Release User Group Agenda

October 6, 2020   *10:00 a.m.–11:00 a.m.* (Pacific Time)

Web Conference Information	Conference Call Information
Web Address: https://caiso.webex.com/meet/RUG Meeting Number: 960 941 245 Audio connection instructions will be available after connecting to the web conference. When prompted, select "Call me" and enter the phone number you will use during the call. You will be called by the conference shortly.	Dial-in Number: 866-528-2256 International Dial-in: 216-706-7052 Access Code: 291 426 5
Calls and webinars are recorded for stakeholder convenience, allowing those who are unable to attend to listen to the recordings after the meetings. The recordings will be publicly available on the ISO web page for a limited time following the meetings. The recordings, and any related transcriptions, should not be reprinted without the ISO's permission.	

Release User Group Agenda

October 6, 2020   *10:00 a.m. – 11:00 a.m. (Pacific Time)*

Time	Topic	Facilitator
10:00 – 10:05	Agenda & ISO Roll call	Adrian Chiosea
10:05 – 10:45	Release Plan	Janet Morris Trang Vo Jeremy Malekos Rashele Wiltzius

The ISO offers innovative training programs

Date	Training courses and workshops
October 15, 2020	Welcome to the ISO Webinar
November 2-3, 2020 (9am – 12pm)	Intro to ISO Markets
November 9-10, 2020 (9am – 12pm)	Market Transactions
November 16-17, 2020 (9am – 12pm)	ISO Settlements
	Email us at CustomerReadiness@caiso.com for any training or readiness related questions

CustomerReadiness@caiso.com

Computer Based Training

There are more than 20 computer based training modules on the ISO website covering: Markets and Operations, Settlements and Metering, Reference Materials, Western Energy Imbalance Market and more!

New Modules (recorded webinar and slides)

You can now find the following new initiatives training courses on the learning center web page:

- ADS Training Part 1 & 2
- DOT Tariff Clarification
- Excess Behind the Meter Production

- ESDER 3B
- FERC 841
- Market Settlements Timeline Transformation

Visit our **Learning Center** web page to access our training calendar, register for courses and find other informational resources:
http://www.caiso.com/participate/Pages/LearningCenter/default.aspx

California ISO

Release Plan Summary: 2020

Independent 2020

    Activation – Nov 4

- Aliso Canyon Phase 5
- FRP Improvements - Buffer and Min
- Slow Demand Response
- Energy Imbalance Market (EIM) Enhancements 2020

    Activation - Dec 1

- Hybrid Resources - Phase 1
- Commitment Costs and Default Energy Bid Enhancements Phase 1

    Activation– Jan 1, 2021

- Nodal Pricing Model – Advisory Service for PacifiCorp - Settlements Effective Date
- Intertie Deviation Settlement
- EIM Enhancements Symmetrical Wheeling
- Q4 Winter Release - Settlements

Fall 2020

    Activation on Jul 1 (retroactive)

- Commitment Cost Enhancement Tariff Clarifications

    Activation on Oct 1

- Energy Storage and Distributed Energy Resources Phase 3B
- FERC Order 841 – Requested Adjustments
- Automated Dispatch System (ADS) User Interface (UI) Replacement
- Dispatch Operating Target Tariff Clarifications

    Activation on Jan 1, 2021

- Excess Behind the Meter Production
- Market Settlement Timeline Transformation

California ISO

Release Plan Summary: 2021 - 2022

Independent 2021

- System Market Power Mitigation Phase 1 (BOG Nov 2020 and implementation prior to Q3, 2021)
- Variable operations and maintenance cost review (BOG Nov 2020)
- Real-Time Settlement Review (BOG Dec 2020)
- FERC Order 831 - Import Bidding and Market Parameters – (BOG Sept 2020)
- Pseudo Ties for Shared Resources (JOU Modeling) – (BOG Nov 2020)

Spring 2021

- Energy Imbalance Market (EIM) 2021 - BANC Ph 2/WAPA
- Energy Imbalance Market (EIM) 2021 - Turlock Irrigation District
- Energy Imbalance Market (EIM) 2021 - Public Service Company of New Mexico
- Energy Imbalance Market (EIM) 2021 - North-Western Energy
- Energy Imbalance Market (EIM) 2021 - Los Angeles Dept. of Water and Power

Fall 2021 – tentative, subject to impact assessment

- Resource Adequacy (RA) Enhancements (BOG Q1 2021)
- Energy Storage and Distributed Energy Resources Phase 4 (BOG Oct 2020)
- Flexible Ramping Product Refinements (BOG Oct 2020)
- Hybrid Resources Phase 2 (BOG Nov 2020)

Spring 2022

- Energy Imbalance Market (EIM) 2022 - Avista
- Energy Imbalance Market (EIM) 2022 - Tucson Electric Power
- Energy Imbalance Market (EIM) 2022 – Tacoma Power
- Energy Imbalance Market (EIM) 2022 – Bonneville Power Administration
- Energy Imbalance Market (EIM) 2022 – Xcel Energy - Colorado

Fall 2023

- Day Ahead Market Enhancements (BOG 2021)
- Extend DA Market (BOG 2021)

2020 – Aliso Canyon Ph5

Project Info	Details/Date
Application Software Changes	**Scope**: This project will consider enhancements to the existing Dynamic Competitive Path Assessment (DCPA) and Gas Nomogram capabilities currently in production. **IFM/RTN**: Formulate and solve the linear programming problem for maximizing the Residual Supplier Index (RSI) for each binding constraint that DCPA is applied. **SMDM:** Enhance the User Interface to include "All Markets" when the user is defining "Market" within the Curtailment to Process section. **SMDM:** Creation of error message if the RT curtail type "incremental" or "absolute" are used and total curtailment is left null.

