SIBR WebSDK Upgrade User Reference
January 2021
Scheduling Infrastructure Business Rules (SIBR) Upgrade

• SIBR Upgrade to latest version of WebSDK
  – No significant changes to overall functionality or processes
    • Banner color change for Production
    • Support model – Internet Explorer
    • Compatibility settings

• Changes are currently available for view in MAP Stage
• Production changes become visible Tuesday, January 11, 2021
New Look – EIM Banners – Previous Change

Current View in Production

New View in Production

Production banner to be **RED** instead of **GRAY** to be consistent with other CAISO live applications

View in **MAP Stage** Remains the Same
New Functionality – Status and Bid Messages

Currently, hovering over the status icon brings up a box providing brief status update. Further clicking to get to bid messages required.

With update, display allows for clicking directly on the icon to receive both the bid status and bid messages in the same UI rather than opening a separate one.
New Look – EIM Column Sorting

Sorting functionality in the new version allows for greater data display granularity.
Support Model

Internet Explorer is the browser supported by the CAISO

Supported

NOT Supported

Though this application may still be used in Chrome and Edge, the primary supported browser is Internet Explorer, therefore defects will ONLY be validated for those identified in Internet Explorer.
Basic Display Layout

Note for IE11 Users, all compatibility features must be turned off in order to for the displays to function properly.

- In IE, select ‘Tools’ and then select ‘Compatibility View Settings’
- Remove any URL and deselect all options.
Where Can You Find More?

Visit the CAISO Application Access page under the Participate tab and view the **SIBR Scheduling Coordinator Users Guide**
