SUMMARY OF MRTU STAKEHOLDER PROCESS

Since January 2002, the CAISO has conducted an extensive stakeholder process to guide the Market Redesign & Technology Upgrade ("MRTU") effort. In fact, from January 2002 to July 2003, the CAISO devoted hundreds of hours to stakeholder activities, including but not limited to: (1) conducting meetings and conference calls with both individual and larger groups of stakeholders, as well as with FERC staff; (2) participating in Commission-sponsored technical conferences; (3) hosting multiple-day forums; and (4) maintaining an updated CAISO website containing current information and relevant documents for stakeholder review and consideration.

The CAISO instituted its "MD02" stakeholder process in January 2002. During the first few months of 2002, that process included the following:

Date	Event/Deadline
January 8, 2002	Release of a Preliminary Draft
	Comprehensive Design Proposal, which
	stated the goals and guiding principles of
	the MD02 project and presented CAISO
	staff's preliminary design thinking in
	considerable detail. (On December 21,
	2001, an initial Draft Comprehensive
	Design Proposal was released as advance
	notification of the objectives, scope, and
	initial activities of the MD02 project.)
January 14-17, 2002	A series of four six-hour public focus
	groups conducted to discuss the January 8,
	2002 draft.
January 23, 2002	Due date, pursuant to a formal solicitation,
	for written comments following the
	January 14-17, 2002 focus groups.
January 28, 2002	Release of a Revised Draft Comprehensive
	Design Proposal indicating significant
	changes to the content and time frame of
	MD02 based on CAISO Management's
	responses to comments received from
	stakeholders.
January 31, 2002	Due date, pursuant to a formal solicitation,
	for written comments on the January 28,
	2002 draft.
March 18-20, 2002	A series of six-hour public focus groups
	conducted to discuss design elements

The CAISO's efforts to implement a market redesign and the accompanying stakeholder process

in fact predate January 2002. In the spring of 2000, the CAISO commenced its "Congestion Management Reform" ("CMR") project. That effort, however, was derailed by the California energy crisis. Thus, this Attachment summarizes the CAISO's extensive stakeholder process beginning in January 2002.

WDC01/224185v1

March 29, 2002	Release of a draft paper concerning the market design elements proposed to be implemented on September 30, 2002.
April 3, 2002	Due date, pursuant to a formal solicitation, for comments on the draft paper released March 29, 2002.
April 3, 2002	Release of a revised draft Comprehensive Design Proposal, which includes explicit sections of stakeholder comments and CAISO responses for each major design element.
April 4-5, 2002	Two-day FERC-sponsored public meeting held on CAISO market design.
April 9, 2002	Stakeholder forum.
April 11, 2002	Due date, pursuant to a formal solicitation, for comments on the April 3, 2002 draft.
Spring 2002 and after	The CAISO provides regular MD02 updates at the monthly Market Issues Forum meetings.

During August 2002, the CAISO met with stakeholders by way of Commission-sponsored technical conferences and via the Working Group process established under the Commission's direction. Following the August 13-15, 2002 technical conference, the four established Working Groups met regularly, generally on back-to-back days and on alternating weeks, in order to: (1) evaluate and refine the long-term market design elements; (2) identify issues raised by the CAISO's Comprehensive Market Design Proposal; (3) explore alternative solutions to those proposed by the CAISO; and (4) seek stakeholder consensus where possible. Meetings were open to all who wished to attend, and representation included a wide range of stakeholders. The Working Groups resolved many issues that are reflected in the instant Proposal and also identified a number of issues for which there was no consensus resolution.

The CAISO also convened several Joint Application Design ("JAD") sessions with stakeholders to resolve technical issues associated with numerous market design elements. The JAD sessions, primarily intended to resolve technical implementation issues, typically consisted of no more than a dozen Market Participants (representing a cross section of market interests) plus CAISO staff. These sessions focused on implementation and software development issues – the "how" as opposed to the "what" – and generally included technical representatives who understood the intricacies of design elements and software.

