Fast Start Reserve Management

Dave Delparte
Shift Supervisor

March 26, 2009

General Principles

- Shut down of Fast Start units with non-spin awards will be evaluated for system reliability and Reserve Management needs.
 - If it is determined a Fast Start unit should be shut- down for reliability or Reserve Management needs, the CAISO will issue an Exceptional Dispatch to shut down that unit.
 - Resources without non-spin awards will be shut down by RTUC.
- SCs can request a Shut Down Review.
 - If the resource is not required for reliability or operating reserve requirements, the CAISO will issue an Exceptional Dispatch to shut down the unit for the next RTUC run.
