Carl Linvill, Chair, EIM Governing Body

**From:** Roger Collanton, Vice President, General Counsel and Corporate Secretary

**Date:** June 11, 2020

**Re:** Notice of Planned Decisional Classification for “Co-Located Resources” – one element of “Hybrid Resources”

---

***Any objection by the Chairs to this decisional classification is due by June 18, 2020.***

This is formal notice of ISO Management’s decisional classification for the tariff amendments regarding “co-located resources,” which is one element of the still-ongoing initiative regarding “hybrid resources.” Any objection by the Chairs to the decisional classification is due by June 18, 2020. Otherwise, this initiative will be presented for decision consistent with the classification described below.<sup>1</sup>

This proposed change falls within the EIM Governing Body’s advisory authority (E2), which means that it will be presented to the ISO Board of Governors for approval with any advisory input from the EIM Governing Body that it elects to provide.

The “hybrid resources” initiative has been included in previous Briefings on Policy Outlook, and the classification of these changes for “co-located resources” is consistent with the classification of the entire initiative as it was presented at the March 12, 2020 meeting of the EIM Governing Body, when the most recent Briefing on Policy Outlook was provided.

The second revised straw proposal for the “hybrid resources” initiative is located [here](#). This paper states on page 2 that it serves as the draft final proposal for the proposed changes regarding co-located resources. An addendum about the proposal for co-located resources, which was issued May 13, is available [here](#). It also notes that the proposal for co-located resources will be submitted for approval at the July Board meeting. Additional relevant papers for this initiative are located [here](#).

---

<sup>1</sup> The process is described in the [Guidance for Handling Initiatives within the Decisional Authority or Advisory Role of the EIM Governing Body](#).

Written stakeholder comments were due May 28, 2020. There were no objections to the decisional classification of either the proposal generally or of this element about co-located resources in particular.
