SCE thanks CAISO for providing the opportunity to present at the 8/18/2015 FRAC MOO 2 meeting. After hearing feedback from various parties on both CAISO's and SCE's proposals during the workshop, SCE still believes that its proposal is the correct starting point for a durable Flex RA product. SCE requests additional time at the next workshop to continue discussions on SCE proposal as well as address any comments that come in on 9/1/2015. The time allotted to SCE for the 8/18 workshop (a little over an hour) was sufficient to present the proposal but did not provide enough time to fully discuss parties questions. SCE requests at least 2 hours at the next working team meeting.