The CAISO held three two-day Phase II and Phase III JAD sessions between December 5 and December 18, 2002. There were two follow-up conference calls on January 6 and 8, 2003 to discuss and reach consensus on remaining JAD issues. The issues raised throughout the JAD sessions were documented and posted on the CAISO website, and updated as progress was made in addressing each issue. The purpose of

these JAD sessions was to present and resolve technical implementation issues associated with certain Phase II and Phase III market design elements prior to the release of the "Integrated Forward Market and Locational Marginal Pricing Using the Full Network Model Request for Proposals" ("IFM/LMP RFP"). The final Phase II and Phase III JAD Issues Matrix was filed with the Commission as Attachment F to the CAISO's January MD02 Status Report.

From October 2003 until the present, stakeholder activities have included the following:

Date	Stakeholder Activity
October 20, 2003	Stakeholder meeting to discuss preliminary
	the Congestion Revenue Rights ("CRR")
	Study Report.
October 24, 2003	Web-based conference call on Locational
	Marginal Pricing ("LMP") Study results.
January 26, 2004	CRR conference call.
February 13, 2004	CRR conference call.
February 17, 2004	First Settlements and Market Clearing
	("SaMC") User Group conference call to
	solicit feedback on participants'
	requirements prior to finalizing the SaMC
	design. The CAISO has held 29
	conference calls to date to obtain
	stakeholder feedback on design issues and
	provide updates on the SaMC project.
March 22, 2004	CRR Study stakeholder meeting.
April 1, 2004	CRR stakeholder meeting.
May 11, 2004	Reliability Must-Run ("RMR") Studies
	stakeholder meeting.
May 13, 2004	Stakeholder meeting to discuss the
	Existing Transmission Contract ("ETC")
	proposal, pre-CAISO management of
	ETCs, an overview of LMP, and an
	overview of and comparison to the
	Midwest ISO's proposal.
May 24, 2004	RMR Methodology stakeholder meeting.
June 9, 2004	Stakeholder meeting to discuss the ETC
	proposal, summary and categorization of
	Existing Contracts, Recallable
	Transmission Service, and review of
	Scheduling and Settlement examples.
June 15, 2004	CRR stakeholder meeting.
June 30, 2004	Stakeholder meeting to discuss the ETC
	proposal, ETC analysis and re-Dispatch
	costs, and ETC Settlement examples.

July 15, 2004	Stakeholder meeting to discuss the ETC
	proposal and allocation of the costs of
X 1 24 2004	Congestion for ETC Schedules.
July 24, 2004	RMR Criteria Methodology stakeholder
1.1.20.2004	meeting.
July 28, 2004	LMP Study 3A stakeholder meeting.
August 17, 2004	Stakeholder summit.
August 31, 2004	Stakeholder meeting to discuss the ETC
	proposal and non-firm transmission
Ctl 17 2004	product.
September 17, 2004	Transitional Alternative Pricing and
Santambar 21, 2004	Settlement ("TAPAS") meeting.
September 21, 2004	Stakeholder meeting to discuss Trading Hubs and LMP Study 3A.
November 3, 2004	FERC Technical Conference – Attended
	by FERC and CPUC Commissioners, the
	focus of which was to discuss the
	compatibility of the CPUC Resource
	Adequacy framework with MRTU with
	particular focus on revenue adequacy and
	market power mitigation.
November 5, 2004	Conference call to discuss CRR Study 2.
November 5, 2004	Conference call to provide an ETC update.
November 17, 2004	SaMC Technical Workshop for
	stakeholders.
November 17, 2004	Stakeholder meeting to review the
	CAISO's market power mitigation
	proposal and provide a MRTU policy
D 1 0 2004	update.
December 9, 2004	Stakeholder meeting to discuss the
	CAISO's proposed rules for Inter-
	Scheduling Coordinator ("Inter-SC")
December 22, 2004	Trades under LMP. Stakeholders comments due on the
DCCCIIIUCI 22, 2004	CAISO's proposed Inter-SC Trade design
	under LMP.
December 22, 2004	Conference call to discuss the proposed
December 22, 2004	treatment of Metered Subsystems ("MSS")
	relative to MRTU.
January 11, 2005	Stakeholder meeting to discuss the
	CAISO's proposed market rules for
	physical Inter-SC Trade validation.
January 24, 2005	Conference call to provide a CRR Study 2
	update.
February 22, 2005	Conference call to discuss Minimum Load
J	Costs.

