

Market Redesign and Technology Upgrade Budget & Schedule Report

Board of Governors Meeting Executive Sponsor: Charles A. King, PE January 24-25, 2007

MRTU Executive Summary

California Independent System Operator Corporation

MRTU Schedule

Current Period	Trend
G	-

Tracking Delay: 0 weeks

Critical Path Items: System Development, Integration

Testing

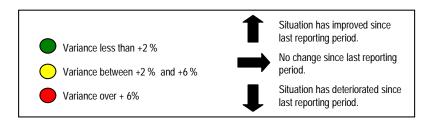

*Based on approved 1/31/08 Go-Live date

- Majority of System Development activities are complete, with the exception of FERC-Related changes and some SIBR/IFM/MQS components. Schedule is tracking to revised 1/31/08 Go-Live for 2/1/08 Trade Date
- Integration Testing executing Release 2/3 Functional Integration Testing (FIT) schedule, tracking to a 5/7/07 Market Simulation Phase 3 date.
- PTR re-evaluating schedule for delivering internal reports
- Market Simulation Phase 1 complete. Phase 2 on schedule to begin on week of 1/22 including Inter-SC Trades functionality.
- MRTU accomplishments include: SaMC delivered its first set of Charge Codes for testing and completed system development for Release 3; Legacy completed Design and Build of multiple applications and made progress with Site Acceptance Tests (SAT) for Release 3; MQS passed all SAT test cases and began Acceptance Integration Tests (AIT) for Release 3; Technical Architecture/Infrastructure completed E2E test environments

•	Polay, but will not impact 1/31/08 Go-live date.
G	Polay, will impact 1/31/08 Go-live date. Use of contingency funds.

MRTU Budget								
Current Period	Trend							
G	—							
Approved MRTU budget: \$189.223 M* *Based on approved budget on 12/06								

- Completed Impact Assessment of FERC ruling on MRTU.
- Detailed budget analysis for current MRTU scope and FERC changes completed and presented to Steering Committee
- Board approved revised MRTU Schedule of 1/31/08 Go-Live for 2/1/08 Trade Date and Budget of \$189.223M on 12/19/06
- Release Plan updated based on new approved schedule
- CAISO working with key vendors to re-negotiate remaining work and costs
- MRTU continues to work with business units to address upward budget pressures

MRTU Executive Summary

Over the past month, MRTU continued to make progress with system development, testing, readiness, and other delivery milestones across different projects.

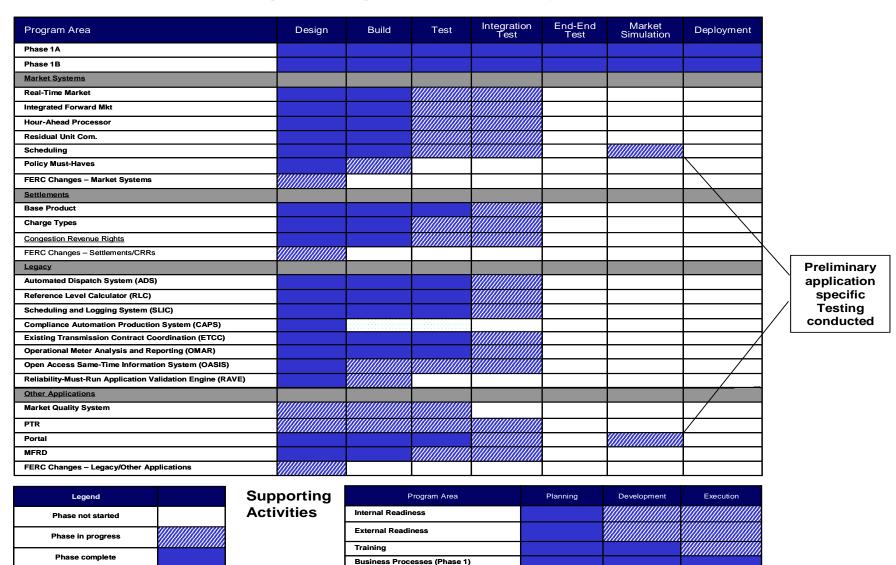

The month's primary System Development, and Functional and Site Acceptance Testing accomplishments include: Full Network Model and State Estimator (FNM/SE) completed onsite testing of DB1 Regression, and continued model development updates and SAT. Integrated Forward Markets (IFM) supported Application Integration Testing (AIT) and Functional Integration Testing (FIT) for Web services; Settlements and Market Clearing (SaMC) successfully merged Release 3 and 4A charge codes and began testing of that combined release. Market Quality Systems (MQS) passed all SAT test cases and began AIT for its v1.0 release. In addition, the CRR Dry Run ran Tier 1 and 2 of monthly allocation and published allocation results, triggered 4 of 5 Broadcast Services in Site Acceptance Tests (SAT), and closed and ran Yearly Auction Bid.

Concurrently, the Program Management Office (PMO) completed a detailed impact analysis on the FERC Order response. As a result, a revised budget and schedule were presented and approved by the Board. The revised MRTU is tracking towards a 1/31/08 implementation, for 2/1/08 Trade Date, and a \$189.223M budget. The PMO is working with project teams to re-baseline workplans that include detailed tasks for FERC changes.

