Executive Summary

The CAISO completed its scheduled triennial cost of service study (2019 cost of service study) in accordance with its Tariff (Appendix F, Schedule 1). The study analyzes cost and time data to determine how much time and effort staff uses to support varying cost categories and supplemental services. CAISO uses study results to update the GMC revenue requirement percentage allocations to the market services, system operations, and congestion revenue rights services (CRR services) cost categories (outlined in Table 1). The study results are also used to update the energy imbalance market (EIM) cost category percentages (outlined in Table 2) and the recently developed, the reliability coordinator (RC) funding percentage (outlined in Table 3). In addition, as part of the 2019 cost of service study, the CAISO analyzed its cost to support supplemental services (outlined in Table 4). The resulting percentage allocation changes and fee changes will be effective for the 2021 through 2023 GMC revenue requirement and grid management charges (GMC).

The 2019 cost of service study results as shown in Table 1 below indicate a 17% shift of resources (time and dollars) from the system operations cost category to the market services cost category; the CRR service cost category percentage remains the same. The shift from the system operations cost category to the market services cost category is primarily driven by process efficiencies, system improvements, the introduction of the RC services cost category, and automation of services. The shift indicates CAISO staff is focused on supporting market services functions and system operations functions equally.

Table 1 – Summary of GMC Cost Category Percentage Changes

| Cost Category | 2016 Study Effective 2018 GMC | 2019 Study Effective 2021 GMC | Increase / (Decrease) from Prior | | |
|-------------------|-------------------------------------|-------------------------------------|--|--|--|
| Market Services | 32% | 49% | 17% | | |
| System Operations | 66% | 49% | -17% | | |
| CRR Services | 2% | 2% | 0% | | |

The results also indicate a shift of EIM related resources as well, shown highlighted in Table 2 below. The study shows that 16% of market services' resources shifted from the real time market functions to day ahead market functions. In addition, 11% of system operations' resources shifted from balancing authority functions to

Finance/FPP Page 3 of 68

real time dispatch functions. The driver of the shifts is a balancing of efforts between the market services and system operations functions and responsibilities.

Table 2 – Summary of EIM Cost Category Percentage Changes

| Cost Category | Sub-Category | 2016 Study Effective 2018 GMC | 2019 Study Effective 2021 GMC | Increase / (Decrease) from Prior |
|-------------------|---------------------|-------------------------------------|-------------------------------------|--|
| | Real Time Market | 79% | 63% | -16% |
| Market Services | Day Ahead Market | 21% | 37% | 16% |
| | Real Time Dispatch | 39% | 50% | 11% |
| System Operations | Balancing Authority | 61% | 50% | -11% |

New to the triennial cost of service study is the analysis of RC services efforts. CAISO implemented its RC services in 2019. The study results indicate there is no change in the RC funding percentage from that of the initial calculation as part of CAISO's Reliability Coordinator Rate Design, Terms and Conditions proposal¹; the funding percentage will remain at 9%.

Table 3 – Summary of RC Funding Percentage Changes

| Cost Category | 2016 Modified Study Effective 2019 GMC | 2019 Study Effective 2021 GMC | Increase / (Decrease) from Prior |
|----------------------------------|---|-------------------------------------|--|
| Reliability Coordinator Services | 9% | 9% | 0% |

CAISO also used the 2019 cost of service study to analyze efforts that support other supplemental services. The study results indicate resources to process applications and statements increased. Whereas, resources to support transmission ownership rights (TOR) efforts decreased. CAISO is proposing changes to the Scheduling Coordinator ID fee, TOR fee, Scheduling Coordinator Application fee, and CRR Application fee based

Finance/FPP Page 4 of 68

¹ Visit the CAISO website for additional information regarding the <u>Reliability Coordinator Rate Design, Terms and Conditions</u> <u>proposal</u>.

on the study. The revenue collected from the fees offset the costs recovered through either the GMC revenue requirement or the GMC rates. The CAISO is not proposing any other change in supplemental fees.

Table 4 – Summary of Supplemental Fee Changes

| F | Dilling Units | Commant For | Undeted Fee |
|--|--------------------|--------------|--------------|
| Fee | Billing Units | Current Fee | Updated Fee |
| Bid Segment Fee | per bid segment | \$ 0.0050 | No Change |
| Inter SC Trade Fee | per Inter SC Trade | \$ 1.0000 | No Change |
| Scheduling Coordinator ID Fee | per month | \$ 1,000 | \$ 1,500 |
| | minimum of supply | | |
| | or demand TOR | | |
| TOR Fees | MWh | \$ 0.2400 | \$ 0.1800 |
| | number of | | |
| | nominations and | | |
| CRR Bid Fee | bids | \$ 1.00 | No Change |
| Intermittent Resource Forecasting Fee | per MWh | \$ 0.1000 | No Change |
| Scheduling Coordinator Application Fee | per application | \$ 5,000 | \$ 7,500 |
| CRR Application Fee | per application | \$ 1,000 | \$ 5,000 |
| HANA Administrative Fee | annual fee | \$ 45,000 | No Change |
| HANA Setup Fee | one time fee | \$ 35,000 | No Change |

Other Tariff Amendments

Additionally, CAISO seeks to clarify in the Tariff the administrative process around the self-insured healthcare reserve. In 2018, CAISO converted a portion of its healthcare benefit program to a self-insured model. The intent of the program was to help CAISO and its employees mitigate the effects of rising healthcare costs. A self-insured health insurance program shifts the financial risk of paying health insurance claims to the employer versus the health insurance company. The benefits to the employer include more control over the design of the health insurance plan and saving the profit margin that insurance companies add to their premiums.

CAISO works with a health benefit consultant annually to determine the appropriate amount of premiums to assess the users of the plan given expected claims data. The original intent of the self-insured program was to enable the CAISO to be able to build a reserve in years in which actual claims were less than expected and to use those reserves in years in which claims exceeded expectations. This would smooth out the volatility associated with healthcare claims.

