RCW EMS	DTE 08/30 HE 5, 6, 7 Primary shows 0, BU1 and BU2 are non-zero. This actually worked according to the current design	Pending RCWEST action	Resolved	Low

System	Short Description	Status From Last Meeting	Next Action	Priority Severity
RCW/EMS	<p>Enhancement request HPQC #70996. This incident stems from the EMS failover (Sev 2 #00941275) which occurred during the time error data upload to WIT. This caused WIT to receive a bad time error value from the CISO. The enhancement request is for the PIWS adapter which handles the upload to WIT.</p> <p>The enhancement request is to detect when the time error value exceeds the threshold to upload a good value from the previous hour generate an alert and ticket to support staff</p>	Pending RCWEST action	Resolved	Critical

The enhancement is now deployed to production which prevents EMS/PI to send large DTE value to WIT.

**No DTE bad data issue as of late**
