Hello CAISO,

CalWEA would like to endorse Iberdrola Renewables' call to address, as part of the Expanding Metering & Telemetry Options initiative, the current system limitation of a single Resource ID per meter. Enabling each off-taker to submit separate bids – a capability that exists in the MISO, PJM, and ERCOT -- will provide significant benefits in the form of cost-effective and reliable dispatch. Dispatchable wind could significantly improve the CAISO's ability to effectively and reliably manage its system.

Thank you for your consideration of this request.

Nancy