It is not clear in the existing tariff whether CAISO is able to hold back the reserve from the operating cost reserve adjustment that is performed each year to fund the self-insured healthcare reserve. The operating cost

Finance/FPP Page 5 of 68

reserve adjustment ensures that any excess or shortfall in any category that makes up the revenue requirement is accounted for in the annual rate development. Although the CAISO originally believed that the healthcare reserve could be established using the existing budgeting processes, the effect on the Tariff operating cost reserve adjustment process is not clear and therefore, CAISO will add specific language describing the annual healthcare reserve process.

Changes from the Straw Proposal

The content of this draft final is primarily the same as the straw proposal. All percentage allocations and fee changes that resulted from the updated cost of service study remain the same. This paper does provide additional explanations of the GMC cost category percentage shifts and the calculation of the Schedule Coordinator ID Fee as provided in response to stakeholder comments².

Application of ABC to GMC and RC Rate Structure

The CAISO used activity based costing (ABC) for the first cost of service study to restructure the GMC rate design in 2011. The GMC design was vetted through a comprehensive stakeholder process. The design was approved by the CAISO Board of Governors and the Federal Energy Regulatory Commission (FERC) in 2011 and became effective on January 1, 2012.

Activity based costing allows the CAISO to analyze the cost to provide services using budget, processes and time data. The analysis provides a comprehensive understanding of how much effort (time and resources) are contributing to each of the service cost categories. This method guides the CAISO to allocate the right portion of its annual revenue requirement to the GMC and other rates.

The GMC rate structure contains three cost categories: market services, system operations and CRR services. The market services category is designed to recover costs CAISO incurs for running the markets. The system operations category is designed to recover costs CAISO incurs for reliably operating the grid in real time.

Finance/FPP Page 6 of 68

 $^{^2}$ Visit the CAISO website for additional information regarding the $\underline{2019\ \text{Cost}}$ of Service Study and $\underline{2021\ \text{GMC}}$ Update stakeholder comments.

The CRR services category recovers costs CAISO incurs for running the CRR markets. The CAISO uses the cost of service study to determine the share of the CAISO's direct and indirect costs attributable to these three cost categories. The CAISO applies the percentages calculated as part of the cost of service study to the annual GMC revenue requirement to determine the amount in the cost categories upon which rates are set.

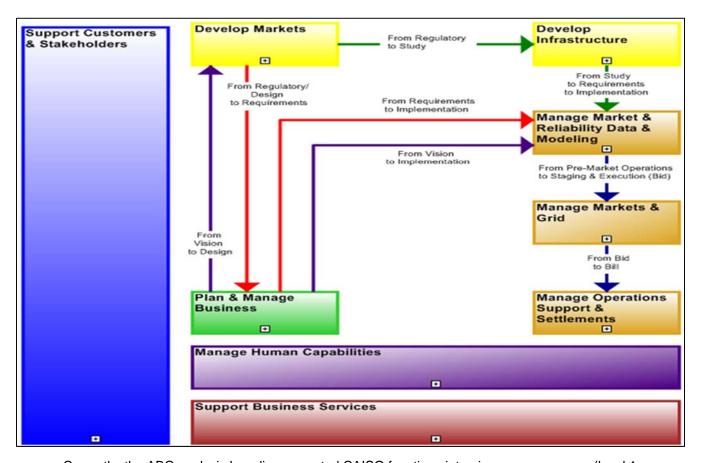

Within the market services and system operations cost categories, activity based costing also allows for the further delineation of resources to determine the appropriate percentage of GMC that EIM entities pay.

Market services is bifurcated between real time market resources and day ahead market resources. While, system operations is split between real time dispatch resources and balancing area authority services. EIM entities pay the percentage of GMC associated with real time market and real time dispatch resources.

The 2019 cost of service study includes a new cost category, reliability coordinator, to calculate the RC funding percentage. The RC funding percentage represents the direct and indirect time and expense necessary for the CAISO to perform its RC services and functions. The RC funding percentage is used similarly to the GMC cost category percentages in that the RC funding percentage is multiplied against the revenue requirement to determine the RC funding requirement. This approach allows the RC funding requirement to leverage against the stability of CAISO's annual revenue requirement thus benefiting both the RC customers and the existing GMC customers.

Finance/FPP Page 7 of 68

Mapping of ISO Core Business Processes

Currently, the ABC analysis has disaggregated CAISO functions into nine core processes (level 1 activities). Each of the core activities were further broken down into major processes (level 2 activities) which were then mapped back to the level one activity. There are 107 level 2 activities included in the 2019 cost of service study.

CAISO continually reviews and develops its processes to reflect its current state of operations and process flows. The level 2 processes discussed in this study were mapped and defined as of March 2020. The level 1 activities were categorized into two types: (1) direct operating costs — those that can be directly mapped to a market, grid service, customer, or reliability service; and (2) support or indirect costs — those that support the direct activity.

Finance/FPP Page 8 of 68

Table 5 — Level 1 ABC Activities

| ABC Process Code | Level 1 ABC Activity | Number of Level 2 Activity Tasks |
|------------------------|---|--|
| Direct | | |
| 80001 | Develop Infrastructure | 10 |

MAPPING OF NON-ABC SUPPORT COSTS

For the next step, the CAISO pulled significant non-payroll ABC costs out of the operations and maintenance budget and allocated to buckets based on specific charge codes or to indirect costs.

Table 7 — Mapping of Non-ABC Support Costs to Cost Categories

Finance/FPP Page 13 of 68

MAPPING OF DEBT SERVICE AND CASH FUNDED CAPITAL

Debt service is the aggregation of principle, interest, and a 25% debt service reserve on the 2013 bonds. The 2013 bonds refunded the 2009 bonds, which funded the building of CAISO's corporate headquarters in Folsom. The debt service was allocated 100 percent to indirect costs.

The revenue requirement also includes cash funded capital. The funds raised through the GMC contribute to maintaining a long-term capital reserve fund, which varies from the capital project budget for that year. The number of, and cost for, capital projects varies significantly from year to year. The annual budget identifies the approved capital spending limits but not the projects themselves. A proposed listing is provided to an internal management committee; which meets throughout the year to review and approve funding for specific projects. Because of the uncertainty of the actual projects coming on line, 100% of the cash funded capital was allocated to indirect costs.

