# Our Meeting Agenda

---

## Today we will cover...

- Recap TSMSP2 Track 1 – *Monthly Process*
- Understand and walkthrough the application-specific details for daily process
- Prepare for market simulation and readiness activities

# Acronyms

Abbreviation	Term
ATC	Available Transfer Capability
CIRA	Customer Interface for Resource Adequacy
DAM	Day-Ahead Market
IRDT	Intertie Resource Data Template
NLN	Native Load Needs
OASIS	Open Access Same-time Information System
PWT	Priority-Wheeling-Through
SC	Scheduling Coordinator
SIBR	Scheduling Infrastructure and Business Rules
TRM	Transmission Reliability Margin
TTC	Total Transfer Capability
UI	User Interface
WAC	Wheeling Access Charge

[PRR: 1560](#)

## NEW PROCESS FOR ESTABLISHING WHEELING THROUGH PRIORITY

- **Available Transfer Capability (ATC)** is secured in advance on the ISO interties to establish wheeling through priority equal to ISO load.
  - ATC can be reserved in
    - Monthly increments (13-month horizon)
    - Daily increments (7-day horizon).
- Wheeling through transactions without secured ATC in advance will have a lower market clearing priority.

# Implementation Timeline

# New Intertie Resource Request: Register a high-priority wheel

- Submit **New Intertie Resource Request** form a via CIDI ticket
- Navigation: caiso.com > Market & Operations > Network and Resource Modeling
  - Scroll down to the **Resource data submission** section to locate the form

## **Resource data submission**

The Generator Resource Data Template and the Intertie Resource Data Template are used to submit requests to add or change specific operating parameters that reside in the Master File. For updates to existing data, scheduling coordinators must make any changes on the templates downloaded from the Master File user interface or application programming interface. Scheduling coordinators then submit updated templates using the user interface UPLOAD function or the programming interface SUBMIT services. Requests for new system resources should be sent to [RDT@caiso.com](mailto:RDT@caiso.com) in the New Intertie Resource Request template.

 **15-min Self-Scheduled Variable Energy Resource Request** 12/05/2017 16:03

 **Intertie Resource Data Template Version 6.0** 6/11/2021 09:44

 **GRDT and IRDT Definitions** 1/28/2022 10:29

This spreadsheet contains the data field names, descriptions, and related validation rules that apply to the Generator Reference Data Template (GRDT) and Intertie Reference Data Template (IRDT).

 **New Intertie Resource Request** 7/15/2021 09:08

Unmute yourself

or

Raise your hand

# Review Application Specific Details

# webWheel

---

## Section Focus

- Walk through requesting priority-wheeling-through (PWT) for the daily process
- Understand the Capacity Release functionality
- Review the PWT Position & Contract Utilization reports.

Specifically for the Daily Process

# SUBMITTING PWT REQUESTS & VIEWING AWARDS

# Participant Dashboard Refresher

The screenshot shows the Participant Dashboard interface. At the top, there is a navigation bar with 'webWheel |' and 'California IS'. Below the navigation bar, the dashboard is divided into several sections:

- Submission Window Status:** A section with four icons: 'Open' (Completed 6 days ago), 'Lock' (Completed 6 days ago), 'Award' (16 days ago), and 'Publish'. A callout box explains: "Submission Window Status provides summary of where the submission process is at".
- News and Announcements & Activity Log:** A section with two sub-sections: 'News and Announcements' (No News and Announcement have been found) and 'Activity Log'. A callout box explains: "News and Announcements & Activity Log Provides updates on what is happening in the app.".
- Records:** A table with columns: ID, Participant, Contract, Product, Pro-Rata, Partial, Period Start, Period End, Request MW, Status. The table is empty, displaying "No Records Have Been Found". A callout box explains: "Records Summary of user's information. Remember, users are restricted to only see their information.".
- PWT Request Counts:** A section with three rows of buttons: 'Contracts', 'Accepted', 'Rejected'; 'Import Interties', 'Accepted', 'Rejected'; and 'Export Interties', 'Accepted', 'Rejected'. A callout box explains: "PWT Request Counts This area shows participant's requests that have been submitted into the system.".

