

# WEIM benefits and market update

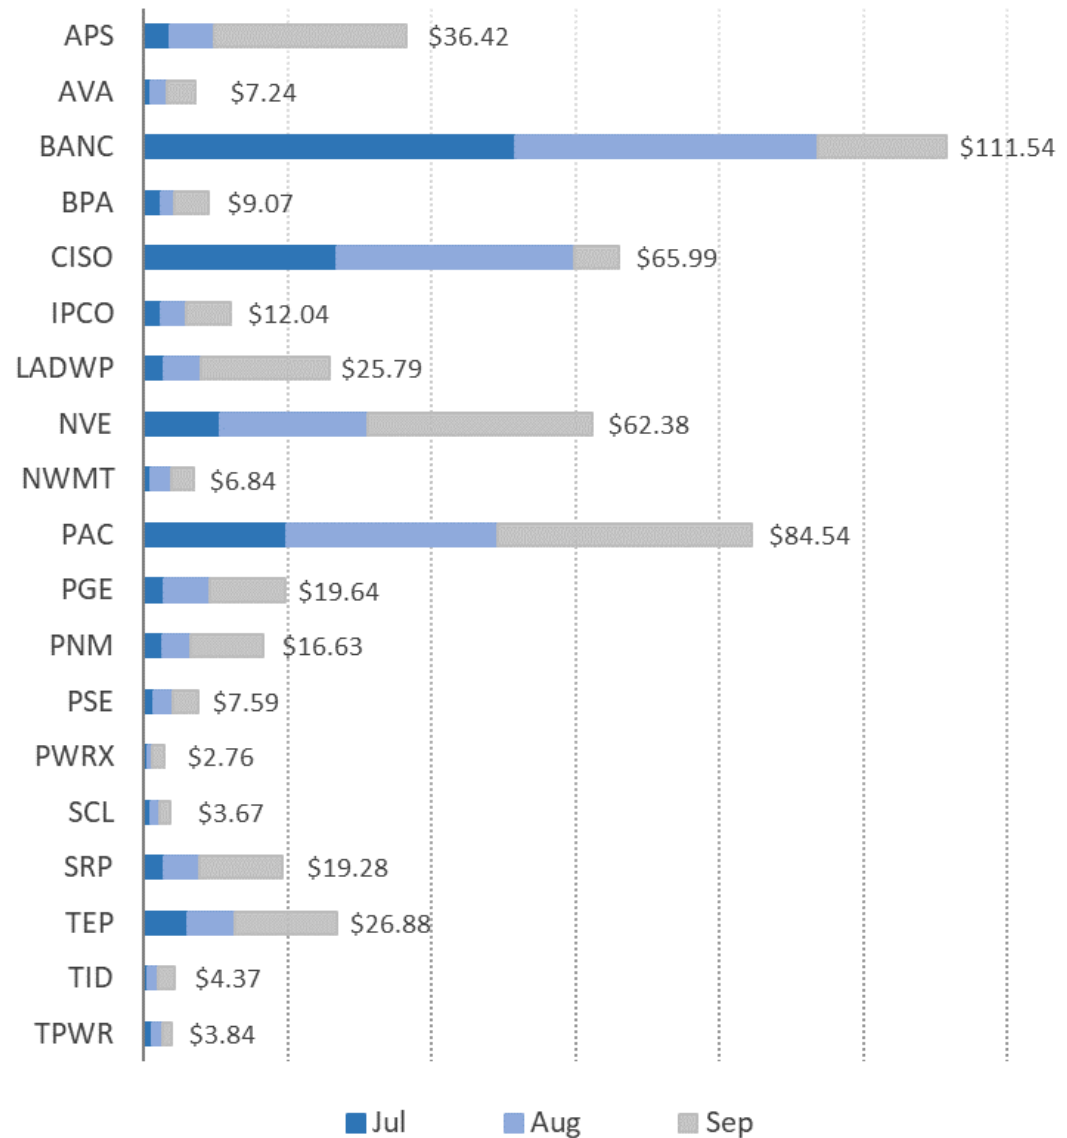

Guillermo Bautista Alderete  
Director – Market Analysis and Forecasting

Board of Governors Meeting  
Information Only  
December 7, 2022

# \$526.51 million gross economic benefits in Q3 2022

Gross economic benefits driven by:

- Participation of additional EIM entities
- Relative high energy prices
- Economic transfers among areas

# \$3 Billion in cumulative benefits through October 2022

# WEIM helps reduce curtailments

Avoided curtailments since 2015 represent a reduction of 781 equivalent Tons CO<sub>2</sub>