Table 9 — Mapping of Debt Service and Capital to Cost Categories

| 2019 Modified Revenue Requirem | ent: Debt Ser | vice Bonds and | Cash Funded | Capital | | |
|--------------------------------|---------------|----------------|------------------|-------------|----------|---|

MAPPING OF OTHER REVENUE AND OPERATING COST RESERVE ADJUSTMENT

The remaining revenue requirement components, other revenue and operating cost reserve adjustment, were then analyzed and allocated to buckets based on specific charge codes or to indirect costs.

Finance/FPP Page 14 of 68

| Revenue Changes | | | | | 100% | |
| Expense Changes | | | | | 100% | Attributes are not distinguishable to any specific category. |

MAPPING OF INDIRECT COSTS

Indirect costs were aggregated and then allocated proportionally to direct costs. After this mapping is completed it can be applied to the CAISO revenue requirement to derive the related cost of service.

Finance/FPP Page 15 of 68

Costing the 2019 GMC Revenue Requirement

The CAISO applied the allocation matrix of level 2 activities to the 2019 revenue requirement to determine the costs associated with the cost categories. Modifications were made to the other costs and revenue category to include HANA administrative fees and a full year's worth of reliability coordinator (RC) funding requirement as these services were not included, in the case of HANA administrative fees, or partially included, in the case of the RC funding requirement, in the original 2019 revenue requirement. As a reminder, the CAISO began offering RC services July 1, 2019. The 2019 revenue requirement data and employee hours are the most recent information available to both determine the cost category percentage updates for the 2021 GMC tariff filing.

Table 12 — 2019 Modified GMC Revenue Requirement Components

| 2019 Modified GMC Revenue Requirement | | |
|---------------------------------------|--------|----------------------|
| Components | (\$ in | Budget thousands) |
| Operations and Maintenance | \$ | 189,030 |
| Debt Service | \$ | 16,904 |
| Cash Funded Capital | \$ | 25,000 |
| Other Costs and Revenues | \$ | (38,662) |
| Operating Costs Reserve Adjustment | \$ | (13,480) |
| Total | \$ | 178,792 |

Completing the analysis required the following steps:

- Breaking out non-ABC operations and maintenance (O&M) support costs and applying cost category
 percentages to these costs;
- Allocating the ABC direct and indirect O&M costs into two components: level 2 activities and support costs. This process involved:
 - a. allocating cost centers to level 1 ABC activities
 - b. applying cost category percentages to level 1 support costs

Finance/FPP Page 16 of 68

- c. obtaining time estimates for level 2 activities for those level 1 activities that are direct operating
 costs
- d. allocating costs to level 2 activities
- e. applying cost category percentages;
- Allocating remaining revenue requirement components to cost categories and applying cost category percentages to these costs;
- Aggregating costs and allocating indirect costs to cost categories based on percentage of direct costs, allocating fees to the cost category buckets and determining resulting cost category percentages; and
- Dividing resulting costs by estimated volumes to determine 2019 rates using revised cost category percentages.

Step 1: Breaking Out Non-ABC Support Costs

There are two types of O&M costs; those that are activity related such as costs attributed to personnel, and non-ABC costs such as facilities costs. The O&M budget was broken down into those two categories. The significant non-ABC support costs were removed from the divisions and allocated separately.

Table 13 — Allocation of Costs to ABC Activities and Non-ABC Activities

| 2019 Operations and Maintenance Budget (\$ in thousands) | | | |
|--|--------------------------|------------------------------|---------------|
| Division | ABC Activity Costs | Non-ABC Activity Costs | Total |
| Corporate Services | \$ 14,631 | \$ 5,683 | \$ 20,314 |
| Market and Infrastructure Development | \$ 16,514 | 314 | \$ 16,828 |
| Technology | \$ 45,464 | 24,921 | \$ 70,385 |
| Operations | \$ 47,457 | - | \$ 47,457 |
| General Counsel | \$ 11,943 | 2,726 | \$ 14,669 |
| Market Quality and California Regulatory Affairs | \$ 8,609 | 355 | \$ 8,964 |
| External and Customer Affairs | \$ 10,413 | - | \$ 10,413 |
| Total | \$ 155,031 | \$ 33,999 | \$ 189,030 |

Finance/FPP Page 17 of 68

These budgeted costs were allocated using the percentages shown in *Table 7 — Mapping of Non-ABC Support Costs to Cost Categories*.

Table 14 — Allocation of Non-ABC Support Costs to Cost Categories

Step 2: Allocation of O&M Costs

For activity related O&M costs, the current ABC structure was utilized to allocate costs between the cost categories. CAISO activities were broken out into nine level 1 ABC activities as shown in *Table 5 — Level 1 ABC Activities*. For the direct operating level 1 activities, the associated level 2 activities were mapped to one of the three cost categories as shown in *Table 6 — Mapping of ABC Direct Operating Activities to Cost Categories*. The level 1 support activities were allocated to ABC support costs.

The O&M budget is comprised of approximately 111 cost centers. The reported 2019 time card data was collected and the percentage breakdown of each cost center by the level one and level 2 direct activities was determined. The percentage was applied to the activity budget for the cost center to allocate the cost center activity budget by dollars to the level one and level 2 direct operating activities.

Finance/FPP Page 18 of 68

ABC DIRECT OPERATING ACTIVITIES

Table 15 — Allocation of Division Hours to Direct Operating Activities

DIRECT OPERATING ACTIVITIES

The direct operating activities costs were factored into the allocation matrix shown in *Table 6 — Mapping* of *ABC Direct Operating Activities to Cost Categories* to get the costs to the cost categories.

Table 17 — Allocation of Division Costs to Direct Operating Activities

| | | | | | Alloca | atio | n of Costs By D | ivision (\$ in tho | usands) | | |
|------------------------|---|-----------------------|------|--|------------|------|-----------------|--------------------|--|-------------------------------------|---------------|
| ABC Process Code | Level 1 ABC Activity | Corporate Services | lı | Market and nfrastructure Development | Technology | | Operations | General Counsel | Market Quality and California Regulatory Affairs | External and Customer Affairs | Total |

ABC INDIRECT ACTIVITIES

The same process yielded the following percentages for the indirect activities.

