

Estimation of Minimum Load Costs (MLC) for Trade Date 3/2/2019

Version 1.0

California ISO	Version: 1.0
Estimation of Minimum Load Costs for Trade Date 3/2/19	Last Updated: 03/5/19

Consistent with Section 11.29.10.5 of the CAISO tariff, the ISO is estimating minimum load costs (MLC) to be zero on trade date 3/2/19 initial settlement statement.

Methodology for estimation of MLC as zero is updating real time MLC eligibility flag, bill determinant
BA_5M_RSRC_CONFIG_ID_RTM_MLC_ELIG_FLAG, from one to zero.

Settlement based upon actual MLC will be reflected on the next statement cycle. The affected market participant was notified of estimation accordingly.
