Re: *California Independent System Operator Corporation*,
Docket No. ER01-313-_____

Pacific Gas and Electric Company,
Docket No. ER01-424-_____

San Diego Gas & Electric Company v.
California Independent System Operator Corporation,
Docket No. EL03-131-_____

Dear Secretary Salas:

In accordance with Opinion No. 463-B, the Commission's Order Denying Rehearing and Affirming in Part and Reversing in Part Initial Decision dated November 7, 2005, in the above-captioned docket,¹ the California Independent System Operator Corporation ("ISO") submits this compliance filing to the Commission. These consolidated dockets concern the Grid Management Charges ("GMC") collected by the ISO during the period January 1, 2001, through December 31, 2003.

Opinion No. 463-B directed the ISO to submit to the Commission an accurate list of generators that were incorporated into the base cases used by the ISO for transmission planning and operations between 2001 and 2003. To prepare the list, the ISO compiled a list of the generators that were incorporated into the base case scenarios used for transmission planning and operations between 2001 and 2003 and submitted them to the investor-owned Participating Transmission Owners for review to ensure their accuracy. In an October 23, 2006 compliance filing, the ISO submitted to the amended list of

¹ *Calif. Indep. Sys. Operator Corp.*, 113 FERC ¶ 61,135 (2005) ("Second Rehearing Order").

The Honorable Magalie R. Salas
February 8, 2007
Page 2

generators to the Commission. Subsequently, while reviewing the October 23rd list, the ISO recognized that it had mistakenly prepared that list from the incorrect computer file. Accordingly, the ISO requests leave to withdraw the list filed at the Commission on October 23, 2006 and replace it with the list attached to this compliance filing as Attachment A.

For the convenience of the Commission and parties to this proceeding, the ISO is providing at Attachment B a blacklined version of the list that identifies all changes between the original list of generators was submitted into evidence as Exhibit ISO-55 in the February 2005 hearing in this proceeding and the amended list filed today and an explanation of the changes. First, as indicated in the attachment, several facilities were removed from the initial list because they are pump load facilities, pumps that participate in the ISO markets as demand-side resources. In cases where there are generators attached to the pumps, those generators are identified in Attachment A as separate facilities. Second, one facility, Palmdale, was removed from the initial list because it was not in service during the 2001-2003 time period. Third, for several facilities, the ISO removed comments in the Long ID field, a change that does not affect the facilities' inclusion on the list. Fourth, four facilities near the end of the list were removed because they are on the list elsewhere with different names. Finally, five new facilities were added to the list based on consultation with Southern California Edison Company, which indicated that they were left off of the original list.

Following Commission approval of this list of generators, the ISO will recalculate the GMC rates for the 2001-2003 time period to reflect all rulings in Opinion No. 463-B (and the rulings in Opinion Nos. 463 and 463-A that were not modified in that opinion) and recalculate Scheduling Coordinator bills accordingly.

One original and five copies of this compliance filing are enclosed for the Commission's use. Two additional copies have been included to be date/time stamped and returned to our messenger. Thank you for your assistance with this matter.

Sincerely,

Kenneth G. Jaffe
Michael Ward
