The Honorable Kimberly D. Bose
Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

**Re: California Independent System Operator Corporation,
Docket No. ER06-615-____
Informational Filing per CAISO Tariff Section 39.7.1.3.2
Request for Privileged Treatment Under 18 C.F.R Section 388.112**

Dear Secretary Bose:

Pursuant to Section 39.7.1.3.2 of its tariff, the California Independent System Operator Corporation (CAISO) submits this informational filing containing the rates or formulas used to calculate negotiated default energy bids, custom operations and maintenance adders, major maintenance adders, and opportunity costs for the month of June, 2019. In these reports, the CAISO includes information on new, modified, or terminated rates and formulas that were implemented in the preceding month. In June 2019, there were eight revised and 24 terminated major maintenance adders (Attachment A); one terminated custom operations and maintenance adder (Attachment B) and four new calculated opportunity cost adders (Attachment C). There were no new, revised, or terminated negotiated default energy bids in June 2019.

The CAISO is also submitting supplemental attachment, Attachment D, consisting of 17 revised custom operations and maintenance adders that went into effect in May 2019. This information should have been included in the June 7, 2019, informational report. Due to an internal processing error, these 17 adders were inadvertently not included in June's report. We apologize for any inconvenience this may have caused.

Section 20.2 of the CAISO tariff requires that the CAISO treat individual bids from scheduling coordinators as confidential. Negotiated default energy bids and start-up and minimum load costs, which include custom operations and maintenance adders, and major maintenance adders, are components of bids. Accordingly, pursuant to section 20.2 of the CAISO tariff, the CAISO has labeled the documents included with this filing as confidential. In addition, the documents contain proprietary information regarding specific generating units, such as unit efficiency factors, scaling factors, and

operation and maintenance costs. For these reasons, the Commission should accord these attachments privileged treatment pursuant to Section 388.112 of the Commission's regulations.

Please contact the undersigned if you have any questions or concerns regarding the foregoing.

Respectfully submitted,

By: /s/ Sidney L. Mannheim
