The California ISO has scheduled a public stakeholder meeting on May 8, 2018 to discuss the draft tariff language for the 2018 Tariff Clarification Filing Process and requests stakeholder comments by May 1.

Sunrun appreciates the California ISO's continued leadership and engagement with stakeholder. We agree with the proposed redline to zero out the Generator Output Baseline in the event the resource is unable to collect the minimum targeted number of baseline hours. Additionally, we request that the proposed tariff changes enable retroactive baseline calculations to be made by the resources if desired for any period in 2018 follow CAISO Board and FERC approvals.

Thank you for the opportunity to comment on this important matter.