2020 – FRP Improvements – Buffer and Min

Project Info

Improvements are needed for addressing the flexible ramping product (FRP) issues identified in the CAISO Energy Markets Price Performance report. The flexible ramping product secures additional ramping capability that can be dispatched in subsequent market runs to cover a range in the forecasted net load.

The scope behind this policy and project include:

- Scope 1 (2020) - To maintain up to 100% (configurable) of FRP awards in the buffer interval that were procured in the prior Fifteen Minute Market (FMM) to preserve ramping capability for the Real Time Dispatch (RTD).
- Scope 2 (2021) - Changing Proxy Demand Response (PDR) dispatch capability default from five minute to hourly.
- Scope 3 (2020) - To enforce a minimum FRP requirement in the Balancing Authority Area (BAA) that will ensure a minimum amount of FRP to be procured from resources within the BAA.

2020 – Slow Demand Response

Overview

Following up on Proxy demand resource - resource adequacy clarifications policy initiative

The Master File GRDT (Generator Resource Data Template) will be updated with a new field called "SLOW DR" (GRDT v14).
- Field will be populated with Y, N or NULL
  - YES means the PDR or Curtailment LSR resource has been designated "slow"
  - NO means the PDR or Curtailment LSR resource has NOT been designated "slow" and
  - NULL means the resource is neither a PDR nor a Curtailment LSR

A resource is designated "slow" when it meets one or both of the following criteria:
  - Startup + ramp is greater than 20 minutes to reach PMAX, or
  - A bid dispatchable option of Hourly or 15 minute has been elected by the resource (this is done through a GRDT request)

"SLOW DR" will be a read-only field for Market Participants, indicating the resource met one or both of these criteria.

The Market Instruments BPM Attachment B will be updated to add the definition of the slow demand response resource designation.

For PDR or PDR_LSR where BID_DISP_OPT >= 15 or startup time plus ramp time to Pmax >= 20

At www.caiso.com\Stay Informed\Release Planning\Independent 2020\Slow Demand Response

Activation anticipated in November 2020. ISO will communicate in advance the actual activation date.

California ISO

2020 – EIM Enhancements 2020

Project Info	Details/Date

Application Software Changes	**Scope:**
	Energy Imbalance Market Enhancements (EIM) 2020 is a collection of important issues identified by EIM market participants through Customer Inquiry, Dispute and Information system (CIDI) requests to improve the visibility, functions and features in the Energy Imbalance Market.
	
	Technology team and customer services review the 66 EIM enhancement requests by EIM entities and 4 internal request by ISO market operator. Combine each EIM entities submitted the priority list of 10 enhancements, ISO determine to include total 14 requests in EIM enhancement 2020 project.
	
	Impacted Systems:
	BAAOP
	• Allow EIM entity override activation for the contingencies up to 15 in NA contingency list
	• Add visibility of other adjacent BAA's ETSR locks and reasons
	• Add Static ETSR transfer data to RTD Dispatch Control Display (ETSR tab). Add Static ETSR transfer data to BAAOP ETSR Detail Display (in RTD)
	• Fix/Improve SVG One Lines. Request to be able to view SE and telemetry values for all substation flows and elements. – available after Market Sim
	• In RTD/RTPD Dispatch Control display, in Dispatch Instruction Review table, add columns for UP and DN remaining ramp capacity (5/15 minute respectively). In addition, include the sum of these columns at bottom of table. Example Calculation: RTD UP Ramp = MIN(5MinRampRate, [UpperLim-CurrentDispatch].
	• Add Supplemental DOT to VER resources to Dispatch Control displays; Detail: In BAAOP RTD/RTPD Dispatch Control, add SUPP DOT column
	• Fix the functionality for Manual Dispatches - users should be able to utilize MSG functions, such as designating a specific configuration, and users should be able to do commitment override
	• EIM Entities have a notification status of market inputs, showing if BAAOP received the latest payload of critical market inputs. Example Critical data submissions: (not all inclusive)
	    • BAAOP Dynamic Limits
	    • BAAOP RTIS
	    • ALFS (load forecast and/or VER forecast)
	    • ICCP link

2020 – EIM Enhancements 2020 (cont.)

Project Info	Details/Date
Application Software Changes (cont.)	**<u>Impacted Systems:</u>** **BSAP** • Add Manual Dispatch information to BSAP Resource Bal Viewer. Add any applicable deviations that used in the test to BSAP BAA Bal Viewer. • For the Bid Range Capacity Test Results report, Requirement Amount Column needs to publish the true requirement, not just the INCREMENTAL/DECREMENTAL requirement **RTM** • Publish the data of the MW infeasibility data and ABC Up and Down Dispatches of RTPD/RTD • Publish the effective load bias for the market run for RTPD and RTD • Publish the effective ETSR import and export limits for the market run for RTPD and RTD • Support Pump Storage for EIM BAAs **CMRI** • Display and publish, download the data of the MW infeasibility data and ABC Up and Down Dispatches of RTPD/RTD • Display and publish, download the data of the effective load conforming for the market run for RTPD and RTD • For the Bid Range Capacity Test Results report, Requirement Amount Column needs to display and publish, download the true requirement, not just the INCREMENTAL/DECREMENTAL requirement. Only upstream has changes with regards to the data that is sends to CMRI. **Settlements**