# Submission Window for Daily Process

- Open for 5 Hours (*between 7am-noon PST each day*)
- Will be defined in the Market Operations BPM

## Monday 3/25/2024

- Participant can request between 3/27 - 4/1/2024
- ✓ Assume daily request for 3/27 is accepted and awarded
- Results published on 3/25 @ 1pm

## Tuesday 3/26/2024

- Day-Ahead Market for Operating Date 3/27/2024 closes at 10AM

Example located in Appendix

# When the Submission Window Opens....

The screenshot shows the top navigation bar of the DATI web application. The 'Operations' menu is expanded, showing the following items: PWT Requests, PWT Awards, Participant Dashboard, Action Log, and LT PWT Awards. A green arrow points from a callout box to the 'PWT Requests' item. The callout box contains the text: **PWT Requests**  
Once the submission window opens, participants will be allowed to enter requests.

# What Questions Do You Have?

Unmute yourself

or

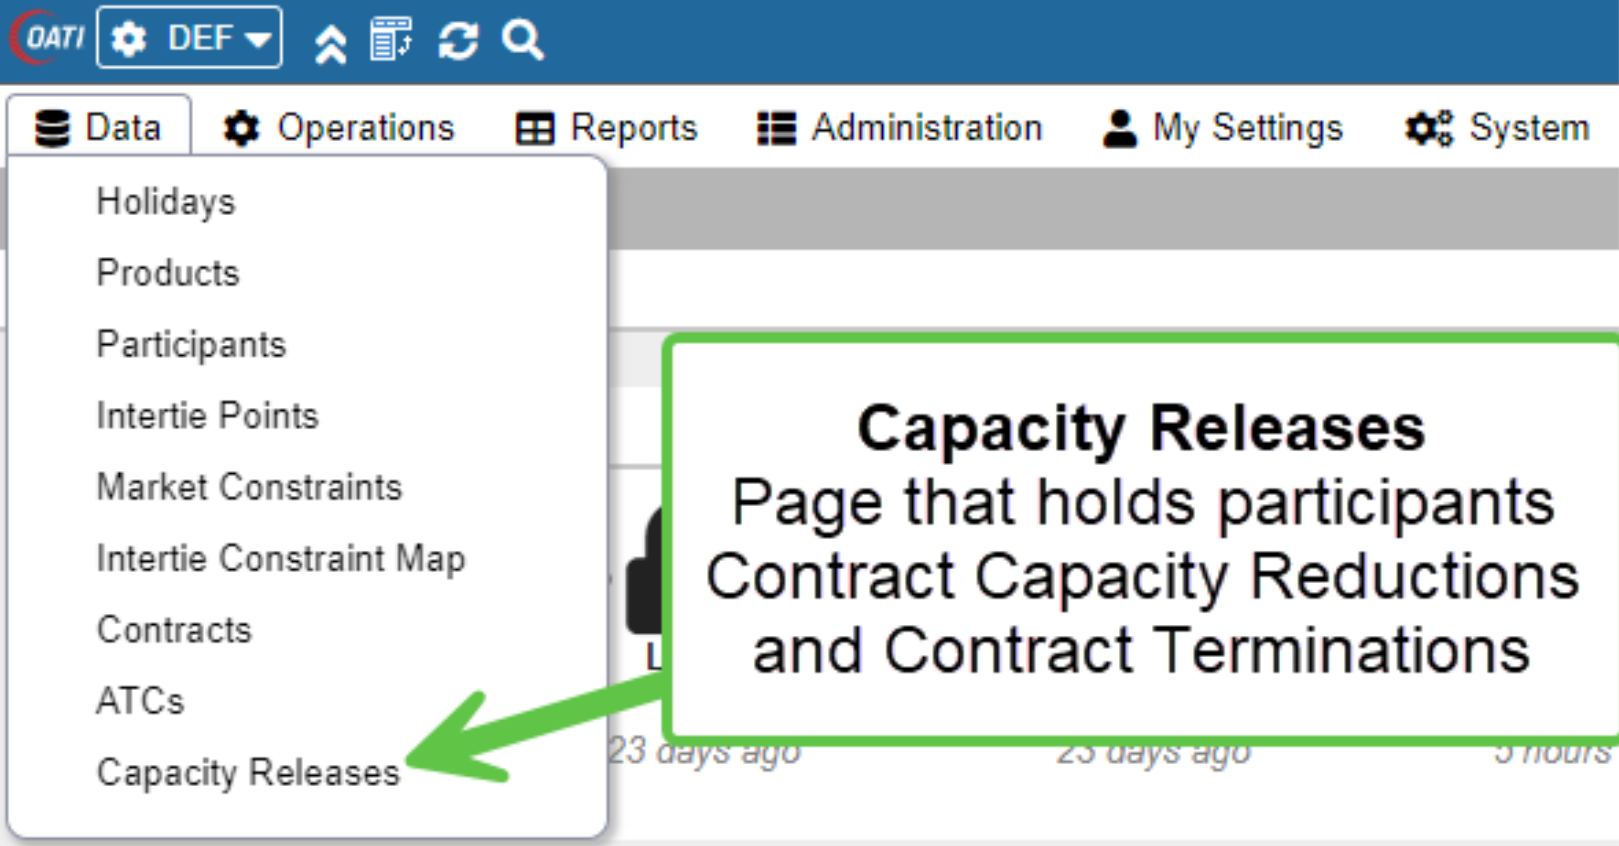

Raise your hand

Understanding where to locate and process

# CAPACITY RELEASES

# Location: Data tab > Capacity Releases

**Not tied to the daily process**

# Capacity Release

The act of releasing PWT ATC back to the market

1

