

OVERSIGHT COMMITTEE

Christiaan Hofmann

Vice-Chair

Christiaan Hofmann has been the Director of Transmission & Generation Operations for the Salt River Project since 2019. He is responsible for bulk electric system control center operations, including transmission, balancing, and EIM functions. Prior to this position, Christiaan was the director of Grid Reliability and Operations for NV Energy, where he was responsible for control center operations, including balancing, transmission and distribution functions.

Hofmann also was previously the Director of Lines Operations and Construction for rural Nevada, responsible for distribution and transmission operations, planning, and design. He holds a bachelor's degree in electrical engineering and a master's of business administration degree from University of Nevada Reno; a reliability coordination (RC) certification; and a Project Management Professional (PMP) certification.
