ISO Training Schedule

Training Course	Date and time
ISO Workshop: Introduction to ISO Markets (webinar)	August 8 and 9 9am – 12pm PPT
ISO Workshop: Market Transactions (webinar)	August 15 and 16 9am – 12pm PPT
ISO Workshop: ISO Settlements (webinar)	August 22 and 23 9am – 12pm PPT

Are you looking for more training?

The ISO Learning Center has computer based training available for lots of topics. Check out the Learning Center: <http://www.caiso.com/participate/Pages/LearningCenter/default.aspx>

Release Plan Summary

Summer 2023 Release

- Energy Storage Enhancements Track 1
- WEIM Resource Sufficiency Evaluation Enhancements Phase 2 Track 1
- Hybrid Resources Phase 2C – Settlements
- Ancillary Service State of Charge Constraint

Fall 2023 Release

- Energy Storage Enhancements Track 2
- WEIM Resource Sufficiency Evaluation Enhancements Phase 2 Track 2
- WEIM Resource Sufficiency Evaluation Enhancements Phase 2 Track 3
- Washington WEIM Greenhouse Gas Enhancements & Interim Solution Effective May 1, 2023

Independent 2023 Releases

- WEIM Enhancements: Shared Ramping Constraint
- Hybrid Resources Phase 2C – RIMS
- Application Delivery Resiliency

Future Release – Tentative, under further assessment

- Transmission Service & Market Scheduling Priorities Phase 2
- Day-Ahead Market Enhancements
- Extended Day-Ahead Market
- Congestion Revenue Rights System Upgrade

Summer 2023 Release

Summer Release Production Activation

- Customer feedback on timeline received and heard by ISO
- Entire Summer Release moves to 7/1/23 – RSEE2T1, ESET1, ASSOCC, HR2C Settlements
- Deployments to Production by 6/1/23
- [Notices](#) sent 5/19/23

Summer 2023 Release activation rescheduled from 6/1/23 to 7/1/23

MESSAGE

The California ISO has moved the Summer 2023 activations for Resource Sufficiency Enhancements Phase 2 Track 1, Energy Storage Enhancements Track 1, Hybrid Resources Phase 2C - Settlements, and Ancillary Services State of Charge Constraint projects to July 1, 2023.

Due to the short development cycle for this Summer Release compared to the typical Fall Release where customers have more buffer time to make final adjustments to their systems based on final findings from market simulation, many ISO customers indicated the need for this buffer time towards the end of market simulation and the activation date of the Summer Release. The ISO understands the importance of giving our market participants this buffer time and decided to reschedule the activation date of Summer Release to July 1, 2023 due to the constraint that this release needs to be activated at the beginning of a month. The new activation date will allow market participants to finish validation of software changes, market rules, settlements statements, and make any final adjustments accordingly.

The release and project information is available in the Release User Group presentation [here](#) and on the Release Planning page [here](#).

- Resource Sufficiency Enhancements Phase 2 Track 1 Impacted Systems: Master File, SIBR, Market, CMRI, OASIS, and Settlements
- Energy Storage Enhancements Track 1 Impacted Systems: SIBR and Market
- Hybrid Resources Phase 2C - Settlements Impacted Systems: Settlements
- Ancillary Services State of Charge Constraint Impacted Systems: Market, CMRI, and Settlements

The Summer 2023 Release functionality for Resource Sufficiency Enhancements Phase 2 Track 1, Energy Storage Enhancements Track 1, Hybrid Resources Phase 2C - Settlements, and Ancillary Services State of Charge Constraint will remain active in the current market simulation MAP Stage environment so that customers can continue to test and prepare for a July 1, 2023 activation. Customers are encouraged to contact release@caiso.com for any questions or necessary support regarding impacts of this schedule change.

