

Western Energy Imbalance Market (EIM) Governance Review Committee (GRC)

Chloe Lukins
September 15, 2020

Public Advocates Office Recommendations

1. The proposed joint authority model should not be approved and the current delegation of authority model should remain.
2. The EIM Governing Body should clarify the expertise that it needs beyond the outside expertise that the DMM and MSC already provide.
3. The Public Interest Group representative should be a voting member.
4. The EIM Governing Body's membership should be representative and reflect the diverse characteristics of the EIM participants, e.g., rural, urban, coastal and inland areas, investor-owned and publicly-owned utilities, ratepayer and environmental advocates, etc.
5. The EIM Governing Body should clarify why the EIM Governing Body needs access to DMM and MSC market data and needs joint authority over approval of MSC members.

Thank you