Table 20 — Allocation of Division Hours to Indirect Operating Activities

| | | | | | Allocation of Ho | ours By Division | | | |
|----------------|---------------------------|-----------|------------------------------|------------|------------------|------------------|--|--------------------------|-------|
| ABC Process | | Corporate | Market and Infrastructure | | | General | Market Quality and California Regulatory | External and Customer | |
| Code | Level 1 ABC Activity | Services | Development | Technology | Operations | Counsel | Affairs | Affairs | Total |
| | | | | | | | • | | |
| Indirect | | | | | | | | | |
| 80003 | Manage Human Capabilities | 97% | 0% | 1% | 1% | 0% | 0% | 0% | 100% |

These costs were inputs into the allocation matrix shown in *Table 8 — Mapping of ABC Indirect Activities* to *Cost Categories* to get the costs to the cost categories.

Table 21 — Allocation of Division Costs to Indirect Operating Activities

| | | | | Allocat | tion of Costs By I | Division (\$ in thou | ısands) | | |
|----------------|---------------------------|-----------|---------------------------|------------|--------------------|----------------------|--|--------------------------|----------|
| ABC Process | | Corporate | Market and Infrastructure | | | General | Market Quality and California Regulatory | External and Customer | |
| Code | Level 1 ABC Activity | Services | Development | Technology | Operations | Counsel | Affairs | Affairs | Total |
| | | | | | | | | | |
| Indirect | | | | | | | | | |
| 80003 | Manage Human Capabilities | \$ 3,286 | \$ 9 | \$ 45 | \$ 21 | \$ 45 | \$ 13 | \$ 1 | \$ 3,420 |

For indirect activities, the costs were aggregated and allocated as shown in *Table 8 — Mapping of ABC Indirect Activities to Cost Categories*.

Table 22 — Allocation of ABC Indirect Activity Costs to Cost Categories

Step 4: Aggregating Revenue Requirement into Cost Categories

The individual revenue requirements were aggregated and indirect costs allocated based on total direct costs.

The reliability coordinator costs, which represent 9% of revenue requirement prior to the RC funding requirement adjustment, were offset by the RC funding requirement. The remaining balance represents the GMC revenue requirement to be collected through the GMC rates and fees.

Finance/FPP Page 35 of 68

| Cost Category Percentages for GMC Rates | | | | | 49% | | 49% | 2% | | | | |

Step 5: Calculation of 2019 Rates Using New Cost Category Percentages

Although not necessary to determine the cost category percentages, the rates are needed to determine the EIM fee. The GMC rates were determined by first estimating fees as shown in the following table

Table 27 — Estimation of Fee Revenue and Mapping of Fees to Cost Categories

| 2019 Modified Revenue Requirement | | | | | | | |
|-----------------------------------|------------|----------|----|-------|------------|--------------|--------|
| | Estimated | | | | | | |
| | 2019 | | | 2019 | Market | System | |
| Fee | Volumes | Rate | В | udget | Services | Operations | CRRs |
| | | | | | (amounts i | n thousands) | |
| Bid Segment Fees | 69,972,240 | \$ 0.005 | \$ | 350 | \$ 350 | | |
| Inter-SC Trade Fees | 2,367,091 | \$ 1.00 | \$ | 2,367 | \$ 2,367 | | |
| SCID Fees | 334 | \$ 1,000 | \$ | 4,008 | \$ 4,008 | | |
| TOR Fees | 4,604,305 | \$ 0.24 | \$ | 1,105 | | \$ 1,105 | |
| CRR Auction Bid Fees | 730,456 | \$ 1.00 | \$ | 730 | | | \$ 730 |
| Total | | | \$ | 8,560 | \$ 6,725 | \$ 1,105 | \$ 730 |

Finance/FPP Page 36 of 68

The estimated fees were then deducted from the revenue requirement resulting in the remaining revenue requirement to be collected. The remaining amount to be collected is divided by the estimated volumes of billing determinants for each cost category in order to determine the respective rates.

Summary of GMC Cost Category Percentage Changes

The following table reflects the results of the cost of service analysis. The new percentages specified below will go into effect in January 1, 2021.

Table 29 — Summary of GMC Cost Category Percentage Changes

| Cost Category | 2016 Study Effective 2018 GMC | 2019 Study Effective 2021 GMC | Increase / (Decrease) from Prior | |
|-------------------|-------------------------------------|-------------------------------------|--|--|
| Market Services | 32% | 49% | 17% | |
| System Operations | 66% | 49% | -17% | |
| CRR Services | 2% | 2% | 0% | |

The shift from the system operations cost category to the market services cost category is primarily driven by process efficiencies, system improvements, the introduction of the RC services cost category, and automation of services.

With a focus to keep its business processes current and in preparation of kicking off its RC services, the CAISO underwent a corporate wide process improvement and system improvement effort to update its process and project coding system, update its business processes, and re-educate its staff on the proper use of time reporting codes. This effort led to a number of improvements such as improved time card data collected and project data recorded. It also led to a clean-up of the CAISO business process and project coding system.

Lastly, this effort reevaluated direct costs vs. indirect costs and the weighting of the process tasks. CAISO's leadership team, as well as business process owners, participated in weighting the business process tasks, which led to a finer granularity of cost drivers.

The introduction of the RC services category also contributed to the shift. A number of the RC functions previously existed in the system operations category as identified in the RC Rate Design proposal. With the introduction of the RC services category, a percentage of those functions were categorized under the RC services category, which caused a shift from the system operations category. The shift contributed to the reduction of the system operations category cost which effectively contributed to the balancing of the costs between the system operations and market services cost categories and their sub-categories.

Finance/FPP Page 38 of 68

Improved automation of services, like with Existing Transmission Contract Calculator (ETCC), allowed for improved integration with other tools which allowed CAISO staff to better utilize their time spent of system operations functions and devote more time spent on market services functions.