2020 – EIM 2020 – Symmetrical Wheeling

Project Info	Details/Date
Application Software Changes	**Scope**: This project will allow EIM to settle Base ETSR attributes to support Base ETSR Imbalance Energy settlements between two EIM BAAs at a mutually agreed price. The enhancement is for base ETSR price setting to result in symmetrical settlement of wheeling through EIM BAAs enhancement. **RTM:** Update LMP price setting for Base ETSRs to be associated with From BAA of the Base ETSRs and retire split ratio price setting **MasterFile:** Retire the definition of the Base ETSR split ratio and From/To financial location. **Settlements**: Update formulation of Base ETSR export/import in Real Time Congestion Offset EIM and Real Time Marginal Losses

California ISO

2020 – Hybrid Resources Phase 1

Project Info	Details/Date
Application Software Changes	**Scope:** Phase 1 of the Hybrid Resource Initiative will introduce co-located resources which are two or more resources sharing the same point-of-interconnection to the grid. In cases where the interconnection capacity is below the maximum aggregate output of the co-located resources, an aggregate capability constraint (ACC) will be modeled to ensure the total dispatch of the ACC's associated resources are within its maximum and minimum limits. The markets will support co-located resources for ISO and EIM (participating and non-participating) resources. Hybrid Resources will be introduced at a later time in Phase 2 of the initiative. **MasterFile:** Enhance to include Co-Located Status, Aggregate Capability Constraint Limits **IFM, RTM:** Enhance market model to optimize energy dispatch for co-located resources behind a generation capability nomogram constraint. Add ISO and EIM Operator display for ACC limit override (allowing reduction of ACC limits for a fixed time). Add energy congestion management logic to create and enforce POI limit constraints. **Price Corrections Tool** (internal to ISO)**:** Price correction logic will reflect the Point-of-Interconnection (POI) pnode LMP as the price for co-located resources. **ALFS:** Time periods where co-located VER are operating with negative supplemental DOT will be excluded from data forecast model training by ISO-provided FSP.
BPM Changes	Definitions and Acronyms, Energy Imbalance Market, Generator Management, Market Instruments, Market Operations, Metering, Reliability Requirement
Tariff Changes	Tariff amendments will define Aggregate Capability Constraint, Co-Located Resources, Point of Interconnection. Phase 1 interim will not support Ancillary Services for co-located resources (will be supported in future).

2020 – Commitment Cost and Default Energy Bid Enhancements Ph1

Project Info	Details/Date
Application Software Changes	**Scope:** Enhances the ability to submit market-based commitment cost bids in order to reflect unique costs and volatility: • Ex-ante cost adjustment requests • Reference Level Adjustments to default commitment cost bids (start-up and minimum load costs) and default energy bids • Make Day Ahead Market process permanent • Make D+2 Process permanent • Use of indices clarification, and Monday Only in DAM and RTM, per LMPME • Conditionally Available Resources (CAR) **Impacted Systems:** • SIBR: Allow the submittal of Ex Ante cost adjustments. • CMRI: Provide additional source information for default bids. Submit requests through CIDI for manual consultation and ex-post default bid adjustments.
BPM Changes	• Market Instruments • Market Operations
Business Process Changes	• Maintain Major Maintenance Adders (MMG LIII) • Maintain Negotiated Default Energy Bids (MMG LIII) • Maintain Negotiated O_Ms (MMG LIII) • Manage Day Ahead Market (MMG LII) • Manage Market Billing Settlements (MOS LII) • Manage Real Time Hourly Market (RTPD) (MMG LII) • Manage Real Time Operations – Maintain Balance Area (MMG LII)

2020 – Nodal Pricing Model – Advisory Service for PacifiCorp

Project Info	Details/Date
Reference	Reference – ISO market notice from Dec 18, 2019 – see: Stay Informed\Meetings and Events\Miscellaneous stakeholder meetings\Previous Meetings\2019 meetings\PacifiCorp nodal pricing model service informational call - Dec 18,2019 or http://www.caiso.com/Pages/documentsbygroup.aspx?GroupID=E8304346-54B9-4473-9E45-9C282AAD1340 Reference - NPM FERC filing http://www.caiso.com/Documents/Dec20-2019_NodalPricingModelAgmt_CAISO-PacifiCorp_ER20-664.pdf#search=NPM
Excerpt from the market notice:	"The California ISO is hosting an informational stakeholder call on Dec. 18, 2019, to discuss an agreement that it intends to file with Federal Energy Regulatory Commission (FERC) that will provide PacifiCorp with an advisory nodal pricing model (NPM) service. Information related to this effort available on the ISO website at http://www.caiso.com/informed/Pages/MeetingsEvents/MiscellaneousStakeholderMeetings/Default.aspx. This service will produce separate advisory day-ahead nodal pricing results for locations within PacifiCorp's balancing authority areas, without a financial settlement or impact to the ISO's day-ahead market. PacifiCorp will pay the ISO's estimated cost to provide the service. PacifiCorp plans to use the NPM solution results as the basis for its power cost allocation among the states within which it provides retail electric service, consistent with the recently filed inter-jurisdictional cost allocation agreement."