Summer 2023 – Energy Storage Enhancements Track 1

Project Information	Details
High Level Business Problem or Need	<p>This initiative evolves processes and systems to help storage resource scheduling coordinators better manage resource state of charge and continue to ensure efficient market outcomes. The purpose of this initiative is to enhance reliability tools with regards to storage resources. The enhancements include updates to bidding rules, exceptional dispatch of storage resources, and storage resource opportunity costs. The scope of Track 1 covers the enhancements slated for Summer 2023 Release. The remaining scope in the Energy Storage Enhancements Policy will be covered in Track 2 for Fall 2023 Release.</p>
High Level Project Scope	<p>Reliability Enhancements</p> <ul style="list-style-type: none"> • Include expected impacts from regulation in State of Charge (SOC) • Require storage to bid energy in the opposite direction of Ancillary Service (AS) awards <ul style="list-style-type: none"> • A resource providing reserves, regulation up, or regulation down must have energy bids to charge/discharge (respectively) • Energy bids must be 50% of AS awards <p>Reference Level Enhancements</p> <ul style="list-style-type: none"> • Update DA storage resource default energy bid (DEB) to include storage specific opportunity cost
BPM Changes	<p>Market Instruments, Market Operations</p>
Impacted Systems	<p>SIBR, Market</p>

Summer 2023 – Energy Storage Enhancements Track 1

System	High Level Changes
SIBR	New rules to require storage resources to bid energy in the RT market in the opposite direction of their DA AS awards (applies to all AS awards—spin/non-spin, regulation up, and regulation down)
Market	<ul style="list-style-type: none">• Update state of charge (SOC) to include Regulation Up and Regulation Down awards (includes multipliers)• Update storage resource DA DEB to include Opportunity Cost

Summer 2023 – Hybrid Resources 2C Settlements

Project Information	Details/Date
<p>High Level Business Problem or Need</p>	<p>The ISO launched this stakeholder initiative to identify new or enhanced market rules and business processes needed to accommodate hybrid resources, resources that consist of two sets of market rule changes that will facilitate mixed-fuel type (hybrid and co-located resources) project participation in the ISO markets.</p> <p>Prior to this initiative, Phase 1 identified a first set of modifications generally concerned with setting up and operating co-located resources.</p> <p>Building on phase 1, Phase 2 focuses on modifications that will explore how hybrid generation resources can be registered and configured to operate within the ISO market. The initiative will further develop solutions allowing developers to maximize the benefits of their resource’s configuration. Additionally, hybrid resource configurations also raise new operational and forecasting challenges that the ISO plans to address during this initiative.</p>
<p>High Level Project Scope</p>	<p>With this initiative, there’s an opportunity to increase storage and the number of hybrid resources that can connect to the ISO grid. Currently the interconnection queue includes more than 24,000 MW of mixed fuel projects and nearly 20,000 MW of storage which represents roughly half of all generation in the current interconnection queue.</p>

Summer 2023 – Ancillary Services State of Charge Constraint

Project Information	Details/Date
High Level Business Problem or Need	In spring of 2022, the Department of Market Monitoring (DMM) discovered undue market outcomes resulting from regulation down awards to or self-provisions by storage resources for long periods when paired with high energy bids from those resources. Both DMM and the CAISO have concluded that these excess bid cost recovery payments under these conditions cannot be justified by the principles underlying bid cost recovery.
High Level Project Scope	<p>Make storage resources ineligible for Bid Cost Recovery (BCR) uplift for certain market intervals in real time:</p> <ul style="list-style-type: none"> • When the market state of charge (SOC) constraint is binding due to AS Awards causing the market to dispatch resource energy uneconomically. • Retroactively settle relevant intervals (beginning with effective date of 09/20/2022)
BPM Changes	Market Instruments, Market Operations, Settlements and Billing
Tariff Changes	Sections 8.4.3, 8.4.1.1(g), 11.6.6 Note: Tariff filing completed on 09/19/2022
Impacted Systems	RTM, Settlements, CMRI
System	High Level Changes
Real Time Markets (RTM)	Capture RTD/RTPD AS SOC binding constraint shadow price data
Settlements	Design new bill determinants and configurations using the RTD/RTPD AS SOC binding constraint shadow price data for calculation of BCR ineligibility
CAISO Market Results Interface (CMRI)	Develop new external report to inform on AS SOC binding constraint for settlement purposes (resource specific—private report)

	The retroactive data in Settlements will be processed according to the Production schedule for recalc/reruns		
	http://www.caiso.com/Documents/CaliforniaISOPaymentsCalendar2023.xlsx		

Future – Ancillary Services State of Charge Constraint Review

- Postponed: Ancillary Service State of Charge Constraint, straw proposal, hybrid meeting on 4/27/23
- The California ISO has postponed the April 27, 2023 stakeholder meeting on the Ancillary Service State of Charge Constraint (ASSOCC) until the third quarter of 2023 and a notice will be sent once this meeting is rescheduled. The straw proposal comment deadline of May 11 will also be rescheduled.
- The ISO is committed to a stakeholder process to explore compensation when storage resources are subject to the ancillary service state of charge constraint.
- Additional information related to the initiative is available on Ancillary Service State of Charge Constraint webpage.