MRTU development, testing, and integration efforts continue to approach many milestone completions. The PMO continues to analyze budget lever and cost pressures for the entire program.

MRTU Program Progress as of January 24, 2007

BPMs

Accomplishments & Milestones

Integration (Interfaces)

- Completed Design and Build of Release 4B, as well as OASIS 4B
 Testing
- Many systems completed Acceptance Integration Tests (AIT)
- Created Load & Performance Test Metrics and Scenarios

Congestion Revenue Rights

- Successfully triggered 4 of 5 Broadcast Services in Site Acceptance Tests (SAT)
- Closed and ran Yearly Auction Bid, posted results

SaMC

- Delivered merged set of Charge Codes for Release 3 and 4A to testing
- Completed Release 4A Build and began testing

Program Management Office (PMO)

- Completed budget mitigation analysis
- Drafted Configuration Management Plan
- Received Board approval on impact of FERC Order

Full Network Model and State Estimator

- Completed onsite testing of DB1 Regression
- Onsite SAT testing

Integrated Forward Markets

 Supported AIT and Functional Integration Testing (FIT) for Web services

Market Quality Systems

 Passed all SAT test cases and formal v1.0 exit complete, began Acceptance Integration Tests (AIT)

Planned Activities

Integration (Interfaces)

- Complete Release 3 impact assessment, Release 4B Design activities, finalize requirements for MDS (Orchestration)
- Obtain sign-offs for all designs of approved interfaces

Testing

Deliver 48 releases 4 interfaces and begin AIT

Integrated Forward Markets/Real-Time Nodal

 Continue support of Integration Tests and Market Simulation for Web services

Congestion Revenue Rights

- Run Tier 2 Monthly Allocation Market for August and April
- Continue SAT for latest Build

SaMC

- Charge Code Testing
- Continue Market Clearing Testing
- Complete any outstanding design and unit test templates

Applications

- Continue Functional and Site Acceptance Tests
- Complete Interoperability testing of web services

Legacy

Continue AIT, FIT, and SAT execution

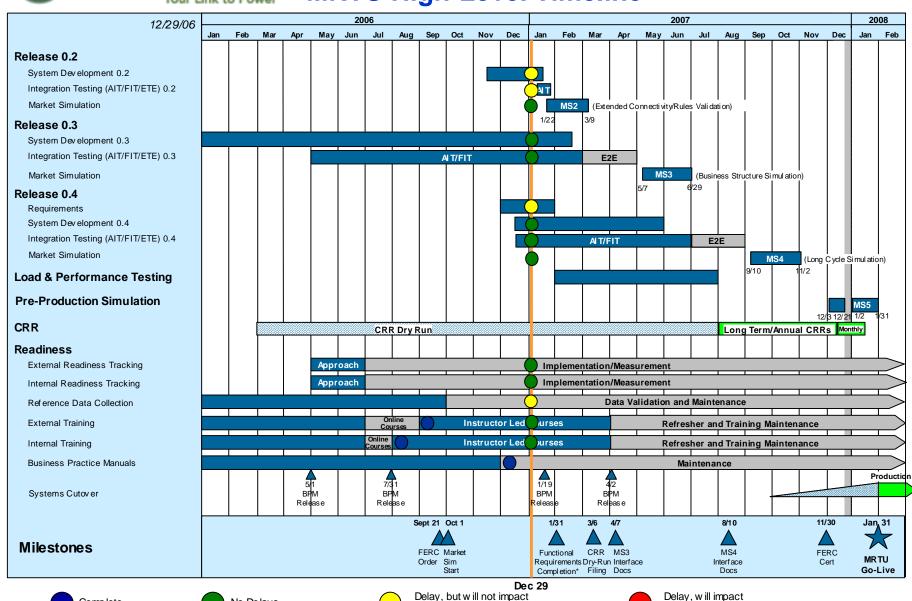

Market Simulation

Commence Business Structure Simulation (Phase 3) planning

MRTU High-Level Timeline

California Independent System Operator Corporation

01/31/08 Go Live Date

No Delays

01/31/08 Go Live Date

Complete

* Represents most of the MRTU projects.

MRTU High-Level Milestone Description

The following are descriptions for some of the milestones indicated on the MRTU High-Level Timeline;.

- Functional Requirements Completion represents the date by which MRTU functional requirements documentation will be completed to allow system development design activities, with the exception of three MRTU projects, including: SaMC, SIBR, and IFM/RTN.
- CRR Dry-Run Filing represents the date that CAISO will file the report for the Dry-Run results for Annual and Monthly auctions and allocations.
- MS3 Interface Documents represents the date the CAISO will release the Technical Interface documents to Market Participants for Market Simulation Phase 3. These documents specify the interface details required for participants to access CAISO Systems and participate in the simulation.
- MS4 Interface Documents represents the date the CAISO will release the Technical Interface documents to Market Participants for Market Simulation Phase 4. These documents specify the interface details required for participants to access CAISO Systems and participate in the simulation.

Re-Baselining to new Schedule

- Actual hours burned by MRTU projects are below the planned rate. A significant portion of the discrepancy can be explained by Testing remaining understaffed until systems come online and earned value is consistent with burned hours
- Current earned value is tracking below planned earned value due to various delays. PMO is working with the project teams to re-baseline the delivery schedules per the new 1/31/08 Go-Live date, which will address this issue
