

OVERSIGHT COMMITTEE

STEVE COBB

Vice-Chair

Steve Cobb is currently the Director of Transmission and Generation Operations at Salt River Project (SRP). In his 39 years at SRP, he has held Director-level positions in Transmission Planning and Electric Reliability Compliance, along with various other operations-related management assignments. Early in his career, he was an operator at Navajo Generating Station and a System Operator in the Balancing Authority and Transmission Operations areas. He is a past Chair of the Western Electricity Coordinating Council (WECC) Operating Committee and has participated in numerous North American Electric Reliability Corporation (NERC), WECC and North American Energy Standards Board (NAESB) groups.