Fall 2023 – Energy Storage Enhancements Track 2

Project Information	Details
High Level Business Problem or Need	<p>This initiative evolves processes and systems to help storage resource scheduling coordinators better manage resource state of charge and continue to ensure efficient market outcomes. The purpose of this initiative is to enhance reliability tools and the co-located model with regards to storage resources. The reliability enhancements include updates to bidding rules, exceptional dispatch of storage resources, storage resource opportunity costs, and local area minimum online constraints. The co-located model enhancements include preventing co-located resources from charging when beyond generation levels for on-site resources and allowing pseudo-tied resources to use the co-located model. The scope of Track 1 covered the enhancements for Summer 2023 Release. The remaining scope in the Energy Storage Enhancements Policy is covered in Track 2 for Fall 2023 Release.</p>
High Level Project Scope	<p>Reliability Enhancements</p> <ul style="list-style-type: none"> • Include lost opportunity from not generating in storage compensation due to hold Exceptional Dispatch (ED) to hold SOC (i.e. 0 MW ED) <ul style="list-style-type: none"> • Calculate counterfactual energy revenues with and without the SOC hold ED • If prices are below bids counterfactuals will not include discharges • Use actual LMPs (the ISO will not generate counterfactual LMPs) • Include SOC hold ED period through the end of the day in time horizon • Allow for Exceptional Dispatches (EDs) to be issued for storage resources to hold SOC <ul style="list-style-type: none"> • Develop functionality within ED User Interface; automate existing excel tool functionality • Storage may receive a traditional ED or an SOC ED, but not both <p>Co-Located Model Enhancements</p> <ul style="list-style-type: none"> • Develop an electable co-located model available to all storage resources <ul style="list-style-type: none"> • Storage schedules to never exceed renewable schedules (i.e. no grid charging) • Storage may deviate down to match solar, when solar is producing less than schedules in real-time • Deviations to be subject to imbalance energy charges • Require storage resources to submit outages when depleted and unable to charge • Require all resources to respond to operator and ED instructions within physical bounds of operation • Allow for co-located pseudo-tie resources to apply Aggregate Capability Constraint (ACC) <ul style="list-style-type: none"> • Resources under an ACC must be pseudo-tied from the same BAA
BPM Changes	Market Operations, Settlements & Billing
Impacted Systems	Settlements, Market, CMRI, RIMS, MF, OASIS, ADS, OMS, ITS

Fall 2023 – Energy Storage Enhancements Track 2

System	High Level Changes
Market	<ul style="list-style-type: none"> Allow operator to enter exceptional dispatch (ED) in the market to allow for EDs of storage resources by SOC in addition to capacity Update the definition of EDs to allow the operator to enter EDs for storage resources identified with two new Reason Codes under Instruction Type: System Emergency (“SYSEMR”)
ADS	ADS consumes new ED Reason Codes (“SOC Hold” and “SOC Charge”) applicable to storage resources
Settlements	<ul style="list-style-type: none"> New rules to align with Tariff settlement language for SOC formula New inputs for the storage resource ED opportunity cost values Design and configure new charge code for the allocation of ED SOC uplift Modify real-time bid cost recovery (BCR) charge code to account for revenue from storage resources ED SOC uplift Configure No Pay rules and assessment for ED SOC
CMRI	Receive and shall publish the ED SOC information using new UI and API on a new report entitled “Exceptional Dispatch Hold State of Charge”
OASIS	Receive and publish new ED reason Codes (“SOC Hold” and “SOC Charge”) under System Emergency Instruction Type as “Reason” on the Operator Initiated Commitment OASIS Report
RIMS	<ul style="list-style-type: none"> Add field for storage resource duration (hours) Add field for calculated MWh Calculate energy (MWh) using duration*MW Allow pseudo tied resources to be modeled as co-located

