Table 2 Definitions of Critical Dates in the FNM schedule

Item	Requirements and Descriptions
Project Submittal Timeline	<p>The project submittal timeline is based on the initial project parallel date; for detailed information related to the requirements for generation projects or transmission projects, please refer to the information below:</p> <p>Generation Projects: http://www.caiso.com/Documents/NewResourceImplementationGuide.doc, New Resource Implementation Timeline.</p> <p>Transmission Projects: http://bpmcm.caiso.com/Pages/BPMDetails.aspx?BPM=Managing Full Network Model, Full Network Model Business Practice Manual, see section 5.1</p>
Master File Data Freeze Dates	<p>The promotion process places limitations on the ability to process Master File data changes; therefore, the ISO will honor data freeze periods as outlined above.</p> <p>Please note that Master File data changes for registered cost updates will not be subject to the entire length of the data freeze periods, however, registered cost changes may not be effective on the FIRST day or the LAST TWO days of the period identified as “Effective data black-out period”.</p> <p>Master File UI and API submissions may resume on these dates for effective dates in the future subject to the normal 5 to 11 business day Master File change timeline.</p>
Production Effective Date	The trade date the model build or update will be active or effective in Production systems.