The combination of the aforementioned shift drivers led to a balancing of the costs as illustrated below; in other words, the costs were split 50/50 between direct and indirect categories. The balancing of direct costs and indirect costs in combination with the new weighting of the tasks resulted in a time and resource shift in the system operations cost category and market services cost category as well as a shift within their sub-categories.

| COSS: Direct Costs vs. Indirect Costs History | | | | | |

Energy Imbalance Market

The EIM provides entities with the opportunity to leverage CAISO's existing real time market platform to facilitate five-minute economic dispatch. The EIM provides reliability and economic benefits to both existing market participants and new EIM entities by utilizing CAISO's 15-minute market and real time dispatch. The EIM relies on CAISO's existing real time portion of the market services activities and system operations activities.

Conceptually, EIM participants will pay the same rate as existing customers but only for the real time market and real time dispatch activities specifically related to EIM. To determine the updated EIM fee, using the

Finance/FPP Page 39 of 68

2019 cost of service study, CAISO identified and aggregated the real time activity costs allocated to the two main cost categories – market services and system operations. The CAISO then allocated indirect costs to the categories based on the proportion to direct costs. The respective real time cost proportions were then applied to the respective rates for market services and system operations.

The costs include the EIM share of all components of the revenue requirement such that EIM participants will pay the same rate as existing customers for the real time activities they are using.

Application of ABC to EIM Rate Structure

As noted earlier, the ABC analysis disaggregated CAISO's primary business functions into nine core processes (level 1 activities). Each core activity was then divided into major processes (level 2 activities) which were mapped to the corresponding level 1 activity. The first step was to allocate the two cost category activities to the corresponding real time components. The market services component relates to either the real time market or the day ahead market. The system operations component relates to either real time dispatch or balancing authority services.

Mapping of Cost Categories to EIM Activities

Market services' real time market and system operations' real time dispatch activities are mapped to the EIM rate structure. These activities are defined, linked to specific processes, and measured using the 12 standard percentage allocations presented in *Table 6 – Mapping of ABC Direct Operating Activities to Cost Categories*. If the activity was identified as indirect or the attribute was not distinguishable to any specific category, it was not included in the initial steps of the allocation process but rather allocated at the end of the process based on percentages of direct allocable costs.

MARKET SERVICES

The following mapping only addresses those level 2 activities that are mapped to market services, which then in turn were mapped to either the real time market or the day ahead market. The direct ABC level 2 activities

Finance/FPP Page 40 of 68

mapped to market services is taken from *Table 6 – Mapping of ABC Direct Operating Activities to Cost Categories*.

Finance/FPP Page 44 of 68

SYSTEM OPERATIONS

The following mapping only addresses those level 2 activities that are mapped to system operations, which then in turn were mapped to either the real time dispatch or balancing authority (BA) services. The direct ABC level 2 activities mapped to system operations is taken from *Table 6 – Mapping of ABC Direct Operating Activities to Cost Categories*.

Table 34 — Mapping of System Operations ABC Direct Operating Activities

| | System Operations Split | | | | | | | | |
|-----------------------|------------------------------------|--|--|--|--|--|--|--|--|
| Real Time Dispatch | Balancing Authority Services | Comments | | | | | | | |

| Planning Coordinator Fees | 100% | | 100% | Use Process 80001, Task 204 allocations. |

System operations fees from *Table 27 – Estimation of Fee Revenue and Mapping of Fees to Cost Categories* were mapped as follows.

Table 37 — Mapping of System Operations Fees

| 2019 Modified Revenue Requirement | | System Operations Split | |
|-----------------------------------|------------|-------------------------------------|---------------------|
| | | Balancing | |
| | System | Real Time Authority | |
| Fee | Operations | Dispatch Services | Comments |
| | | (% of cost to allocate to category) | |
| TOR Fees | 100% | 100% | Real time function. |

Costing the Cost Categories to EIM Activities

The amounts from the 2019 cost of service study were applied to the market services and system operations categories to derive the direct real time activity costs.

Table 38 - Components of the 2019 Modified GMC Revenue Requirement

| 2019 Modified GMC Revenue Requirement | |
|--|----------------|
| | |
| Component | Budget |
| Non-ABC O&M Support Costs | \$ 33,999 |
| Direct ABC O&M Costs | \$ 151,611 |
| Debt Service | \$ 16,904 |
| Cash Funded Capital | \$ 25,000 |
| Other Costs and Revenues | \$ (38,662) |
| Operating Costs Reserve Adjustment | \$ (13,480) |
| Subtotal | \$ 175,372 |
| Indirect Costs | \$ 3,420 |
| GMC Revenue Requirement Before Fees | \$ 178,792 |
| Less Fees | \$ (8,560) |
| | |
| Remaining Revenue Requirement to Collect | \$ 170,232 |

| | Market Services | | System | | CRR Services |
|----|--------------------|----|------------|----|-----------------|
| _ | | _ | Operations | _ | |
| \$ | 1,606 | \$ | 566 | \$ | 44 |
| \$ | 45,075 | \$ | 47,608 | \$ | 1,960 |
| \$ | - | \$ | - | \$ | - |
| \$ | - | \$ | = | \$ | - |
| \$ | (3,040) | \$ | (4,240) | \$ | = |
| \$ | - | \$ | = | \$ | - |
| \$ | 43,641 | \$ | 43,934 | \$ | 2,004 |
| \$ | 43,136 | \$ | 44,116 | \$ | 1,961 |
| \$ | 86,777 | \$ | 88,050 | \$ | 3,965 |
| \$ | (6,725) | \$ | (1,105) | \$ | (730) |
| \$ | 80,052 | \$ | 86,945 | \$ | 3,235 |

Completing the analysis required the following steps:

- 1. applying EIM activity percentages to non-ABC O&M support costs;
- 2. applying EIM activity percentages to ABC direct O&M costs;
- 3. applying EIM activity percentages to other revenue;
- 4. aggregating costs and allocate indirect costs to EIM activities based on percentage of direct costs and allocation of fees to EIM activities to determine the resulting EIM activity amounts and percentages; and
- 5. applying the EIM activity percentage to the applicable cost category (market services and / or system operations) to determine the EIM component.