2020 – Intertie Deviation Settlement

Project Info	Details/Date
Application Software Changes	**Scope:** Implement a new Under/Over Delivery Charge for intertie deviations from Market Schedule and After-The-Fact (ATF) E-Tag, to replace Decline charge **Impacted Systems:** **Settlements** • Calculate FMM binding intertie award, exclude Curtailment, calculate under/over delivery quantity as deviation of schedule and ATF E-Tag, Charge under/over delivery Charge at 50% of RTD LMP. • Remove the decline charge calculation and Decline Threshold • Allocate Over/Under delivery charge to measured demand **ADS** - display the HASP schedule, the scheduling coordinator accepted value, and the difference between the two **RTM** - determine the 15-minute binding award for hourly intertie resources based on the E-Tag at T-40.

Settlements Q4/Winter Release

Release Milestones as follows:

- 1st draft technical documentation posted = 8/10
  - Posted IDS and Day Ahead Nodal (NPM project)
- 1st draft configuration output file + initial release component summary posted = 8/25
  - Will include current project scope -> IDS, Day Ahead Nodal & Symmetrical Wheeling
  - Also 1st draft tech doc for Symmetrical Wheeling
- 2nd draft configuration output file + 2nd draft tech docs + updated release component summary posted = 9/14
  - Includes 2 dispute related production adjustments:
    - RTM Net Amount PC for RMR capacity payment
    - Spin Non-Spin No Pay Quantity PC for fast start units
- 3rd draft configuration output file (pre market sim) to post = 10/9
- MAP-Stage deployment - 10/6
- Connectivity for PAC 10/13 - 10/21
- Structured scenarios 10/27 - 11/4

Winter 2020 settlements release draft settlements technical documentation:

OMS Roadmap for 2020

Release	Major Changes	Participant	MAPStage	Production
2.2.208.1	Remove defaulting discovery date - For retro-active outages submit discovery date. - Handle no discovery date if not previously submitted.	All	Mid-October	TBD
	Aggregate Resource Outage retrieve results changes - Handle receiving only parent and impacted children.	All		
	Transmission Retrieve Changes - If moving to new version (= 10012020), consume new XSD and handle receipt of multiple change requests.	All		
	Retrieve Resource/Transmission outage change request - Limiting to 50 - Disable querying with participant ID & Date Range. - Query by Outage ID, Change request ID and Equipment ID/Resource ID	All		

California ISO

OMS Roadmap for 2020

Release	Major Changes	Participant	MAPStage	Production
2.2.209	TOP Calculations for shared equipment - Based on participant ID TOP attribute will be comma separated TOPs.	All	Mid – December	TBD
	Communication and RAS changes - Handle Providing these flags for Nature of Work for communication and Relay work. - RAS flags - UI change (RAS/SPS Out of Service, RAS/SPS Reduced Redundancy, Protection Zone, EMS/ICCP Outage) will be changed from Y/N to Y/N/NA(Undefined or Null)	All		
	Significant Outage flag determination. - Flag will be displayed in the version history of the outage - Please see May 2020 - CPG slide deck for more details.	All

Fall 2020 – CCE Tariff Clarification

Project Info

Commitment Cost Enhancements Tariff clarifications project is focused on use of limited, conditionally available resources and run-of-river resources and to clearly reflect these clarifications in the CAISO tariff. This policy covers bidding obligations, notification of outage requirements to the ISO and Resource Adequacy Availability Incentive Mechanism (RAAIM) obligation to the resource type discussed in this initiative. The principle driver in the Commitment Costs Enhancements Tariff Clarifications policy is to allow for expanded market participation from all use-limited resources including the hydro fleet.

- Clarify tariff language that resources can be both use-limited and conditionally available and permitted to submit outage cards available to both designations

- Clarify tariff language that conditionally available resources should submit outage cards when unavailable while limiting outage card use for certain Nature of Work (NOW) classifications

- Provide definition for Run of river (hydro) resources and specify that they have similar treatment to Variable energy resources (VER)(wind/solar)

