4) General Questions/Comments – Jennie Araj

Updates
None

Bi-Weekly Market Performance Report
The CAISO posted the bi-weekly market performance report for March 13-26, 2024. The maximum day-ahead cleared demand was 26,240 MW and the maximum day-ahead DLAP price was $68.68/MWh for the two weeks. The reasons for the price excursions in the fifteen-minute and five-minute markets are documented.

Review of the Price Correction Report
During the week of March 18-22, 2024, the CAISO processed 41 intervals for price correction due to software defects and/or data input errors. During the week of March 25-29, 2024, the CAISO processed one interval for price correction due to software defects.

General Questions
Q: For the nomogram, 7690-INYOKN_VOLTAGE_EX_NG, is this a new or existing nomogram? Is it for a high voltage or low voltage issue?
A: The nomogram 7690-INYOKN_VOLTAGE_EX_NG is an existing nomogram and activated when there is an outage in the area and it is in the export direction. The ISO cannot disclose if it is for high or low voltage mitigation.

---

1 The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to CIDI system, which includes questions that have proprietary information and that might be commercially sensitive.
