Bi-Weekly Market Performance Report
The ISO posted the bi-weekly market performance report for August 04 through August 17. The maximum day-ahead cleared demand was less than 47,280 MW for the two-week period. The Maximum day-ahead DLAP price was $226.32, which occurred during the evening peak. There were some price excursions in the fifteen-minute market and the root cause of those excursions are available on the first tab of the report.

Review of the Price Correction Report
During the week of July 19– July 23, the ISO processed 67 intervals for price correction due to a software defect and data input errors. During the week of July 26– July 30, the ISO processed 25 intervals for price corrections due to data input errors and software defect.

---

1 The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to CIDI system, which includes questions that have proprietary information and that might be commercially sensitive.
