

**Notice to Market Participants Regarding *TO Debits and Negative Pricing for Supplemental Energy***  
**(Tuesday, March 9, 1999)**

On December 11, 1998, and as revised on January 25, 1999, the ISO filed Amendment No. 13 with the Federal Energy Regulatory Commission ("FERC"). By order dated February 9, 1999, the FERC accepted, with few modifications, Amendment No. 13 for filing. Implementation for some of the provisions in Amendment No. 13, including those related to Transmission Owner debits and negative pricing for Supplement Energy, was dependent upon changes being made to ISO software. For these items, the ISO requested an effective date of "the later of February 10, 1999 or seven days after the ISO posts notice on the ISO Home Page that the software is available for use."

By this notice and its posting on ISO Home Page today, the ISO announces that the software required to implement the TO Debit solution and negative pricing for Supplemental Energy will be available for use for day ahead scheduling on Tuesday March, 16, 1999 for operating day Wednesday March 17, 1999.