## Contract MW < Awarded MW

Users must reduce the awarded PWT MW positions to the contracted MW.

2

## Service Hours Shorter

Users must cut short the PWT positions to fit the new contracted service hours.

3

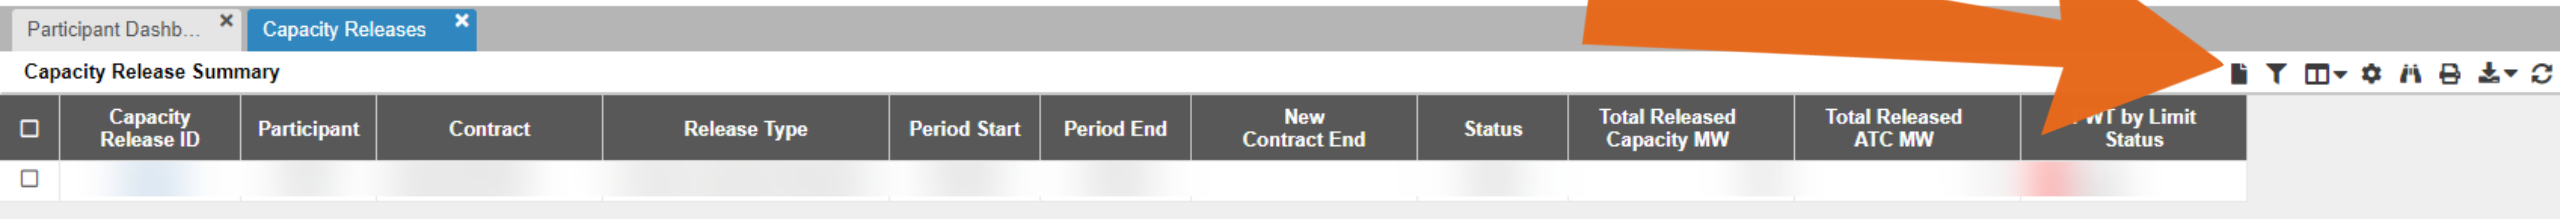

## Shorter Contract Duration

Users must cut short the PWT positions to fit the new contract period.

Users must notify the ISO no later than 11 days before the start of the changed contract

# Capacity Release Summary Page

Participant Dashb... x Capacity Releases x

Capacity Release Summary

<input type="checkbox"/>	Capacity Release ID	Participant	Contract	Release Type	Period Start	Period End	New Contract End	Status	Total Released Capacity MW	Total Released ATC MW	by Limit Status
<input type="checkbox"/>											

**Capacity Release Summary**

High-level overview of capacity reduction and termination requests.

# New Capacity Release Request – *Participant and Contract*

## New Capacity Release

Participant: \*

Contract: \*

Release Type: \*

Original Contract Period:  to

**Participant** and **Contract** are drop down menus from previous registered information.

Select the desired participant/contract that would like to be utilized.