- Provide RAAIM exemption for run of river hydro resources

Energy Storage and Distributed Energy Resources Phase 3B – Transition Timeline
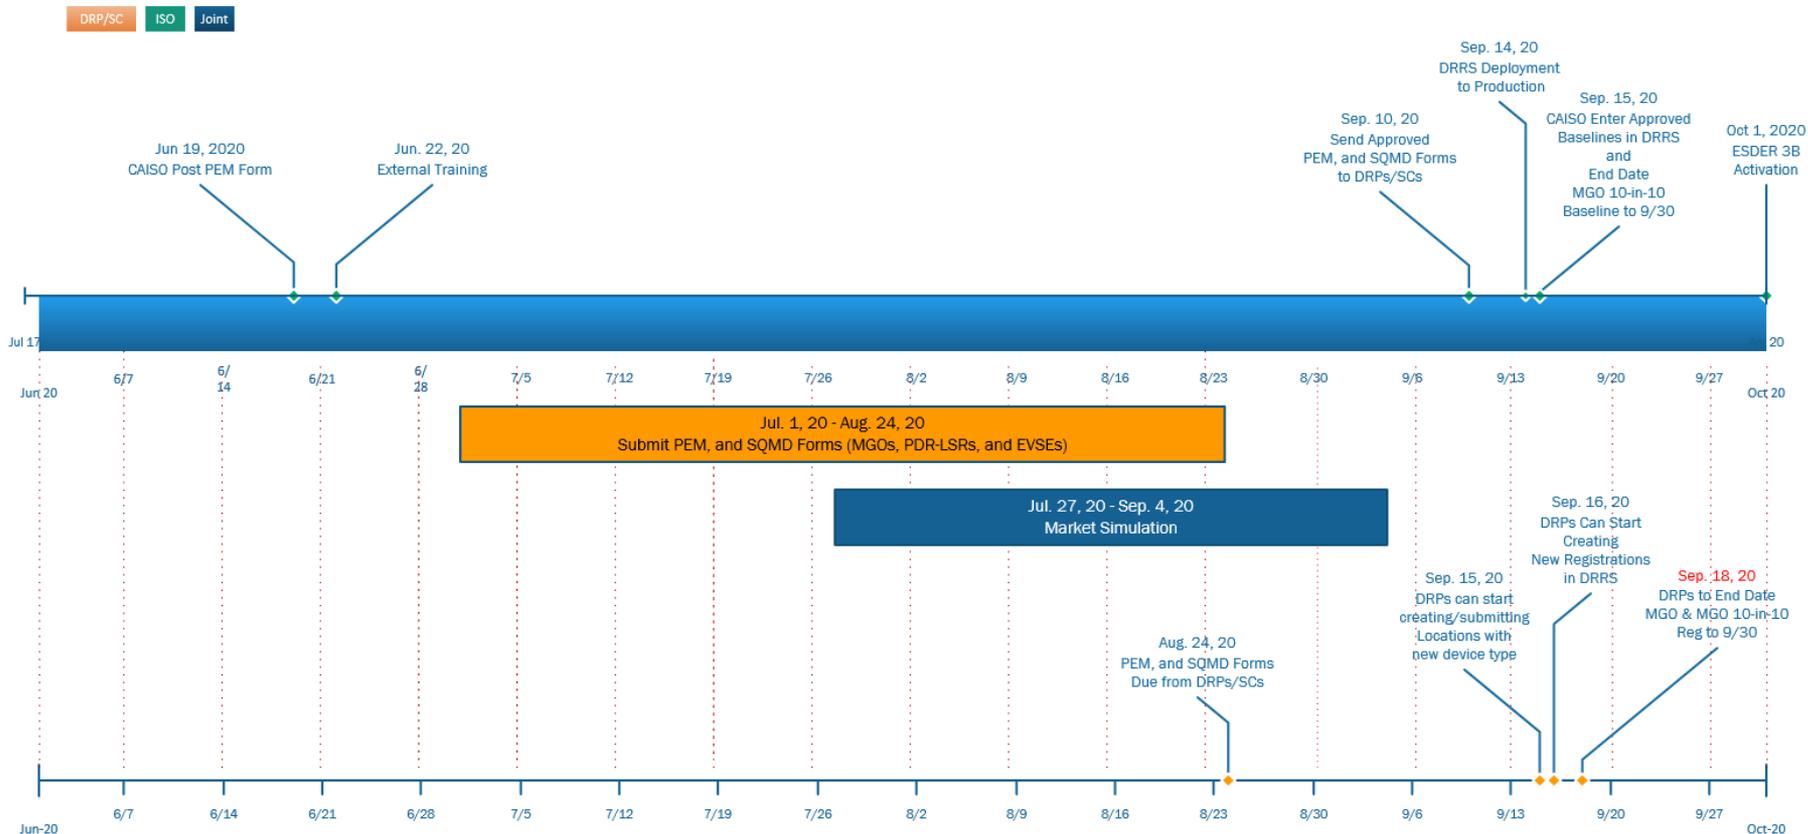

Note: SC shall follow the normal Master File process. Master File may take up to 10 business days for processing.

Fall 2020 – FERC Order 841 – Requested Adjustments

Project Info

In November, 2019 FERC responded to ISO compliance filing for FERC Order No. 841. FERC generally accepted CAISO compliance filing, finding that the NGR model and pumped storage model account for the physical and operating characteristics of storage, and that the CAISO appropriately does not assess TAC to energy storage.

FERC took some exceptions with CAISO compliance filing, as follows:

- While accepting that the NGR and Pumped Storage model accommodate the physical and operating characteristics of storage, FERC directs the CAISO to capture the corresponding Master File parameters for storage that are currently in the BPM in the tariff

- FERC disagrees that ancillary service qualification requirements were outside the scope of the order, directing the CAISO to lower its minimum capacity requirements for ancillary services from 500 kW to 100 kW for storage resources

- Finding it unclear whether the CAISO's metering and accounting practices allow for simultaneous participation in both retail and wholesale markets, FERC directs the CAISO to clarify metering and accounting practices for storage in the tariff

- FERC disagrees that the demand response MGO methodology complies with its requirement to avoid duplicative billing where a UDC is unwilling or unable to exempt a storage resource from retail charges. FERC directs the CAISO to create or modify a participation model that will exempt a storage resource from wholesale charges where it already pays retail charges.

