OF THE STATE OF CALIFORNIA**

Order Instituting Rulemaking to Consider	)	
Refinements to and Further Development of the	)	R.05-12-013
Commission’s Resource Adequacy	)	
Requirements Program	)	

---

**COMMENTS OF THE  
CALIFORNIA INDEPENDENT SYSTEM  
OPERATOR CORPORATION  
ON SUPPLEMENTAL TRACK 3 PROPOSALS**

---

Pursuant to the Administrative Law Judge’s Ruling Clarifying and Further Modifying the Procedures and Schedule for Track 3, dated July 5, 2007, and the subsequent procedural e-mail ruling of the Administrative Law Judge, dated August 22, 2007, the California Independent System Operator Corporation (“CAISO”) respectfully submits its comments to the supplemental resource adequacy Track 3 proposals submitted by small and multi-jurisdictional load serving entities (collectively “Track 3 LSEs”).

**I. General Comments**

The submissions by the Track 3 LSEs reflect the special circumstances presented by these entities and the Commission’s willingness to accommodate those circumstances. From the CAISO’s perspective, the role of the larger Track 3 LSEs – PacifiCorp and Sierra Pacific Power Company – as their own Balancing Authority significantly alters the potential implications of Track 3 on reliability issues. For instance, the relationship between the CAISO and those two entities in meeting NERC/WECC reliability standards

is established through existing Interconnected Control Area Operating Agreements. These agreements specifically require each Balancing Authority to plan and operate their respective systems in conformance with NERC/WECC standards and good utility practice and provide for mutual assistance during system emergencies. Thus, the CAISO believes the level of flexibility incorporated into the submissions of PacifiCorp and Sierra Pacific Power Company in particular appears reasonably appropriate.

Notwithstanding the value of providing the Track 3 LSEs with flexibility in meeting the requirements of Public Utilities Code § 380, the Commission should nevertheless insist on the application of standards and rules that permit comparability across Track 3 LSEs and among the level of service provided to all California electric consumers served by jurisdictional LSEs. The ability to compare rests, in large part, on consistency in resource counting and demand forecast protocols. Accordingly, the Commission should, to the extent possible, require the Track 3 LSEs to utilize the resource counting rules previously developed by the Commission. With respect to demand forecasts, the Commission should require that the Track 3 LSEs either utilize the forecasts produced by the CEC, where possible, or submit their forecast methodology to the CEC for review.

## **II. Track 3 LSE Specific Comments**

### **A. Plumas**

Plumas argues that, as an electric cooperative, it is exempt from Public Utilities Code § 380 or, alternatively, if the statute does apply, that the Commission need not intervene in or otherwise augment Plumas' current procurement efforts to ensure that it satisfies the required resource adequacy mandates. The CAISO has no opinion on the

applicability of Public Utilities Code § 380 to Plumas. However, the CAISO supports Plumas' latter contention to the extent it remains a party to Northern California Power Agency's ("NCPA") Metered Subsystem Aggregation Agreement and NCPA maintains its annual election to be a Load-following Metered Subsystem ("Load-following MSS"). As a Load-following MSS, under the CAISO Tariff, NCPA and its underlying members have a strong incentive to maintain resource adequacy and not lean on the CAISO markets for supplying energy and ancillary services. If metered generation and imports into the Load-following MSS are insufficient to meet its metered demand and exports and the deficiency exceeds a narrow deviation band, then the Load-following MSS is charged a significant penalty price for that negative deviation.<sup>1</sup> Further, under the CAISO Tariff, NCPA on behalf of its underlying members is assigned proportionate responsibility for the cost of necessary Local Area Capacity Resources. Given these existing resource adequacy safeguards, and absent any evidence that they are insufficient, the CAISO believes that no further action needs to be taken by the Commission with respect to Plumas in this proceeding.

## **B. BVES**

The CAISO supports much of BVES's proposed resource adequacy program elements, including its proposed schedule for transitioning away from reliance on firm liquidated damages contracts. The CAISO also specifically supports BVES' requested treatment of its generating unit as distributed generation. The absence of an interconnection agreement with Southern California Edison ("SCE") that allows the

---

<sup>1</sup> Under MRTU, the penalty price for negative deviations by a Load-following MSS is 200% of the Settlement Interval Real Time LAP Price for the Default LAP. This penalty price is applied to each MW in excess of the deviation band.

generating unit to deliver energy to the SCE system effectively precludes its classification as a Resource Adequacy Resource that must be made available to the CAISO under prior Commission precedent. As a distributed generation resource, the CAISO would support the Commission treating the generating unit's capacity as a reduction to BVES' contribution to coincident peak demand. Finally, the CAISO recommends that the Commission minimize, to the extent possible, other deviations from existing Commission resource counting, load forecast, and reserve margin requirements as they may apply to BVES.

Respectfully submitted,

/s/Grant A. Rosenblum  
Grant A. Rosenblum  
Attorney for  
The California Independent  
System Operator

CERTIFICATE OF SERVICE

I hereby certify that on September 28, 2007, I served, by electronic mail and United States Mail, a copy of Comments of the California Independent System Operator Corporation On Supplemental Track 3 Proposals on all parties in Docket Number R. 05-12-013.

DATED at Folsom, California on September 28, 2007.

/s/ Susan L. Montana
