. The ISO will accept requests for such documents through the

Issued on: June 17, 1999 Effective: August 16, 1999

#### Schedule 2

#### Other Charges

#### **Voltage Support Service**

The user rate per unit of purchased Voltage Support will be calculated in accordance with the formula in ISO Tariff Section 2.5.28.5.

#### **Regulation Service**

#### Regulation Obligation:

The amount of Regulation required will be calculated in accordance with Section 4.1 of the Ancillary Services Requirements Protocol (ASRP).

#### Regulation Rates:

The formulas for calculating the amount of and charges for Regulation Service are referenced in ISO Tariff Sections 2.5.20.1, 2.5.27, and 2.5.28.

The ISO will calculate the user rate for Regulation in each Zone for each Settlement Period in accordance with Section 2.5.28.1.

#### **Spinning Reserve Service**

#### Spinning Reserve Obligation:

The amount of Spinning Reserve required as a component of Operating Reserves is specified in Section 5.1 of the Ancillary Services Requirements Protocol (ASRP).

#### Spinning Reserve Rates:

The formulas for calculating the amount of and charges for Spinning Reserve Service are referenced in ISO Tariff Sections 2.5.27.2, 2.5.28.2.

The ISO will calculate the user rate for Spinning Reserve in each Zone for each Settlement Period in accordance with ISO Tariff Section 2.5.28.2.

#### **Non-Spinning Reserve Service**

#### Non-Spinning Reserve Obligation:

The amount of Non-Spinning Reserve required as a component of Operating Reserves is specified in Section 5.1 of the Ancillary Services Requirements Protocol (ASRP).

#### Non-Spinning Reserve Rates:

The formulas for calculating the amount of and charges for Non-Spinning Reserve Service are referenced in ISO Tariff Sections 2.5.27.3, 2.5.28.3.

Issued by: N. Beth Emery, General Counsel and Vice President

The ISO will calculate the user rate for Non-Spinning Reserve in each Zone for each Settlement Period in accordance with ISO Tariff Section 2.5.28.3.

#### **Replacement Reserves**

The formulas for calculating the amount of and charges for Replacement Reserve Service are referenced in ISO Tariff Sections 2.5.27.4 and 2.5.28.4.

#### **Black Start Capability**

The user rate per unit of purchased Black Start Capability for each Settlement Period will be calculated in accordance with ISO Tariff Section 2.5.28.6.

#### **Imbalance Energy Charges**

Rates for Imbalance Energy will be calculated in accordance with the formula in ISO Tariff Section 11.2.4.1.

#### Replacement Reserve Charge

The Replacement Reserve Charge will be calculated in accordance with ISO Tariff Sections 2.5.28.4 and 11.2.4.1.

## **Unaccounted for Energy**

Rates for UFE will be calculated in accordance with ISO Tariff Section 11.2.4.1.

#### **Transmission Losses Imbalance Charges**

Transmission Losses for each hour will be calculated in accordance with ISO Tariff Sections 7.4.2.

#### **Access Charges**

The Access Charge is set forth in ISO Tariff Section 7.1.

#### **Usage Charges**

The amount payable by Scheduling Coordinators is determined in accordance with ISO Tariff Section 7.3.1.4.1. Usage Charges will be calculated in accordance with ISO Tariff Section 7.3.1.

#### **Default Usage Charge**

The Default Usage Charge will be used in accordance with ISO Tariff Section 7.3.1.3.

#### **Grid Operations Charge for Intra-Zonal Congestion**

Intra-Zonal Congestion during the initial period of operation will be managed in accordance with ISO Tariff Sections 7.2.6.2 and 7.2.6.3.

Issued by: N. Beth Emery, General Counsel and Vice President Effective: March 31, 1998

Issued on: June 1, 1998

### **Wheeling Access Charges**

The Wheeling Access Charge for transmission service is set forth in Section 7.1.4.1 and Appendix II of the TO Tariffs.

#### **Charge for Failure to Conform to Dispatch Instructions**

The Charge for Failure to Conform to Dispatch Instructions will be determined in accordance with ISO Tariff Section 2.5.22.11.

#### **Reliability Must-Run Charge**

The Reliability Must-Run Charge will be determined in accordance with ISO Tariff Section 5.2.7.

Issued by: N. Beth Emery, General Counsel and Vice President
