Washington, DC 20585

December 14, 2000

Order Pursuant to Section 202(c) of the Federal Power Act

Pursuant to Section 202(c) of the Federal Power Act (16 U.S.C. 824a(c)) and 10 C.F.R. § 205.370, in this order I consider the question of whether an emergency exists in California by reason of a shortage of electric energy or of facilities for the generation or transmission of electric energy, or of fuel or water for generating facilities, or other causes, and whether to require by order such temporary connections of facilities and such generation, delivery, interchange, or transmission of electric energy as will best meet the emergency and serve the public interest. Because of a shortage of currently operational electric generation facilities, a shortage of water used to generate electricity, unusual volatility of electricity and natural gas markets, and for other reasons, California is experiencing an unexpected shortage of electric energy. Therefore, pursuant to Section 202(c) of the Federal Power Act, I find an emergency exists in California by reason of the shortage of electric energy.

Accordingly, I hereby order the entities listed in Attachment A to make arrangements to generate, deliver, interchange, and transmit electric energy when, as, and in such amounts as may be requested by the California Independent System Operator (California ISO), acting as agent for and on behalf of Scheduling Coordinators (as that term is defined in the California ISO tariff on file at the Federal Energy Regulatory Commission), consistent with the terms of this order. The entities listed in Attachment A are only required to sell electricity to the California ISO that is available in excess of electricity needed by each entity to render service to its firm customers.

This order is effective immediately and expires at 3:00 a.m., EST, December 21, 2000, unless altered or revoked by further order. However, the entities in Attachment A are not required to deliver energy or services under the terms of this order until 12 hours after the California ISO has filed with the Department of Energy (DOE) a signed certification that it has been unable to acquire in the market adequate supplies of electricity to meet system demand, and, as a consequence, it has, or reasonably anticipates, an "inadequate fuel or energy supply" as defined in 10 C.F.R. § 205.375. In order to continue to avail itself of this order, the California ISO is required to submit to DOE a further certification as set forth in the preceding sentence every twenty-four hours until the expiration of the order. The California ISO shall provide a signed copy of all certifications to the entities in Attachment A at the time it provides them to DOE.

The California ISO must inform each entity subject to this order of the amount and type of energy or services requested by 9:00 p.m., EST, the day before the requested service. In making requests for power pursuant to this order, to the extent feasible, the California ISO is directed to

- 2 -

allocate those requests among the entities listed in Attachment A in proportion to each entity's available excess power.

The terms of any arrangement made between the entities subject to this order and the California ISO pursuant to this order are to be as agreed to by the parties. If no agreement as to terms can be reached, I will immediately prescribe the conditions of service and refer the rate issue to the Federal Energy Regulatory Commission for a determination at a later date by that agency in accordance with its standards and procedures, and will prescribe by supplemental order such rates as it finds to be just and reasonable.

ORDER

For the reasons set forth above, pursuant to Section 202(c) of the Federal Power Act, it is ordered that:

- A. Consistent with the requirements set forth below, the entities listed on Attachment A will make arrangements to generate, deliver, interchange, and transmit electric energy when, as, and in such amounts as may be requested by the California Independent System Operator (California ISO), acting as agent for and on behalf of Scheduling Coordinators (as that term is defined in the California ISO tariff on file at the Federal Energy Regulatory Commission).
- B. The entities listed in Attachment A are only required under the terms of this order to sell electricity to the ISO that is available in excess of electricity needed by each entity to render service to its firm customers.
- C. This order is effective immediately and expires at 3:00 a.m., EST, December 21, 2000, unless altered or revoked by further order.
- D. The entities in Attachment A are not required to deliver energy or services under the terms of this order until 12 hours after the California ISO has filed with the Department of Energy (DOE) a signed certification that it has been unable to acquire in the market adequate supplies of electricity to meet system demand, and, as a consequence, it has, or reasonably anticipates, an "inadequate fuel or energy supply" as defined in 10 C.F.R. § 205.375. In order to continue to avail itself of this order, the California ISO is required to submit to DOE a further certification as set forth in the preceding sentence every twenty-four hours until the expiration of the order. This certification should be submitted to Paul Carrier, Department of Energy, Office of Energy Emergencies, Office of Policy, PO-5, 1000 Independence Avenue, S. W., Washington, D.C. 20585, (202) 586-5659, fax: (202) 586-5391, e-mail: Paul.Carrier@hq.doe.gov. The California ISO shall provide a copy of all certifications to the entities in Attachment A at the time it provides them to DOE.

- 3 -

- E. The California ISO must inform each entity subject to this order of the amount and type of energy or services requested by 9:00 p.m., EST, the day before the requested service. In making requests for power pursuant to this order, to the extent feasible, the California ISO is directed to allocate those requests among the entities listed in Attachment A in proportion to each entity's available excess power.
- F. The terms of any arrangement made between the entities subject to this order and the California ISO pursuant to this order are to be as agreed to by the parties. If no agreement as to terms can be reached, I will immediately prescribe the conditions of service and refer the rate issue to the Federal Energy Regulatory Commission for a determination at a later date by that agency in accordance with its standards and procedures, and will prescribe by supplemental order such rates as it finds to be just and reasonable.
