# DRRS November 2022 Release

- DRRS deployed DRRS UI 2.2.1, DRRS API 2.2.4 to the MAP-Stage environment to allow for a market participant testing period opportunity.
- Release contents:
  - Preventing the incumbent DRP user to end-date or update its respective location record which is currently in active defense mode. This is to preserve/honor completion of the defense process to prevent further issues (overlapping location recs, no action done on a defense by the system).
  - API output location review start/end and location defense start/end datetime values will be corrected to be published in the correct GMT value & format.
  - Email generation – resolved rare/intermittent issue of system not sending out emails
- For those with ISO Developer Site access please refer to this Release Notes document posted at:
