

Project Description	
1	CAISO BAA EDAM participation
2	Campus operation annual funding
3	Capacity procurement mechanism (CPM) enhancements
4	Control center modernization
5	Corporate and enterprise systems improvements
6	Day ahead market enhancements
7	End-of life technology & vulnerability remediation 2024
8	Energy storage modeling enhancements
9	Extended day ahead market
10	Extended day ahead market onboarding project
11	Facilities reserve funding
12	FERC order 881 managing transmission line ratings
13	FERC order 2222
14	FERC order on generation interconnection enhancements
15	FERC order 897 on transmission and extreme event planning
16	Gas resource management coordination
17	Green house gas coordination
18	Initialization funding for capital project
19	Metering penalty rules of conduct updates
20	Miscellaneous hardware and software purchase 2024
21	Plant information (PI) web services phase 2
22	Price formation enhancements

Project Description	
23	Project office internal labor
24	Renewable and load forecast enhancements
25	Resource adequacy (RA) enhancements
26	Resource interconnection improvements
27	Resource sufficiency evaluation enhancements phase 2 & 3
28	Subscriber participating transmission owner model
29	Technology systems improvements for production 2024
30	Transmission exchange agreement
31	Transmission service and market scheduling priorities phase 2
32	Variable energy resource and storage dispatch enhancements
33	Western energy imbalance market enhancements
