Metering Rules Enhancements

November 1, 2016 – Revised Draft Final Proposal

Submitted by	Company	Date Submitted
Thomas Pang	Southern California Edison (SCE)	November 17, 2016

SCE appreciates the opportunity to provide comments on the CAISO Metering Rules Enhancements (MRE) Revised Draft Final Proposal, dated November 1, 2016.¹ The additional clarity provided by the recent MRE updates address SCE's potential concerns with the prior proposal. In particular, SCE appreciates that the metering requirements for non-participating load resources and existing QF generating resources are permitted to remain as they are today as described in section 6.2. The current metering protocols have worked well to ensure data quality. Requiring changes to existing metering without a justifiable benefit will unnecessarily increase costs to our customers. With the above provision, SCE supports the Metering Rules Enhancement proposal.
