Business Practice Manuals

- The purpose of BPMs is to set forth business practices that implement the ISO tariff.

- The ISO conducts a yearly policy initiative roadmap process to consider and rank initiatives.
  - *Policy changes submitted through the PRR process will be referred to the policy initiative roadmap process.*

- Each subject area in a BPM is based on enabling language in the ISO tariff.
  - *The PRR process cannot be used to introduce changes that are not supported by existing tariff authority.*

PRR 1540 – Updated multiple configuration guides to accommodate fixing typos in variable names which are otherwise correct in the bill determinate matrix and the settlements system

- **Reason for revision**
  - A CIDI ticket triggered the change. Documentation only updates are required in order to fix typos in variable names which are otherwise correct in the BD Matrix and the Settlements system. Neither BAAResourceSettlementIntervalRTDTransferDevFromQuantity rQ‘AA’qmdhcf or BAAResourceSettlementIntervalRTDTransferDevToQuantity rQ‘AA’qmdhcf appear as variable names in the BD Matrix. Research reveals that these are misspelled variable names. The correct variable names are BAAResSettlementIntervalRTDTransferDevFromQuantity and BAAResSettlementIntervalRTDTransferDevToQuantity which do appear in the BD Matrix. In order to correct 64770 ICG we need to replace each instance of the misspelled variable name with its correct variable name. In order to correct Real Time Energy Quantity PC ICG we need to replace each instance of the misspelled variable name with its correct variable name. The impacted ICGs are Real Time Energy Quantity PC ICG and CC 64770 Real Time Imbalance Energy Offset EIM. The effective trade date of the change is 01/01/2024 and the anticipated implementation date is 01/01/24.