CAISO responded to FERC with a subsequent compliance filing Jan 21. We requested a target implementation of these adjustments by Oct 1, 2020 (Fall Release)

Fall 2020 – FERC Order 841 – FERC requested adjustments

ADS Replacement Transition

- **ISO received approval from our Quality Review Board for the transition, planned for Oct 13 - Oct 14, and the final decision for the transition will depend on Production connectivity completion:**

    - *We are adding criteria for customers to demonstrate production connectivity for this transition due to the significant infrastructure changes*

    - **The transition has been adjusted to span two phases over two days to implement the infrastructure and network transition during phase 1 and application transition during phase 2**

- **What to expect:**

    - Backward compatible: Delphi client and V6 APIs

    - Target time is between 10:30AM-12:30PM PDT*

    - *ADS interruption will be between 1115-1140 PT to avoid the hourly ramp

    - Planning for minimal downtime (10 min); the user interface will disconnect and will need to be restarted on client side

        - *During this transition of downtime, SCs should continue to follow the last available DOT until new DOT becomes available.*

    - There will be a brief interruption to ADSWS (API)

    - Users may need to flush DNS and restart Delphi client

California ISO

ADS Replacement Transition

- *October 13-14* production deployment
- ISO Operations will start using the new client and will keep the Delphi client available.
- Enhancements that require different Operator actions under the new client will be disabled until everyone has transitioned to the new client.
  - These enhancements will continue to be tested in MAPStage.
  - During this time, existing procedures will be utilized.
  - These enhancements include:
    - DOTT
    - Unannounced AS TEST
    - RTCD Commitment
  - ISO operators will conduct AS testing and issue operating instructions when needed to units using phone call (current process) while these enhancements are de-active in production. ISO operator will follow up with an ED instruction after phone call for AS testing. SCs should continue to respond to AS testing instructions and operating instructions.
- New data for FRU/FRD and FMM inter-ties will be available in the new ADS upon go-live of the ADS replacement
- v6, v7, and v8 API will be supported upon go-live of the ADS replacement

California ISO

ADS Replacement Transition

- **What to expect (continued):**
  - **Market**:
    - Prior to cutover, RTD will send dispatches to all just like today
    - Then the outage starts and ADS will be down for all so no one will receive any dispatches. Everyone will remain at the last DOT sent (so they will stay flat). The expected down time is only around 10 minutes
    - During the outage ISO Operations will use the **"send previous solution"** functionality. This will also keep everyone flat because we just keep sending the previous DOTs
    - Then ADS comes back up. We will continue to stay flat and use previous solution so that DOTs are actually being sent to ADS. Then participants can verify that they are receiving DOTs just like before the outage started
    - Then once we get confirmation that DOTs are being received, then we will stop using the previous solution and we will switch over to using the **"market disconnect"**. Since the market has been flat and using previous solution for a few intervals, we want to make sure that participants are comfortable with the new dispatch instructions that are about to be sent before actually sending them, to avoid any large swings here. This mitigation step will allow ISO Operations and EIM customers to verify their dispatches in BAAOP to decide whether or not to resume with latest market results.
    - Then if everyone is good with the new dispatch instructions, we turn off market disconnect and proceed as normal going forward.
- Customers are asked to join a bridge during the deployment - refer to public calendar and customer notice
- Parallel Operations is extended to 10/16 in Stage

California ISO

- This communication is Critical to the successful implementation of the ADS Replacement application on Tuesday, October 13th - Wednesday, October 14th.
- - We would like to ensure that EVERY AVAILABLE USER can connect to the existing ADS and new ADS (user interface and API) systems before the 10/13-10/14 implementation
- - This connection test must be performed ASAP
- EVERY AVAILABLE USER should do steps 1 and 2 below (we say 'available' as we understand that some users may be off shift)
- Step 3 must be performed if your organization is using the ADS API (regardless of which version of the API you are using)
- - Please ensure that your IT organization has seen this communication, to ensure that they have whitelisted the new ADS IP addresses.

ADS Replacement Transition Pre-Req - Production Connectivity

Steps to test connectivity to Existing ADS and New ADS:

1. ADS Delphi Client (existing ADS) From the system(s) where you plan to use the ADS Delphi Client:

i. Ensure your firewalls are open outbound to CAISO @ 45.42.16.51 & 45.42.22.51

ii. Ensure your CAISO ADS certificate is loaded in your web browser

iii. Launch a web browser and go to https://adsws.prod.caiso.com

iv. You should see a message similar to screenshot above

2. ADS UI

From the system(s) where you plan to use the new ADS UI:

i. Ensure your firewalls are open to CAISO @ 45.42.16.16 & 45.42.22.16

ii. Ensure your CAISO ADS certificate is loaded in your web browser

iii. Launch a web browser and go to https://ads.prod.caiso.com

iv. You should see a message similar to screenshot above

3. ADS API

From the system(s) where you plan to use the ADS API:

i. Ensure your firewalls are open to CAISO @ 45.42.16.51 & 45.42.22.51

ii. Ensure your CAISO ADS certificate is loaded in your web browser (or API client)

iii. Launch a web browser (or API client) and go to https://adsws.prod.caiso.com

iv. You should see a message similar to screenshot above Note: For ECN users, you may follow the above steps, but your network devices and firewalls will need a different configuration. Please contact the Service Desk (ServiceDesk@caiso.com, 888-889-0450) for more info.

- Note: When we cut over, the addresses http://adssta.caiso.com, and http://ads.caiso.com will become DNS Aliases to http://adsws.prod.caiso.com (45.42.16.51 & 45.42.22.51). If you have any issues connecting, please follow these steps:

1. Ensure your firewalls are open from the source workstation/servers out to the CAISO IP listed above
2. Ensure the certificate you are testing with is valid, installed in your browser, and allowed for ADS
3. If you still have issues, try with this same certificate to the LEGACY ADS: https://adssta.caiso.com:447 and see if your connection works to the LEGACY ADS system
4. Please contact the Service Desk (ServiceDesk@caiso.com, 888-889-0450), and provide your certificate name and URL you were trying.

