### Bi-Weekly Market Performance Report

The ISO posted the bi-weekly market performance report for November 24 through December 7. During this period, markets were generally quiet. The maximum day-ahead cleared demand was 29,630 MW for the two weeks. The Maximum day-ahead DLAP price was \$109.79/MWh. The reasons for the price excursions in the fifteen-minute and five-minute markets is documented. There are elevated prices in the San Diego region due to outage work in the area.

### Review of the Price Correction Report

During the week of November 22-26, the ISO processed 22 intervals for price correction due to software defects. During the week of November 29 - Dec 3, the ISO processed 8 intervals for price correction due to software defects.

### General Questions

**Q:** When did the San Diego area outages that impacted the day-ahead and real-time market end?

**A:** The trade dates impacted are Dec 1 to Dec 4 and Dec 6 to Dec 11.
