

Energy Storage Enhancements – Multi-Interval Optimization

Gabe Murtaugh
Storage Sector Manager

Market Surveillance Committee Meeting
General Session
October 1, 2021

ISO PUBLIC

Energy storage enhancements policy - Timeline

Date	Milestone
May 5	Post Issue Paper
July 26	Market Participant Presentations on Issue Paper
August 27	MSC Presentation on State of Charge Product
October 1	MSC Presentation on Multi-Interval Optimization
October 28	Storage Forum – Markets of the Future
November	Post Straw Proposal
Q3 2022	Board of Governor Meeting

The ISO continues to develop additional solutions for storage from previous initiatives

Fall 2021

- (ESDER 4) Market power mitigation application and the storage default energy bid
- (ESDER 4) End of hour state of charge biddable parameters
- (Hybrid) High sustainable limits for hybrid and co-located resources

Spring 2022

- (Hybrid) Hybrid dynamic limit tool