Finance/FPP Page 49 of 68

Step 1: Applying EIM Activity Percentages to Non-ABC O&M Support Costs

The non-ABC support costs from *Table 14 – Allocation of Non-ABC Support to Cost Categories* were allocated using the percentages shown in the *Mapping of Non-ABC Support Costs* tables above (Table 31 and Table 35).

| Total Other Costs and Revenue | | | | \$ | 4,240 | \$ 570 | \$ | 3,670 | |

Step 4: Aggregating Revenue Requirement into Cost Categories and Allocating Fees

The CAISO aggregated individual revenue requirements for each category, indirect costs were allocated based on the total of direct costs and fees were allocated as described above.

Finance/FPP Page 56 of 68

Table 45 - Mapping Revenue Requirement to Cost Categories

| Component | Budget |
|--|---------------|
| Non-ABC O&M Support Costs | \$ 33,999 |
| Direct ABC O&M Costs | \$ 151,611 |
| Debt Service | \$ 16,904 |
| Cash Funded Capital | \$ 25,000 |
| Other Costs and Revenues | \$ (38,662 |
| Operating Costs Reserve Adjustment | \$ (13,480 |
| Subtotal | \$ 175,372 |
| Indirect Costs | \$ 3,420 |
| GMC Revenue Requirement Before Fees | \$ 178,792 |

| \$ | 86,945 | \$ | 43,237 | \$ | 43,708 | | |
| I | | | 50% | | 50% | | |

Step 5: Calculation of the EIM Components of the 2019 Cost Category Rates

The percentages from Table 45 were applied to the cost categories' real time component's rate from Table 28 – 2019 GMC Rates Using Revised Cost Category Percentages.

Table 46 - Calculation of the EIM Components

| Cost Category | Category Net Costs | _ | Pro Forma Rate | EIM Real Time Activity | EIM Percentage of Costs | | ercentage Cost of of Real Tim | | EIM Pro Forma Rate |
|-------------------|--------------------------|----|-------------------|------------------------------|-------------------------|-----|-------------------------------|---------------|--------------------------|
| | (\$ in thousands) | | (\$ / MWh) | | | | (\$ | in thousands) | (\$ / MWh) |
| Market Services | \$ 80,052 | \$ | 0.1498 | Real Time Market | | 63% | \$ | 50,574 | \$ 0.0947 |
| System Operations | \$ 86,945 | \$ | 0.1945 | Real Time Dispatch | | 50% | \$ | 43,237 | \$ 0.0967 |

Finance/FPP Page 57 of 68

Summary of EIM Cost Category Percentage Changes

A comparison of the EIM cost category percentages from the 2016 and 2019 cost of service studies is shown highlighted below. As noted earlier, the study shows that 16% of market services' resources shifted from the real time market functions to day ahead market functions. In addition, 11% of system operations' resources shifted from balancing authority functions to real time dispatch functions. The driver of the shifts is a balancing of efforts between the market services and system operations functions and responsibilities.

Table 47 – Summary of EIM Cost Category Percentage Changes

| | | 2016 Study | 2019 Study | Increase / |
|-------------------|---------------------|------------|------------|------------|
| Cost | | Effective | Effective | (Decrease) |
| Category | Sub-Category | 2018 GMC | 2021 GMC | from Prior |
| | Real Time Market | 79% | 63% | -16% |
| Market Services | Day Ahead Market | 21% | 37% | 16% |
| | Real Time Dispatch | 39% | 50% | 11% |
| System Operations | Balancing Authority | 61% | 50% | -11% |

Finance/FPP Page 58 of 68

Reliability Coordinator Services

In January 2018, CAISO announced plans to become the RC for entities within its footprint and to offer the service to all balancing authorities and transmission operators in the West. Shortly after, CAISO began a public process to develop its RC services. In November 2018, FERC approved the rates, terms, and conditions for the RC services. CAISO collaborated with entities, regulators, and other RC service providers to work toward its certification, and to create procedures for logistics and operations. CAISO completed the NERC certification process led by the Western Electricity Coordinating Council (WECC), allowing it to provide RC services. In the first phase, RC West became the RC of record for 16 entities as of July 1, 2019. The November 1, 2019 cutover marked the second phase of a transition of power grid oversight responsibility. RC West is now the RC for 42 entities in the Western Interconnection, overseeing 87 percent of the load in the western United States.

Most of the process and tasks necessary to support the RC services were already identified in CAISO's ABC process and task codes; however, they were not directly identified as a RC Services function. To address this gap, beginning with the 2019 cost of service study, CAISO mapped the tasks identified as contributing to RC services to a new cost category, Reliability Coordinator, by means of percentage allocation. This approach allows CAISO to leverage against the stability of its annual revenue requirement to develop an annual RC funding requirement thus benefiting both the RC customers and the existing GMC customers.

By mapping the tasks to the RC cost category, the CAISO is able to calculate the RC funding percentage. The RC funding percentage represents the direct and indirect time and expense necessary for the CAISO to perform its RC services and functions. The RC funding percentage is used similarly to that of the GMC cost category percentages in that the RC funding percentage is multiplied against the revenue requirement in order to determine the RC funding requirement. The RC funding requirement is then divided by the reported MWh to determine the RC rate/MWh.

Finance/FPP Page 59 of 68

Table 48: Allocation of Revenue Requirement to RC Cost Category

| 2019 Modified Revenue Requirement | | | | | | | | | | | | |
|--|---|------------|-------|----------|----|---------------|----|----------|----|------------|----------|---------|

| Indirect Costs Allocated Based on Direct Cost % | | | | 43,136 | | 44,116 | | 1,961 | | 8,823 | | (98,036 |
| Revenue Requirement Sub-Total Before RC Funding Requirement Adjustment | | \$ 196,749 |) \$ | 86,777 | \$ | 88,050 | \$ | 3,965 | \$ | 17,957 | \$ | - |
| RC Funding Percentage | | | | 44% | | 45% | | 2% | | 9% | | |
| Reliability Coordinator Funding Requirement | : | \$ (17,95 | 7) \$ | - | \$ | - | \$ | - | \$ | (17,957) | \$ | - |
| GMC Revenue Requirement | | \$ 178.79 | 2 Ś | 86,777 | Ś | 88.050 | Ś | 3,965 | Ś | - | Ś | _ |
| Cost Category Percentages for GMC Rates | | | | 49% | T | 49% | ŕ | 2% | | | <u> </u> | |

The mapping of RC services is included in the aforementioned sections' tables. The culmination of the mapping resulted in a 9% RC funding percentage. There is no change in the RC funding percentage from that of the initial calculation as part of CAISO's Reliability Coordinator Rate Design, Terms and Conditions proposal.

