	Thursday	Change 4			Change 1		
	Friday	Change 5					
Week 2	Monday	Change A	Change 2 Change 3	Change 2 Change 3	Change 1		
	Tuesday	Change B					
	Wednesday	Change C	Change 4 Change 5 Change A		Change 2 Change 3		
	Thursday	Change D		Change 4 Change 5 Change A			
	Friday	Change E					
Week 3	Monday		Change B Change C	Change B Change C	Change 4 Change 5 Change A		
	Tuesday						
	Wednesday		Change D Change E		Change B Change C		
	Thursday			Change D Change E			
	Friday						
Week 4	Monday				Change D Change E		
	Tuesday						
	Wednesday						
	Thursday						
	Friday						

This calendar is provided as a guide to help scheduling coordinators determine the time line required when requesting changes to data maintained in the Master File application; effective dates for all proposed changes are subject to CAISO approval.

Calendar Notes:

- 1 To ensure sufficient lead time for a desired effective date, identify the day of the week in the 'Production Effective Date' column and work backwards to determine the day when the request must be submitted to ISO. During weeks that contain holidays, an additional business day will be required in the lead time for each change schedule.
- 2 Changes are batched together and handled on certain days during the week, rather than daily; this is the reason changes requested on different days of the week require different lead times.
- 3 The effective dates shown are the earliest effective trades dates available for a simple change that does not require follow-up. More complex requests may require up to an additional 6 business days to process. Be sure to allow additional lead time if the change may require follow-up activity.
- 4 For changes submitted on a weekend or holiday, the receive date will fall on the next business day.
- 5 Master File data freeze periods will impact this schedule during the weeks near Full Network Model updates or certain market functionality releases; the schedule impacts will be communicated in Market Notices at least 5 business days prior to the freeze dates.
