

City of Riverside comments originally received in email format from Ron Barry

Regarding the proposed CRR/FTR Contingency Plan and call-in meeting of January 24th, the City of Riverside has the following comments:

If MRTU is delayed to May 1st, the City is agreeable to extending Firm Transmission Rights into April using what participants purchased in the FTR auction for March 2008. However, if MRTU is delayed to any date beyond May 1st, then the City advocates one of two options.

- Starting May 1st, allocate FTRs for each month based on FTRs purchased for corresponding month in 2007.
- Run a new FTR auction for months of May thru end of year.