February 23, 2005	The CAISO circulates the following documents to stakeholders for review: (1) the LECG Report; (2) a White Paper entitled "Comprehensive Market Redesign Update" ("Draft Design White Paper"); and (3) a White Paper entitled Proposed MRTU "Market Power Mitigation Provisions" ("Draft MPM White Paper"). The Draft Design White Paper includes, <i>inter alia</i> , a discussion of CAISO proposals for an Hour-Ahead Scheduling Process ("HASP") and the clearing of demand bids at the load aggregation point
	("LAP") level. The Draft MPM White Paper sets forth the CAISO's proposed market power mitigation measures under MRTU.
March 1-2, 2005	Stakeholder conference to discuss, <i>inter alia</i> , (1) the CAISO's HASP, market power mitigation, and demand clearing proposals; (2) the elements that would be included in the initial release of the MRTU design that will be implemented on February 1, 2007 and those items that would not be included until MRTU Release 2; and (3) the main findings of the LECG Report.
March 9, 2005	The CAISO holds a stakeholder conference call to address further questions on the LECG Report.
March 11, 2005	Stakeholders provide their written comments to the CAISO on the Draft Design White Paper and Draft MPM White Paper.
March 15, 2005	The CAISO's Market Surveillance Committee ("MSC") holds an open meeting in San Francisco to discuss issues pertaining to the CAISO's proposed market design and market power mitigation measures, as well as Resource Adequacy.
April 12-13, 2005	The CAISO holds a second stakeholder conference which includes a discussion of the issues raised in stakeholders' March 11, 2005 written comments pertaining to the CAISO's demand clearing, HASP, and

	market power mitigation proposals. In
	addition, the CAISO discusses the
	rationale for including certain design
	elements in MRTU Release 1 and
	deferring others to MRTU Release 2. The
	CAISO also identifies remaining MRTU
	policy issues that need to be resolved and
	the schedule for resolving such issues.
April 29, 2005	The CAISO issues a white paper
April 27, 2003	containing a revised MRTU market power
	1
	mitigation proposal that includes several
	modifications in response to stakeholder
N. 40.40.2002	comments.
May 18-19, 2005	Stakeholder conference to discuss issues
	related to Resource Adequacy, market
	power mitigation issues, the Tariff
	preparation process, CRR allocation rules,
	and MRTU policy issues.
June 21-23, 2005	Stakeholder conference to discuss CRR
	allocation rules, Resource Adequacy,
	MRTU integration, treatment of Use-
	Limited Resources, Frequently Mitigated
	Units ("FMUs"), criteria for raising the
	Energy Bid cap, competitive transmission
	constraints, gas price indices, emission
	cost for start-up, minimum load and
	_
	default bids, and pricing of Ancillary
	Services procured in HASP and real time.
	The CAISO provides an MRTU Tariff
	update.
July 13-14, 2005	Stakeholder meeting to discuss CRR
	allocation rules and preliminary study
	results and provide an MRTU Tariff
	update and schedule. Work Groups for
	Resource Adequacy/MRTU integration,
	Competitive Path, and FMU Bid Adder
	issues meet and provide a summary of
	their discussion to stakeholders.
August 16-18, 2005	Stakeholder conference to discuss
	proposed RMR designations for 2006,
	Tariff process and update, review of
	MRTU Tariff language – Parts 1 and 2,
	, ,
	Resource Adequacy/MRTU integration
	issues, Competitive Path assessment, the
	FMU Bid Adder, Default Energy Bids,
	outstanding ETC issues, outstanding

