## Energy Emergency Alert (EEA) 1 declared and ended

FOLSOM, Calif. – The California Independent System Operator (ISO) declared an Energy Emergency Alert (EEA) 1, at 7:30 p.m. today, and quickly ended the declaration at 8:30 p.m.

An EEA 1 had been declared due to heat conditions and higher than anticipated demand. However, the market was able to secure additional resources and ended the emergency declaration.

At this time, no Flex Alert has been declared and is not planned for tomorrow.

An EEA 1 is called when the grid operator's real-time analysis shows that all resources are committed or forecasted to be in use, and energy deficiencies are expected during the specified time period.

For more details on the different designations, view the [emergency notifications fact sheet](#) on our [News webpage](#).

---

The California Independent System Operator (ISO) is a nonprofit public benefit corporation dedicated, with its partners, to continuous improvement and secure operation of a reliable grid operated for the benefit of consumers. It provides comprehensive grid planning, open and nondiscriminatory access to one of the largest networks of high-voltage transmission power lines in the world, and operates a \$9 billion competitive electricity market. Recognizing the importance of the global climate challenge, the ISO is at the forefront of integrating renewable power and advanced technologies that will help provide a sustainable energy future efficiently and cleanly.

The Western Energy Imbalance Market (WEIM) is a real-time wholesale energy trading market that enables participants anywhere in the West to buy and sell energy when needed. The WEIM Governing Body is the governing authority designed by regional stakeholders and has shared authority with the ISO Board of Governors to resolve rules specific to participation in the WEIM.
