As Director of Transmission Operations and Maintenance for Arizona Public Service, Kristie Cocco leads the organizations responsible for both the Transmission Operator and Balancing Authority functions. She is enthusiastic about her team playing a pivotal role in integrating clean energy resources into the APS system while maintaining reliability. She has been with APS since February of 2014, and previously led the APS NERC Regulatory Compliance group. Before coming to APS, she worked at Salt River Project in various operations roles. She holds a Bachelor of Science degree in Electrical Engineering from Arizona State University, and is a registered professional engineer in Arizona.