California ISO

ADS Replacement Transition Pre-Req - Production Connectivity

URL	Connectivity Success	Unsuccessful
ADS Delphi Client (existing ADS) https://adsws.prod.caiso.com**:447**	**1.** California ISO page & "Your session could not be established."	No California ISO page, blank page
ADS UI https://ads.prod.caiso.com	**1.** California ISO page & "You have successfully connected to the ADS system" with link to click **2.** Clicking link returns "Your session could not be established."	No California ISO page, blank page
ADS API https://adsws.prod.caiso.com	**1.** California ISO page & "Your session could not be established."	No California ISO page, blank page
Comments	"Session could not be established" is expected as application is not yet available, but this message indicates successful connectivity to the network	

ADS Replacement Transition - Production

Phase 1 on October 13:

Planned Time	Action	Task	Team	MP Action / Comments
08:00	Validate	Verify external connectivity to new systems	ISO / MP	**Ensure you have tested the new firewalls** • **45.42.16.51/ 45.42.22.51** • **45.42.16.16/ 45.42.22.16** **For ECN customers, please ensure you can connect**
10:30	Validate	Login to current ADS and verify dispatches are coming	ISO / MP	
11:15	Validate	Verify data flowing into ADS	ISO	
11:15	Execute	Final Go/No-Go	ISO	
11:15	Execute	Apply DNS changes	ISO	**Close current ADS client connections, Flush DNS Restart ADS Delphi Client**
11:15	Validate	Verify you are able to see dispatches	MP /ISO	

Phase 2 on October 14:

Planned Time	Action	Task	Team	MP Action / Comments
10:00	Execute	Install Integration Layer Patches	ISO MP	Verify external users are able to login to new ADS UI
10:00	Execute	Cut over new ADS Adapter	ISO MP	
11:15	Validate	Verify access to API v6, v7, v8	ISO MP	**You should be able see v8 now**
10:00	Validate	Verify ADS is receiving data from upstream systems	ISO	
10:00	Execute	Open up WEBSDK UI	ISO / MP	**UI now available**
11:00	Validate	Verify Users successfully logged into ADSUI	ISO	

*ADS interruption will be between 1115-1140 PT for Phase 1 on 10/13 and Phase 2 on 10/14 to avoid the hourly ramp

ADS Replacement Transition - Cutover Dry Run in Stage/Parallel Operations environment

- Market Participants were invited to participate in the Cutover Dry Run in the Stage/Parallel Operations environment

- Monday 10/5 1500-1700 PT

- Users were able to verify ADS Delphi client functionality after Phase 1

- Users were able to verify new ADS replacement UI after Phase 2

ADS Replacement Transition Features & Data on Go-Live

ADS Replacement Features on Go-Live	

Available	• 5 minute FRU/FRD ← *10/14 with the ADSUI (WEBUI)*
	• 15 min FRU/FRD ← *10/14 with the ADSUI (WEBUI)*
	• 15 Min Energy ← *10/14 with the ADSUI (WEBUI)*
	• Removing Duplicate ED Entries in Instruction Grids. ← *10/14 with the ADSUI (WEBUI)*
	• AIM ACL ← 10/13 *with the ADSWS*
	• Operator messages view/download ← *10/14 with the ADSUI (WEBUI)*
	• New columns ← *10/14 with the ADSUI (WEBUI)*
	   • Previous Supp: similar to RT Prev DOT, will show last binding Supp.
	   • RT Sup Delta: similar to RT DOT Delta, will show difference between RT Supp. Energy and Previous Supp.
	   • Prev Accept DOT
	   • Accept DOT Delta
	   • Current DOT Delta

Disabled	• DOTT • Unannounced AS TEST • RTCD Commitment

Fall 2020 – Dispatch Operating Target Tariff Clarification

Project Info	Details/Date
Application Software Changes	**Scope:** Allow Energy Intermittent Resources (EIRs) to automate their response to operational instructions that require the resource not to exceed their Dispatch Operating Target. **Impacted Systems:** **RTM:** Operator can select EIR resources, system to send Operating instruction Flag to ADS **ADS:** Receive Operating instruction flag for EIRs. Broadcast message to EIRs operator.
BPM Changes	Market Instruments Market Operations
Tariff Change	Changes tariff language from "Operating Order" to "Operating Instruction" in multiple sections.

California ISO

Project Info	Details/Date

Application Software Changes	**Scope:**
	• Clarify the Tariff definition of Gross Load per amended tariff definition
	• Establish how EBTMP will be submitted, reported, and settled
	• Provide option for entities with meter agreements existing prior to ISO to submit EBTMP interval meter data
	• Update definitions for Net Load and Unaccounted For Energy settlement calculations
	• Publish EBTMP performance to market participants
	
	Impacted Systems:
	MRI-S - Meter submission
	• Allow SC to submit Gross Load and EBTMP under the single Resource ID
	    • New EBTMP measurement type for interval meter data submission; existing Load measurement type interval meter data submission with represent new Gross Load tariff definition
	        • Meter submission UI and API will accept the new EBTMP measurement type
	
	OASIS
	• Publish hourly aggregated EBTMP by TAC area once meter data submission deadline passes for settlement date
	
	Settlements
	• Modify Net Load and UFE calculations to align with tariff amendments:
	    • NET LOAD = GROSS LOAD METER – EXCESS BTMPRODUCTION METER
	    • UFE QUANTITY = GENERATION METER + INTERTIE IMPORT METER – (NET LOAD METER + EXPORT INTERTIE METER + RTD LOSS MW)
	• New Excess Behind the Meter Production (EBTMP) metered value bill determinant will be provided (similar to metered Load today)
	• Modify follow charge codes to settle based on Gross Load (Reliability based charge codes, list may not be comprehensive – See updated Settlements Configuration Guides)
	    • 372 High Voltage Access Charge Allocation (UDC gross load)
	    • 382 High Voltage Wheeling Allocation (Non PTO load)
	    • 383 Low Voltage Wheeling Allocation (Non PTO load)
	    • 591 Emissions Cost Recovery (Measured Demand)
	    • 1101 Black Start Capability Allocation
	    …

Fall 2020 – Excess Behind the Meter Production (cont.)