Fall 2023 – WA WEIM GHG Enhancements - Overview

Project Information	Details/Date
High Level Business Problem or Need	<p>Pursuant to State of Washington’s recently revised Clean Air Act and beginning in 2023, Washington (WA) will require reporting of emissions associated with Western Energy Imbalance Market (WEIM) transactions. Emissions reporting is a key element of Washington’s new cap-and-invest program that sets a limit on overall carbon emissions in Washington and requires emitters to obtain allowances equal to their covered GHG emissions.</p> <p>This initiative comprises the first phase of enhancements to support reporting WEIM transactions for emissions year 2022. As reporting rules continue to develop, additional enhancements outside of the scope of this initiative will likely be necessary.</p>
High Level Project Scope	<ul style="list-style-type: none"> • Identify resources within WA State boundary • Update WA State associated resources’ greenhouse gas (GHG) reference levels with dynamic pricing using vendor-provided indices <ul style="list-style-type: none"> • Note: while Tariff stipulates use of static pricing as an interim measure prior to the first Washington allowance auction, due to implementation timing, this is not anticipated to be necessary. This first auction is scheduled for February 28, 2023. • Calculate and publish monthly projected GHG prices for Washington State • Develop reports to support WEIM Entity annual reporting to Washington State
BPM Changes	Energy Imbalance Market (EIM), Market Instruments
Tariff Changes	Sections 30.4.4.5, 30.4.5.2, 39.6.1.6.2, 39.7.1.1.1.1, 39.7.1.1.1.2, 39.7.1.1.1.4
Impacted Systems	MF, Internal System, SIBR, OASIS

Fall 2023 – WA WEIM GHG Enhancements - Overview

System	High Level Changes
MF	<ul style="list-style-type: none">• New rule to verify that relevant resources within WA State must provide resource specified GHG emission rate• New attribute at the BAA level to identify BAAs associated with Washington State• New attribute to associate resources within WA State with the State of WA to identify resources with GHG obligation<ul style="list-style-type: none">• Exception: BPA—not subject to WA reporting rule
Internal System	<ul style="list-style-type: none">• Reference level (commitment costs/DEBs) changes to reflect GHG costs<ul style="list-style-type: none">• DEBs to include GHG components for generators inside WA State• Update GHG startup cost curve for resources inside WA State• Update Greenhouse Gas Minimum Load Cost Allowance• Differentiate between CA and WA resources• Capture WA GHG price in the resource-specific minimum load and startup GHG adders for the purposes of commitment cost calculations
SIBR	<ul style="list-style-type: none">• Receive startup GHG adders for the purposes of commitment cost calculations for WA State resources• Confirm GHG curves generated for WEIM resources within WA State are successfully received and processed
OASIS	<ul style="list-style-type: none">• Add WA GHG index prices to existing GHG Index Price OASIS report<ul style="list-style-type: none">• Only applicable for dynamic GHG pricing

2023 – WA WEIM GHG Enhancements – Interim Solution

- ✓ **Effective May 1, 2023**, the CAISO has implemented an alternative interim solution to activate functionality in the Washington WEIM GHG Enhancements initiative.
- The alternative interim solution would allow SCs for resources in Washington to reflect their GHG costs in the default energy bids and commitment costs.
- This effectively activates the tariff language for this initiative and the alternative interim solution will remain in effect until it is replaced with the full initiative implementation later this year. We don't expect the interim solution to delay the implementation of the full functionality.

Independent 2023 Releases

2023 - WEIM Enhancements

Project Information	Details/Date
High Level Business Problem or Need	To collectively address important issues identified by WEIM market participants through Customer Inquiry, Dispute and Information system (CIDI) requests to improve the visibility, functions and features in Energy Imbalance Market (WEIM).
High Level Project Scope	<ul style="list-style-type: none"> • BAAOP: ETSR detail screen will be available to BOTH RTMO and WEIMs. (First drop for testing will only be available to RTMO). • BAAOP: WEIM shared ramping constraint IS NOT editable through UI.
BPM Changes	WEIM, Market Instruments
Tariff Change	Section 29.4
Impacted Systems	RTM/BAAOP, RTM/Integration

System	High Level Changes
Real-Time Market (RTM)	<ul style="list-style-type: none"> ✓ BAAOP: ETSR detail screen <i>May 8, 2023</i> • ETSR detail screen will be available to BOTH RTMO and WEIMs. (First drop for testing will only be available to RTMO). • New ETSR detail screens • Currently in “Coming Soon”
Real-Time Market (RTM)	<p>BAAOP: WEIM shared ramping constraint IS NOT editable through UI. 2023</p> <ul style="list-style-type: none"> • Shared ramping capability constraint • UI for WEIM entity input parameters for ramp sharing • Use in the optimization for each resource based on BAA ramp share parameters