# Robust volume of WEIM transfers among areas in Q3

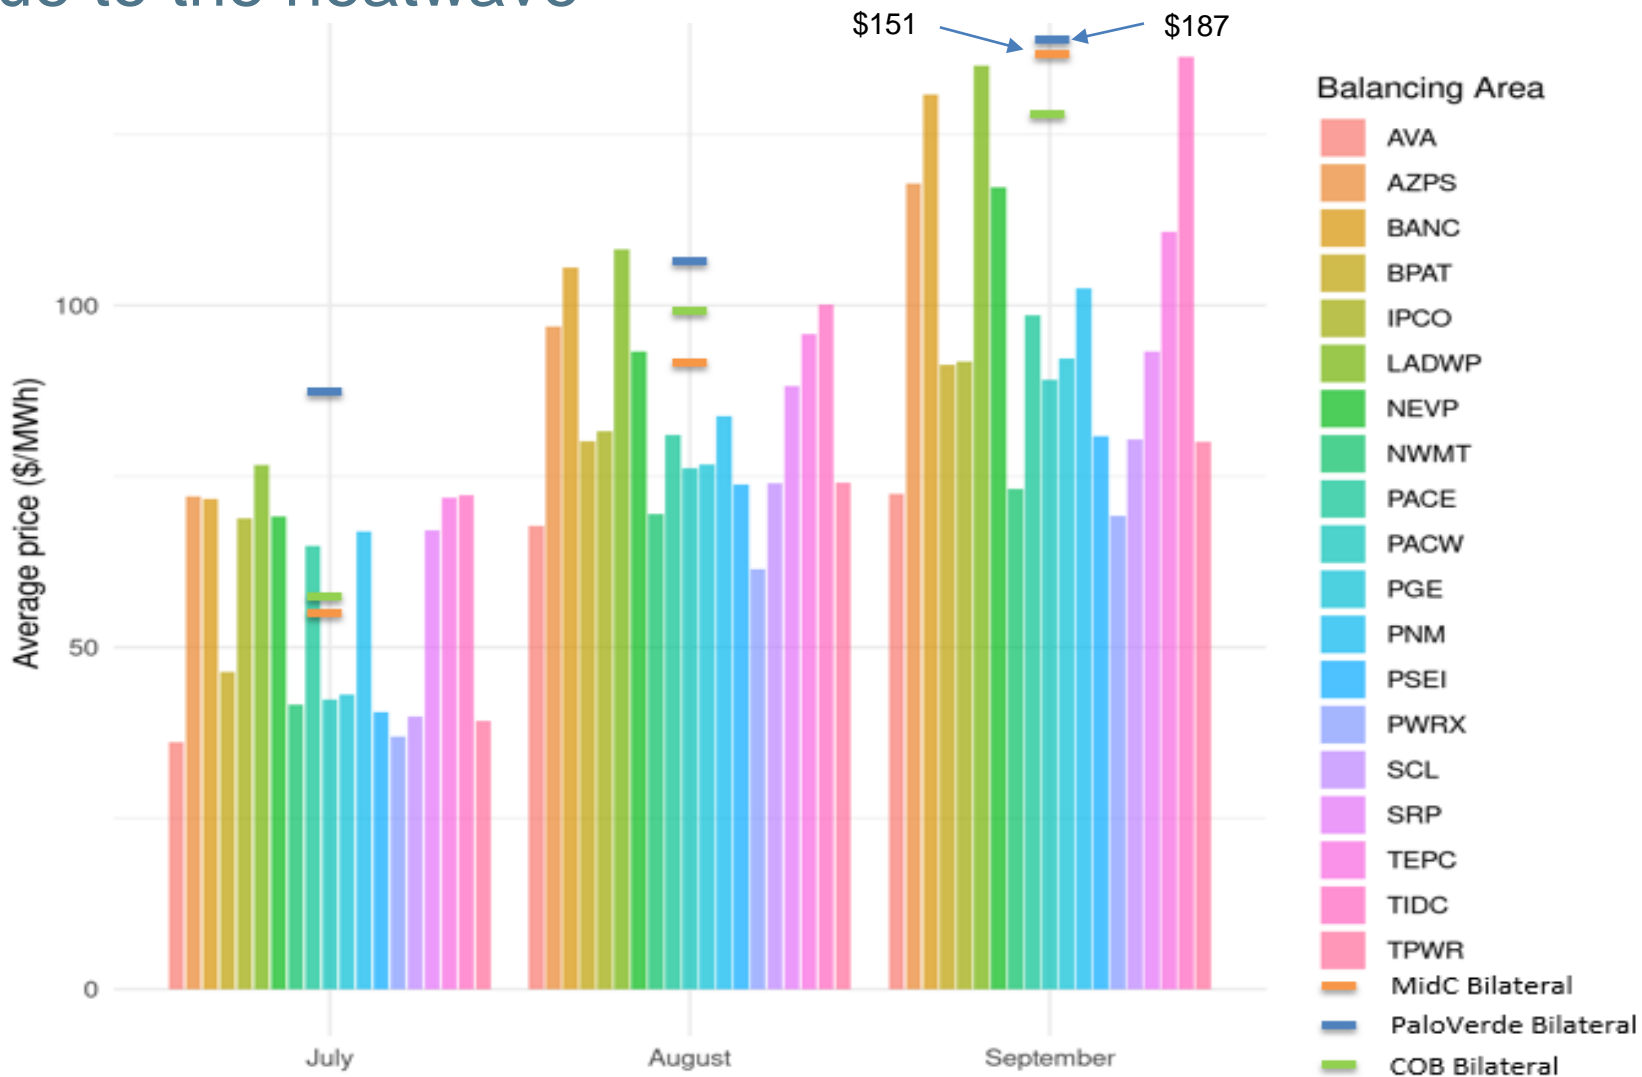

\* The smallest volumes of transfers are not depicted for clarity in the illustration.

# On average net WEIM transfers in Q3 track solar production

# Higher prices observed in September for several areas due to the heatwave

Bilateral prices for Mid-C and Paloverde were much higher than WEIM prices