Project Info	Details/Date

Application Software Changes (cont.)	**Impacted Systems:**
	Settlements (continued);
	• Modify follow charge codes to settle based on Gross Load (Reliability based charge codes, list may not be comprehensive – See updated Settlements Configuration Guides)
	    • 1302 Long Term Voltage Support Allocation
	    • 1303 Supplemental Reactive Energy Allocation
	    • 6090 Ancillary Service Upward Neutrality Allocation
	    • 6194 Spinning Reserve Obligation Settlement
	    • 6196 Spinning Reserve Neutrality Allocation
	    • 6294 Non-Spinning Reserve Obligation Settlement
	    • 6296 Non-Spinning Reserve Neutrality Allocation
	    • 6594 Regulation Up Obligation Settlement
	    • 6596 Regulation Up Neutrality Allocation
	    • 6694 Regulation Down Obligation Settlement
	    • 6696 Regulation Down Neutrality Allocation
	    • 7256 Regulation Up Mileage Allocation
	    • 7266 Regulation Down Mileage Allocation
	    • 7896 Monthly CPM Allocation

BPM Changes	• **Definitions & Acronyms:**
	    • Update definition of Gross Load
	    • Add Excess Behind the Meter Production
	• **Metering**
	    • Submission, retrieval of new measurement type (EBTMP)
	• **Settlements & Billing**
	    • See Settlements Configuration Guide for changes

Tariff Change	• **Appendix A:**
	    • Clarify Gross Load definition, Update Demand definitions,
	    • Add new term Excess Behind the Meter production
	• **Section 11:**
	    • Update reliability based tariff reference sections to be based upon gross load

Fall 2020 – Market Settlement Timeline Transformation

Project Info	Details/Date
Application Software Changes	**Scope:** • The California ISO is proposing changes to its market settlement timeline to reduce market participant financial exposure by producing initial settlement statements that will more closely approximate the final settlement, and allow sufficient time for CAISO and market participants to resolve disputes. • The California ISO's current settlement timeline is compressed, which places potentially avoidable burdens on CAISO and market participants. The compressed timeline causes CAISO to publish initial statements of lower financial quality and to sometimes delay the publication of its settlement statements. These inefficiencies impact market participants as they must bear a financial burden of varying magnitude for many business days. • The California ISO and market participants also devote a large level of effort to correct data, re-calculate, process, and validate relatively small financial adjustments associated with optional re-calculations long after the settlement trade date has passed. • To resolve inefficiencies and issues, CAISO proposes to calculate and publish two settlement statements within seventy (70) business days after a trade date and re-align the due dates for settlement quality meter data. • Additionally, and under certain defined circumstances, CAISO proposes to re-calculate and publish three settlement statements between seventy (70) business days after a trade date and twenty-four (24) months after a trade date thus reducing the normal settlement life cycle from thirty-six to twenty-four months.

Application Software Changes (cont.)	**Impacted Systems:**
	CIDI:
	    The disputable statements in the Statement Disputed drop-down list will be updated to include the new statements per the MSTT. CAISO will continue to accept disputes from the date of statement publication through the dispute deadline, as prescribed by the tariff, and continue to calculate the Adjustment Publication Date based on the Correction Statement, as selected by the dispute analyst, and the Trade Date disputed.
	CMRI: Data retention impact due to reducing from 39 months to 27 months.
	MRI-S Metering:
	  • Impacts to the external data submission windows that currently exist, as well as the data transfers from MV-90 to MRI-S Metering and MRI-S Metering to Settlements.
	  • Data submission/freeze timeline.
	MRI-S Settlements:
	  • Update the Post Date calculation, as the payment calendar will change.
	  • Auto scheduling for statement generation.
	  • Statement posting.

California ISO

Project Info	Details/Date	
Application Software Changes (cont.)	**Market Clearing:** Updates needed to the deviation Interest calculations and credit calculation functions. Updates needed for invoice clearing and interest calculations. Check PTB publication timeline for any updates. Will impact the Extrapolation Component (one of 16 EAL Components) for Daily & Monthly Extrapolation and credit calculation. **Recalculation Log:** Post update recalculation log. **Payment Calendar:** Post the payment calendar to reflect overlap between existing and new timeline. **OASIS:** • Data retention impact due to reducing from 39 months to 27 months. • FERC 841 related data availability needs to be vetted.

Ways to participate in releases

- Visit the Release Planning page
  - http://www.caiso.com/informed/Pages/ReleasePlanning/Default.aspx

- Attend meetings
  - Release Users Group (RUG) bi-weekly meetings
    - Initiative status updates
    - System change updates on independent releases

  - Market Simulation calls
    - Visit the ISO calendar at www.caiso.com for meeting dates and times and add events to your calendar
    - Typically held on Mondays and Thursdays

  - Market Performance and Planning Forum
    - Bi-monthly review of market performance issues
    - High level discussion of release planning, implementation and new market enhancements
