Re: Reliability Service Initiative – CAISO Board of Governors Meeting – October 27, 2016

Dear Board of Governors,

SCE appreciates the effort and generally supports the resolution that has been reached through the stakeholder process regarding the Reliability Services Initiative. SCE had proposed similar treatment to align the annual and monthly Resource Adequacy process with the inter-month Resource Adequacy process. The resolution that is before you seeks adoption of a policy that very closely mirrors that which SCE had previously proposed and continues to support.

SCE notes that implementation will be a critical step to ensure that the policy adopted is met but is also performed in a clear and simple manner. SCE looks forward to working with the CAISO on the implementation of these measures.

Thank you,

Eric Little