# New Capacity Release Request – *Release Type*

**New Capacity Release**

---

Participant:\*

Contract:\*

 Release Type:\*

Original Contract Period:

- Contract Termination
- Contract Capacity Reduction

**Release Type** will have two options for users to select from:

- Contract Termination
- Contract Capacity Reduction

**Important:** For both Contract Termination and Contract Capacity Reduction, users must notify the ISO no later than 11 days before the start of the changed contract

# New Capacity Release Request – *Contract Capacity Reduction*

## New Capacity Release

Participant:

Contract:

Release Type:

Original Contract Period:  to

Contract Capacity:	Month	Original Capacity MW	Modified Capacity MW	Awarded MW	Modified Award MW		Award MW Mismatch	Released ATC MW
					100368	Total		
	01/2024							
	02/2024							

# New Capacity Release Request – *Contract Capacity Reduction Cont.*

Month	Original Capacity MW	Modified Capacity MW	Awarded MW	Modified Award MW		Award MW Mismatch	Released ATC MW
				100368	Total		
01/2024							
02/2024							

**Original Capacity MW:** This is the MWs the ISO awards users

**Modified Capacity MW:** This is how many MWs participants wanted to change their amount to

**Awarded MW:** This is what participants end up receiving

**Modified Award MW:** The PWT awards that participants can modify to fit their contract

**Award MW Mismatch:** Will indicate to participants how many MWs need to be reduced

**Released ATC MW:** Will indicate the MWs reduced during the capacity reduction

# New Capacity Release Request – Contract Capacity Reduction Example

User is awarded 352 MW

Month	Original Capacity MW	Modified Capacity MW	Awarded MW	100238 (PWT Award)	100253 (PWT Award)	100254 (PWT Award)	Total	Award MW Mismatch	Released ATC MW
06/2024	500	300	352	24	50	7	81	-52	0

**-52 MWs**

**Will need to be 0**

**Will need to be 52**

# New Capacity Release Request – Contract Capacity Reduction Example

Users will decide where to subtract the -52 MWs from the PWT Awards

**-52 MWs**

Month	Original Capacity MW	Modified Capacity MW	Awarded MW	100238 (PWT Award)	100253 (PWT Award)	100254 (PWT Award)	Total	Award MW Mismatch	Released ATC MW
06/2024	500	300	352	24	50	7	31	-52	0

**Let's make this a 0 to remove 50 MWs**

# New Capacity Release Request – Contract Capacity Reduction Example

Notice that the Award MW Mismatch decreases while the Released ATC MW increases

**-52 MWs**

Month	Original Capacity MW	Modified Capacity MW	Awarded MW	100238 (PWT Award)	100253 (PWT Award)	100254 (PWT Award)	Total	Award MW Mismatch	Released ATC MW
06/2024	500	300	352	24	0	7	29	-2	50

**Let's make this a 5 to remove the remaining 2 MWs**

# New Capacity Release Request – Contract Capacity Reduction Example

-52 MWs

Month	Original Capacity MW	Modified Capacity MW	Awarded MW	100238 (PWT Award)	100253 (PWT Award)	100254 (PWT Award)	Total	Award MW Mismatch	Released ATC MW
06/2024	500	300	352	24	0	5	29	0	52

**To know if you were successful**

- ✓ Award MW Mismatch will be 0
- ✓ Released ATC MW -52 (the amount indicated to be released)

# New Capacity Release Request – Contract Capacity Reduction No Impact Example

Month	Original Capacity MW	Modified Capacity MW	Awarded MW	100238 (PWT Award)	100253 (PWT Award)	100254 (PWT Award)	Total	Award MW Mismatch	Released ATC MW
06/2024	500	315	300	24	50	7	29	0	0

**15 MWs extra**

Since you the Modified Capacity MW is larger than the Awarded MW, there is no change needed

# New Capacity Release Request – *Release Type*

**New Capacity Release**

---

Participant:\*

Contract:\*

 Release Type:\*

Original Contract Period:

- Contract Termination
- Contract Capacity Reduction

**Release Type** will have two options for users to select from:

- Contract Termination
- Contract Capacity Reduction

# New Capacity Release Request – *Contract Termination*

**New Capacity Release**

Participant:

Contract:

Release Type:

Original Contract Period:  to

New Contract End:

Month	Original Capacity MW	Modified Capacity MW	Awarded MW	Modified Award MW			Released ATC MW
				100360	100361	100364	
03/2024							
04/2024							
05/2024							
06/2024							

