On December 12, 2022, the California Independent System Operator Corporation (CAISO) filed a set of tariff amendments to clarify several areas of the CAISO tariff, including ancillary service procurement, validation of bids, and proxy transition costs.\(^1\) CAISO states that the revisions are intended solely to correct typographical errors, realign or remove erroneous cross-references, clarify the meaning of ambiguous tariff provisions, and ensure consistency throughout the tariff. Pursuant to authority delegated to the Director, Division of Electric Power Regulation – West under 18 C.F.R. § 375.307, CAISO’s tariff revisions are accepted for filing, effective as requested.

The filing was publicly noticed. No protests or adverse comments were filed. Pursuant to Rule 214 of the Commission’s regulations (18 C.F.R. § 385.214), notices of intervention, timely-filed motions to intervene, and any unopposed motions to intervene out-of-time filed before the issuance date of this order are granted.

This action does not constitute approval of any service, rate, charge, classification, or any rule, regulation, contract, or practice affecting such rate or service provided for in the filed document(s); nor shall such action be deemed as recognition of any claimed contractual right or obligation affecting or relating to such service or rate; and such action is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the applicant(s).

This order constitutes final agency action. Requests for rehearing by the Commission may be filed within 30 days of the date of issuance of this order, pursuant to 18 C.F.R. § 385.713.

Issued by: Carlos D. Clay, Acting Director, Division of Electric Power Regulation – West

\(^1\) The corresponding eTariff records are listed on the Appendix.
