Meeting Minutes Review

The January 18th meeting minutes have been posted.

Weekly Market Performance Report

During the week of January 10-23, 2018, the markets were quiet and loads were mild. There was congestion observed in both day-ahead and real-time market due to planned outages in Southern California. The majority of congestion is observed on the two constraints: OMS 4646120 ELD_MKP_SCIT_NG and the 24138_SERRANO _500_24137_SERRANO _230_XF_1 _P. The OMS nomogram is enforced for the El Dorado- Moenkopi 500 kV line outage and this outage ended on January 19, 2018. The reasons for the real-time price spikes are listed in the report.

General Reminders

- **NOTE:** The current best practice, and preferred method, of asking questions is to route through the Customer Inquiry, Dispute and Information system, "CIDI".
- Please submit your questions ahead of the call; there are occasions when we have to gather information: submission ahead of time allows us more preparation time to reply.

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive. Only general market-related questions which are neither proprietary, nor non time-sensitive should be sent to market_issues@caiso.com.

- To add general comments/questions/requests to the **action item list or meeting agenda**, market participants should also open corresponding CIDI tickets with both the Functional Environment as “Market Performance” and SCID as “XPUB” by close of business (COB) on Mondays.