2023 – Hybrid Resources 2C RIMS

Project Information	Details/Date
<p>High Level Business Problem or Need</p>	<p>The ISO launched this stakeholder initiative to identify new or enhanced market rules and business processes needed to accommodate hybrid resources, resources that consist of two sets of market rule changes that will facilitate mixed-fuel type (hybrid and co-located resources) project participation in the ISO markets.</p> <p>Prior to this initiative, Phase 1 identified a first set of modifications generally concerned with setting up and operating co-located resources.</p> <p>Building on phase 1, Phase 2 focuses on modifications that will explore how hybrid generation resources can be registered and configured to operate within the ISO market. The initiative will further develop solutions allowing developers to maximize the benefits of their resource’s configuration. Additionally, hybrid resource configurations also raise new operational and forecasting challenges that the ISO plans to address during this initiative.</p>
<p>High Level Project Scope</p>	<p>With this initiative, there’s an opportunity to increase storage and the number of hybrid resources that can connect to the ISO grid. Currently the interconnection queue includes more than 24,000 MW of mixed fuel projects and nearly 20,000 MW of storage which represents roughly half of all generation in the current interconnection queue.</p>
<p>BPM Changes</p>	<p>Settlements & Billing</p>
<p>Impacted Systems</p>	<p>Summer 2023: Settlements</p> <p>Independent 2023: RIMS</p> <p>Completed: Today’s Outlook, ISO Today Mobile Application, Reports</p>

Congestion Revenue Rights (CRR) Upgrade

Project Information	Details/Date
High Level Project Scope	<p>The Congestion Revenue Rights (CRR) system was implemented by CAISO in 2008 as part of the Market Redesign and Technology Upgrade (MRTU) implementation. The current CRR system is at its end of life, does not have the flexibility to accommodate future policy changes and requires the ISO to calculate data and run processes manually outside the current system to produce a successful CRR Auction.</p> <p>The CAISO has decided on a significant upgrade of the existing CRR system and adopt the latest technology stack aligned with CAISO's technology standards, consolidate all CRR related functions, minimize human errors, reduce processing time, eliminate manual workarounds, and positions the system to accommodate policy changes down the road.</p> <p>Congestion Revenue Rights (CRR) system replacement project scope is the roll-out of a:</p> <ul style="list-style-type: none"> • Brand new user-interface (UI) system with an updated new look-and-feel, to replace the existing legacy system implemented during the MRTU 2008 go-live and brought up to current ISO technology standards • Set of application-programming interfaces (APIs) to enable integration between ISO and market participant systems <p>Overall, to support the following in one consolidated CRR external-facing system:</p> <ul style="list-style-type: none"> • Annual/Monthly Auction and Allocation market participant bid submission and results retrieval • Load data submission by CRR LSEs, CEC • Load migration data submission by CRR UDCs • Secured "Congestion Revenue Rights Full Network Model" information access • Private and public access of CRR market input and output information
BPM Changes	<p>Congestion Revenue Rights</p> <ul style="list-style-type: none"> • Enhancements made to the new CRR product. • Automatic publishing of CRR market results. • Automatic CRR notification. • New CRR schedule calendar. • New CRR FNM access. • New CRR data submission and download interface UI/API. • New CRR market results interface. • Load Migration
Tariff Change	<p>No</p>
Impacted Systems	<p>CRR, AIM, CMRI, OASIS, CTS, Market Clearing, EMMS, IFM/RTN, MQS, Master File, MPP, Settlements, WebOMS, ETCC.</p>

Stay Informed

Ways to participate in releases

- Visit the Release Planning page
 - <http://www.caiso.com/informed/Pages/ReleasePlanning/Default.aspx>
- Attend meetings
 - Release Users Group (RUG) bi-weekly meetings
 - Initiative status updates
 - System change updates on independent releases
 - Market Simulation calls
 - Visit the ISO calendar at www.caiso.com for meeting dates and times and add events to your calendar
 - Typically held on Mondays and Thursdays
 - Market Performance and Planning Forum
 - Bi-monthly review of market performance issues
 - High level discussion of release planning, implementation and new market enhancements