The awards will need to be set as 0

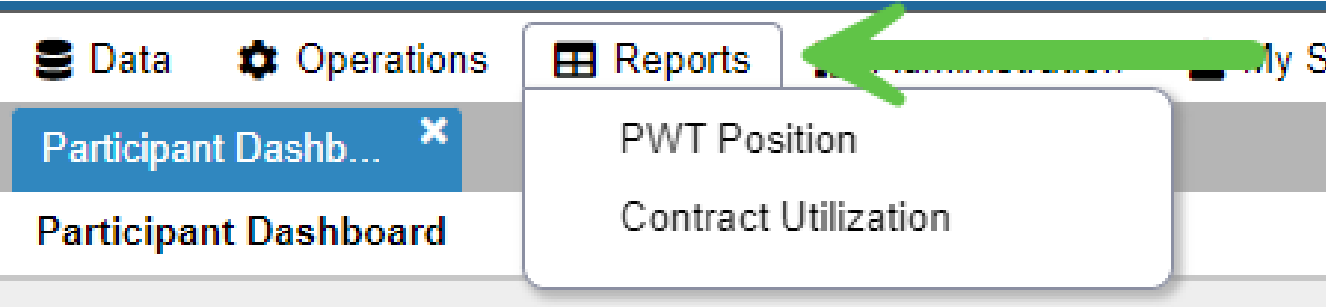

Once the contract is updated, webWheel will check PWT positions and re-adjust them for any violations.

# Scheduling Infrastructure and Business Rules (SIBR)

## Section Focus

- Recapping user expectations in SIBR

# SCs Scheduling Wheeling Remains the Same

- Review: [SIBR User Guide Section 3.2.8 Wheeling Bid Walkthrough](#)
- No UI Changes

The screenshot displays the SIBR interface with the following components:

- Market:** Day Ahead, **Date:** 12/20/2022
- Bid summary table:**

Status	Resource type	Resource ID	State	Daily	Hourly	Energy	Energy Adj	STD	ETC	ETP	TOR
✓	Inter-Tie	_PITTBAY_E_WHL_1			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	N/A			N/A	
✓	Inter-Tie	_POTTBAY_J_WHL_1			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	N/A			N/A	
- Hourly schedule table:**

Hour	Open tie indicator	NERC tag	Schedule coordinator	Schedule point	Primary tie	PSE id	Registered resource	Counter resource
01h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
02h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
03h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
04h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
05h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
06h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
07h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
08h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
09h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1
10h	N						<input checked="" type="checkbox"/>	_POTTBAY_J_WHL_1

Annotations in the image include:

- A red box around the Resource type and Resource ID columns in the Bid summary table.
- A green box around the Registered resource column in the Hourly schedule table.
- A green arrow pointing from the Bid summary table to the Hourly schedule table with the text: "Export Resource names Import as Counter Resource".

# SCs Scheduling Wheeling Remains the Same

## What Happens

When it is time to be awarded PWT, the results are sent from webWheel to SIBR to be stored and validated

## User's Responsibilities

- Participants must validate
1. Resources **Import** and **Export** belong to the same contract
  2. It is scheduled for the wheel transaction

There can only be one counter resource per Wheeling Transaction for the trading hour.