Table 49- Summary of RC Funding Percentage Changes

| Cost Category | 2016 Modified Study Effective 2019 GMC | 2019 Study Effective 2021 GMC | Increase / (Decrease) from Prior |
|----------------------------------|---|-------------------------------------|--|
| Reliability Coordinator Services | 9% | 9% | 0% |

In addition to mapping the RC related efforts, CAISO revisited the tasks necessary to support load serving and generator only entities. This effort required outreach to the various subject matter experts that support RC services such as from the RC, Operations Planning and Operations Compliance groups. The general feedback was, whereas the number of

Finance/FPP Page 60 of 68

requirements to support generator only facilities is lower, it was determined the same operations and planning tasks are required to ensure reliability throughout the interconnection footprint. In conclusion, CAISO determined that there is no separation of duties between supporting a load serving entity and generator only entity that supports a change in the RC rate design.

Supplemental Fees

As a final focus of the 2019 cost of service study, CAISO analyzed the efforts that support other supplemental services. The effort required input from the various groups that support the services such as from the Contracts, Contract and Model Implementation, Market Services, Operations Planning, Credit, and Customer Service groups.

The study results indicate resources to process applications and statements has increased. These supplemental fees are designed to help recoup some of the costs that a new, or additional, Scheduling Coordinator (SC) or CRR customer has on systems and labor resources. While some of the costs are supported through the volumetric charges of the GMC, these supplemental fees represent a portion of the resource impact that any new entity, large or small, has. The CAISO is proposing to increase fees that have remained unchanged for more than 10 years.

Conversely, the study has shown that resources to support TOR efforts have decreased due to streamlined processes and automation. The decrease in costs and higher volumes support a decrease in the TOR fee from \$0.24 per MWh to \$0.18 per MWh. CAISO does not propose any changes to other supplemental fee amounts.

The revenue collected from the fees offset the costs recovered through either the GMC revenue requirement or the GMC rates. The CAISO is not proposing any other change in supplemental fees.

Finance/FPP Page 61 of 68

Table 50- Summary of Supplemental Fee Changes

| Fee | Billing Units | Current Fee | Updated Fee |
|--|--------------------|--------------------|--------------|
| Bid Segment Fee | per bid segment | \$ 0.0050 | No Change |
| Inter SC Trade Fee | per Inter SC Trade | \$ 1.0000 | No Change |
| Scheduling Coordinator ID Fee | per month | \$ 1,000 | \$ 1,500 |
| | minimum of supply | | |
| | or demand TOR | | |
| TOR Fees | MWh | \$ 0.2400 | \$ 0.1800 |
| | number of | | |
| | nominations and | | |
| CRR Bid Fee | bids | \$ 1.00 | No Change |
| Intermittent Resource Forecasting Fee | per MWh | \$ 0.1000 | No Change |
| Scheduling Coordinator Application Fee | per application | \$ 5,000 | \$ 7,500 |
| CRR Application Fee | per application | \$ 1,000 | \$ 5,000 |
| HANA Administrative Fee | annual fee | \$ 45,000 | No Change |
| HANA Setup Fee | one time fee | \$ 35,000 | No Change |

Transmission Ownership Rights

Transmission ownership rights (TOR) represent transmission capacity on facilities that are located within the CAISO balancing authority area that are either wholly or partially owned by an entity that is not a participating transmission owner.

The following four services are required for TOR:

1. Real Time Operations

CAISO provides support on an emergency basis for flows on TOR, in a manner similar to standby service.

2. Scheduling

CAISO provides check-outs with neighboring balancing authorities (BA) in order to schedule flows across boundaries.

3. Outage Management

CAISO provides for the scheduling and coordination of outages across the BA.

Finance/FPP Page 62 of 68

4. Settlements

CAISO utilizes its settlements system and processes to charge TOR fees.

Application of ABC to TOR Fee Structure

TORs utilize the ABC level 2 activities identified in the table below. These activities are all related to system operations as there is no TOR participation in the market and thus market services costs are not applicable.

Table 51 -ABC Direct Operating Activities for TORs

| Transmiss | ion Ownershi | p Rights (TOR) Fee |
|-----------|--------------|---|
| ABC Code | Task Code | ABC Level 2 Activity |
| 80004 | 301 | Manage Full Network Model (FNM) Maintenance |
| 80004 | 311 | Manage Operations Planning |
| 80004 | 312 | Manage WECC Studies |
| 80005 | 355 | Manage Outages |
| 80005 | 360 | Real Time Operations |
| 80005 | 362 | Manage Operations Engineering Support |
| 80007 | 411 | Manage Market Clearing |
| 80007 | 412 | Manage Market Billing & Settlements |

Mapping and Costing of Cost Categories to TOR Activities

Using the process described below, a total of \$38.9 million in direct and indirect costs were allocated to TORs. CAISO reached this conclusion by identifying the costs for the specific level 2 activities from the 2019 cost of service update. The indirect dollars were then allocated based on the direct percentage. A table summarizing the cost of TORs is as follows

Finance/FPP Page 63 of 68

Table 52 - Calculation of TOR Related Costs

| Transmiss | ion Ownersh | ip Rights (TOR) Fee | |
|------------|--------------|--|------------------------|
| | | | |
| Calaulatia | TOD C | | |
| Caiculatio | n of TOR Cos | its | _ |
| ABC Code | Task Code | ABC Level 2 Activity | mount housands) |
| 80004 | 301 | Manage Full Network Model (FNM) Maintenance | \$ 1,734 |
| 80004 | 311 | Manage Operations Planning | \$ 1,789 |
| 80004 | 312 | Manage WECC Studies | \$ 80 |
| 80005 | 355 | Manage Outages | \$ 1,535 |
| 80005 | 360 | Real Time Operations | \$ 10,444 |
| 80005 | 362 | Manage Operations Engineering Support | \$ 3,213 |
| 80007 | 411 | Manage Market Clearing | \$ 53 |
| 80007 | 412 | Manage Market Billing & Settlements | \$ 599 |
| | | Applicable Direct Costs | \$ 19,447 |
| | | Total System Operations Direct Costs | \$ 43,934 |
| | | Percentage of TORs to System Operations Direct Costs | 44% |
| | | Total System Operations Indirect Costs | \$ 44,116 |
| | | Percentage Per Above | 44% |
| | | Applicable Indirect Costs | \$ 19,411 |
| | | Total TOR Related Costs | \$ 38,858 |

System operation's indirect costs were allocated based on the percentage of direct cost as shown above.