Transmission Owner Rights issues, Intertie pre-Dispatch pricing, Trading Hubs (stakeholders proposal), CRR Study 2 Report and results, CRR allocation rules for LSEs serving internal Load, out-of-Control Area Load, and proposal for Merchant Transmission. August 30-September 1, 2005 August 30-September 1, 2005 Stakeholder conference to discuss Resource Adequacy, Day-Ahead, and Real Time Market design issues, Participating Intermittent Resources, Josses on ETC Schedules, CRR allocation, and market power mitigation. September 16, 2005 Web-based conference call to discuss LMP Study 3B with stakeholders. September 16, 2005 Conference call to review MRTU issues related to the treatment of losses on ETC Schedules. September 22, 2005 The CAISO files the Simplified and Reorganized Tariff. October 5-6, 2005 Stakeholder conference to discuss CRR allocation, Resource Adequacy, Participating Intermittent Resources, Inter-SC Ancillary Service Trades, ETCs, HASF Intertie-pricing, and Trading Hubs. October 10-13, 2005 MRTU Technical Specifications workshops. October 19, 2005 The CAISO Gosts comprehensive draft of MRTU Tariff language and comments from stakeholders on MRTU issues. October 19, 2005 The CAISO Governing Board meets and unanimously approves the MRTU policy proposals for this Tariff filing. October 20, 2005 The CAISO conducts a conference call to discuss LMP Study 3A, portfolio management of RA Resources, and the Trading Hub White Paper. October 24-28, 2005 The CAISO holds a five-day page turn for stakeholder review of the draft MRTU Tariff language. October 26-November 3, 2005 The CAISO holds additional sessions to review the proposal and and ansimotated draft of the Proposal and P		
(stakeholders proposal), CRR Study 2 Report and results, CRR allocation rules for LSEs serving internal Load, out-of-Control Area Load, and proposal for Merchant Transmission. August 30-September 1, 2005 Stakeholder conference to discuss Resource Adequacy, Day-Ahead, and Real Time Market design issues, Participating Intermittent Resources, Josses on ETC Schedules, CRR allocation, and market power mitigation. September 16, 2005 Web-based conference call to discuss LMP Study 3B with stakeholders. September 16, 2005 Conference call to review MRTU issues related to the treatment of losses on ETC Schedules. September 22, 2005 The CAISO files the Simplified and Reorganized Tariff. October 5-6, 2005 Stakeholder conference to discuss CRR allocation, Resource Adequacy, Participating Intermittent Resources, Inter-SC Ancillary Service Trades, ETCs, HASP Intertie-pricing, and Trading Hubs. October 10-13, 2005 MRTU Technical Specifications workshops. October 19, 2005 CAISO posts comprehensive draft of MRTU Tariff language and comments from stakeholders on MRTU issues. October 19, 2005 The CAISO Governing Board meets and unanimously approves the MRTU policy proposals for this Tariff filing. October 20, 2005 The CAISO conducts a conference call to discuss LMP Study 3A, portfolio management of RA Resources, and the Trading Hub White Paper. October 24-28, 2005 The CAISO holds a five-day page turn for stakeholder review of the draft MRTU Tariff language. October 26-November 3, 2005 The CAISO holds a dditional sessions to review the proposed tariff language.		Transmission Owner Rights issues, Intertie
Report and results, CRR allocation rules for LSEs serving internal Load, out-of-Control Area Load, and proposal for Merchant Transmission. August 30-September 1, 2005 Stakeholder conference to discuss Resource Adequacy, Day-Ahead, and Real Time Market design issues, Participating Intermittent Resources, losses on ETC Schedules, CRR allocation, and market power mitigation. September 16, 2005 Web-based conference call to discuss LMP Study 3B with stakeholders. September 16, 2005 Conference call to review MRTU issues related to the treatment of losses on ETC Schedules. September 22, 2005 The CAISO files the Simplified and Reorganized Tariff. October 5-6, 2005 Stakeholder conference to discuss CRR allocation, Resource Adequacy, Participating Intermittent Resources, Inter-SC Ancillary Service Trades, ETCs, HASP Intertie-pricing, and Trading Hubs. October 10-13, 2005 MRTU Technical Specifications workshops. October 19, 2005 The CAISO Governing Board meets and unanimously approves the MRTU policy proposals for this Tariff filing. October 20, 2005 The CAISO Conducts a conference call to discuss LMP Study 3A, portfolio management of RA Resources, and the Trading Hub White Paper. October 24-28, 2005 The CAISO holds a five-day page turn for stakeholder review of the draft MRTU Tariff language. October 26-November 3, 2005 The CAISO holds a five-day page turn for stakeholder review of the draft MRTU Tariff language. October 26-November 3, 2005 The CAISO holds a five-day page turn for stakeholder review of the draft MRTU Tariff language. October 26-November 3, 2005 The CAISO holds a five-day page turn for stakeholder review of the draft MRTU Tariff language. October 27-005 The CAISO holds a five-day page turn for stakeholder review of the draft MRTU Tariff language.		
for LSEs serving internal Load, out-of-Control Area Load, and proposal for Merchant Transmission. August 30-September 1, 2005 Stakeholder conference to discuss Resource Adequacy, Day-Ahead, and Real Time Market design issues, Participating Intermittent Resources, losses on ETC Schedules, CRR allocation, and market power mitigation.