# Open Access Same-Time Information System (OASIS)

# Clicking Pro-Rata and/or Partial

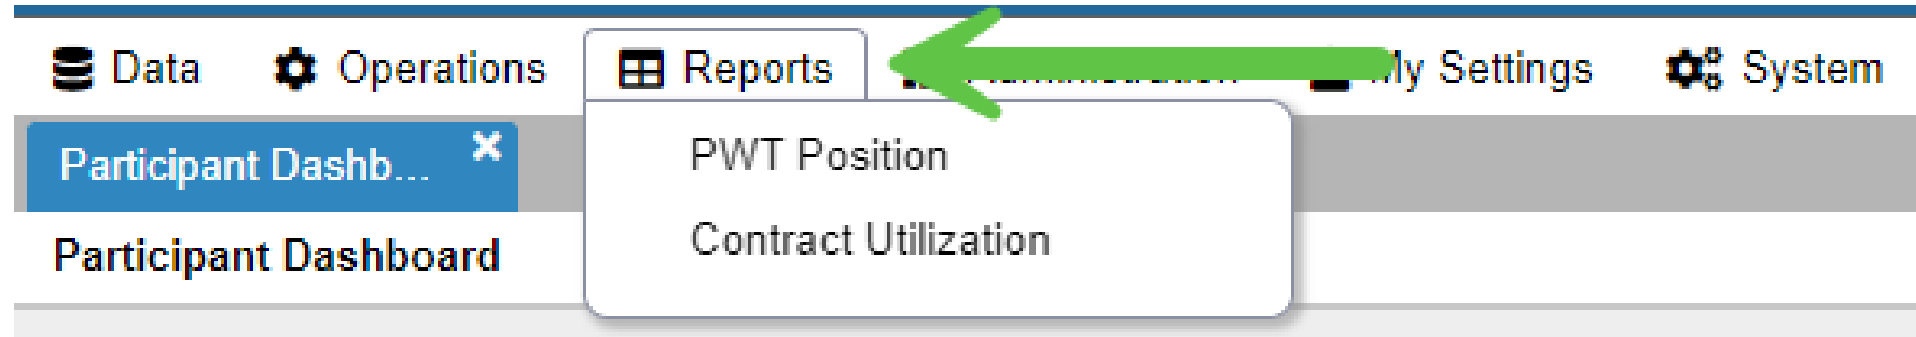

## PRO-RATA

- Yes: Requests can be awarded up to the requested amount for the evaluation period (subset of MWs)**
- No: Requests must be awarded for the full amount for the evaluation period**

## PARTIAL

- Yes: Requests can be awarded for each period included in the request duration (subset of months)**
- No: Requests must be awarded the same amount for all periods of the request**

# New webWheel Reports in Detail

**PWT Position** provides insight to PWT requests:

- Participant, Direction & Intertie
- Contract Capacity (MW)
- Requested (MW)
- Awarded (MW)
- Remaining (MW)
- Released (MW)

**Contract Utilization** provides insight on contracts:

- Contract name, Participant & Product
- Period Start/End
- Profile
- Submission Window
- PWT Request ID
- Status
- PWT Position MW details

## SIBR Example of Export/Import

- There can be a one to many association for Export to Import with a PWT position MW. The Export and Import together per hour in the record are unique.
  - *ExportA* with *ImportB* for 45MW
  - *ExportA* with *ImportC* for 25MW
  - *ExportB* with *ImportA* for 30MW
  - *ExportC* with *ImportB* for 10MW
- There can only be one counter resource per Wheeling Transaction for the trading hour.
- *ExportA* can use either *ImportB* or *ImportC* but not both for a trade hour.

## Let's Walk Through Some Examples Together

An entity registers an **Importing** contract at Point A and an **Exporting** contract at Point B.

There are a few scenarios that could occur with their settlement statements.

# Example – Entity usage is less than the awarded PWT capacity

Monthly Awards: 100 MW  
Daily Awards: 20 MW  
Total Awarded MWs: 120 MW  
Schedule: 80 MWs  
*(did not need 40 of the awarded MWs)*

## WAC Charge

120 MW

**\*New requirement that WAC is charged against wheeling-through capacity, if its schedule is less**

WAC – Wheeling Access Charge

# Example – Entity usage is greater than the awarded PWT capacity

Monthly Awards: 100 MW  
Daily Awards: 20 MW  
Total Awarded MWs: 120 MW  
Schedule: 150 MW  
*(needed an additional 30MWs)*

## WAC Charge

150 MW

**\*It is a current practice that WAC is charged against wheeling-through schedules**

WAC – Wheeling Access Charge

# CGPCWHEELExportQuantity Document

- **Original ATC Transaction:** BAHourlyATCReservationIntertieQty
- **Resale:** BAHourlyATCReservationResaleIntertieQty
- WheelExportExcludingPWTResaleQuantity
  - This covers all original export transactions and calculations
  - The PWT transaction is nested within
  - This formula ensures that the resale quantity will not be included
- WheelExportPWTResaleQuantity
  - This is just for the resale

Transmission service and market scheduling priorities phase 2

# Example of downloading ATC for PWT for the Day and Month

## DAY EXAMPLE

If a user wants to download a file for today at 11:30am, it would include

- Current Day
- Binding day
- Remaining 6 days (not binding)

Each day will have its own file that mirrors the UI report

## MONTH EXAMPLE

If a user wants to download a file for today at 11:30am, it would include

- Current Month
- Binding months
- Remaining 11 months (not binding)

Each month will have its own file that mirrors the UI report

## Getting to know webWheel table features

-  New contract
-  Filter results
-  Column configuration & resetting filters
-  Font display
-  Display views
-  Print
-  Download (xlsx or CSV)
-  Refresh
