TCR(s) or Project Associated: Spring 2022 SIBR Updates

Details: The following changes will be effective as of Monday, August 22, 2022, by 14:00 Pacific Time

In the Base Schedule Aggregation Portal (BSAP), on the Base Schedule tab, a column has been added Titled JOU. This add on allows for a Joint Owned Utility (JOU) to show the aggregate energy megawatt (EN MW) base from all resource for all JOU children under a JOU parent.

This change is being implemented on the BSAP User Interface (UI) only. The JOU column will only populate if there is a base schedule submitted for the JOU child.

The following BSAP screenshot shows where this change will be viewed.

The screenshot shows the BSAP Base Schedule interface. At the top, there are navigation tabs: "Base Schedule", "BAA Bal Viewer", "Resource Bal Viewer", and "Flex Requirement". Below these are various filters and controls, including "Market: Real Time", "Scheduling Coordinator", "Resource Type", "BSC / Entity SC", "Scheduling Point", "Primary Tie", "Alternate Tie", "PSE Identifier", "Display Mode", "Resource", "Hour", "Direction", and "Energy Type".

The main data table is titled "Base Schedule" and has the following columns: HR, Resource, SC, JOU, EN, AS-RU, AS-RD, AS-SR, AS-NR, Distribution, Status, and Submitted. A red box highlights the "JOU" column, and a red arrow points to the first row of data. The "JOU" column contains values for each hour, such as 257,000 for 01h and 226,000 for 21h.

On the right side of the interface, there is a "Message Viewer" panel showing a list of messages with columns for Rule#, Level, and Message. Below that is a "Distribution Pair" panel showing a table with columns for HR, Factor, and Location.