Then the ratio of TOR MWh to the total system operations (flow) MWh was calculated to determine the usage percentage.

Finance/FPP Page 64 of 68

Table 53 - TORs as a Percentage of Gross Volumes

| Transmi | ssion Ownership Rights (TOR) Fee | |
|---------|--|---------------------|
| | saion ownership highes (Tok) rec | |
| TOR Flo | w | |
| | | Volumes (in MWh) |
| | System Operations Volume | 442,538,230 |
| | Add Back Grandfathered Contracts | 3,723,000 |
| | TOR Supply | 4,339,223 |
| | TOR Demand | 4,313,917 |
| | Total Adjusted System Operations Volume | 454,914,369 |
| | Total Gross TOR Volume (Supply and Demand) | 8,653,140 |
| | TOR as a Percentage of Gross Volume | 2.00% |

The amount to collect is then derived by multiplying the TOR related costs by the TOR percentage results. The TOR fee is then determined by dividing the TOR costs to collect by the minimum of actual TOR supply or actual TOR demand for 2019. The revised TOR fee is as follows

Table 54 - Calculation of TOR Fee

| Transm | nission Ownership Rights (TOR) Fee | | | |
|--------|--|------------------|--|--|
| TOR Fe | e Calculation | | | |
| | | Amount | | |
| | Total Applicable Direct and Indirect Costs | \$ 38,858,040 | | |
| | TOR as a Percentage of Gross Volume | 2.00% | | |
| | TOR Costs to Collect | \$ 777,161 | | |
| | TOR MWh for 2019 (min. of supply and demand) | 4,313,917 | | |
| | TOR Fee per MWh | \$ 0.1800 | | |

Finance/FPP Page 65 of 68

Summary of TOR Fee Changes

Despite a decrease in the applicable TOR costs, the TOR related costs to collect increased by \$157,549 from the last cost of service study due to TOR having a higher percentage of gross volume. However, the cost to collect divided by the increased MWh resulted in a reduction of the TOR fee from \$0.2400 per MWh to \$0.1800 per MWh. CAISO proposes to decrease the TOR fee to \$0.1800 per MWh effective January 1, 2021. The revenue collected from the TOR fee will offset costs recovered through the System Operations charge rate.

Table 55 – Summary of TOR Fee Changes

| Transmission Ownership Rights (TOR) Fee | 2 | 016 COSS | 2019 COSS | Increase / (Decrease) From Prior |
|--|----|------------|------------------|--|
| TOR Fee Calculation | | | | |
| | | Amount | Amount | Amount |
| Total Applicable Direct and Indirect Costs | \$ | 61,961,200 | \$ 38,858,040 | \$ (23,103,160) |
| TOR as a Percentage of Gross Volume | | 1.00% | 2.00% | 1.00% |
| TOR Costs to Collect | \$ | 619,612 | \$ 777,161 | \$ 157,549 |
| TOR MWh for 2019 (min. of supply and demand) | | 2,627,260 | 4,313,917 | 1,686,657 |
| TOR Fee per MWh | \$ | 0.2400 | \$ 0.1800 | \$ (0.0600) |

Application Fees

The SC application fee is one of the original fees the CAISO has assessed since inception. The fee is intended to cover the processing and setup costs for an applicant to become a certified scheduling coordinator eligible to transact business directly with the CAISO. The fee amount was last changed in 2007. As part of the 2019 cost of service study, CAISO evaluated the actual cost of processing applications, establishing connectivity, evaluating financial security, and providing training. When the hours to perform these functions per application are applied against a general burden rate per hour the cost to process a SC application is \$7,500.

The CRR application fee is assessed on any load serving entity (LSE) that desires to become a candidate CRR Holder so that they can participate in the CRR allocation process to request CRRs. CRRs are important to LSEs since they are a financial instrument used to offset congestion charges for the scheduled load in the day

Finance/FPP Page 66 of 68

ahead market. These entities are allocated CRRs based on the load serving obligation of the LSE. The CRR application fee was introduced in 2012; the fee amount has not changed since. As with the SC application fee, CAISO evaluated the actual cost of processing applications, establishing connectivity, evaluating financial security, and providing training. When the hours to perform these functions per application are applied against a general burden rate per hour the cost to process a CRR application is \$5,000.

CAISO proposes to increase the SC application fee to \$7,500 and the CRR application fee to \$5,000 effective January 1, 2021. The revenue collected from these fees will offset the annual GMC revenue requirement.

Scheduling Coordinator ID Administrative Fee

The SCID administrative fee was originally designed to limit the number of SCIDs to those needed for legitimate business purposes in order to reduce the additional burden on CAISO systems and resources that an unlimited number of SCIDs could create. However, since the fee was last assessed in 2012, the cost to support the settlements system and provide monthly statements and invoices has increased beyond the \$1,000 per month per SCID fee amount due to general inflation and system maintenance costs. In its evaluation as illustrated in Table 56 – Calculation of SCID Fee below, CAISO concluded the SCID fee should increase to \$1,500 per month to cover supporting system and labor costs from contributing groups such as Contracts, Credit, Resource Management, SC Management, Market Quality, Settlement, and IT.

CAISO proposes to increase the SCID administrative fee to \$1,500 effective January 1, 2021. The revenue collected from the SCID fee will offset costs recovered through the Market Services charge rate.
